No. 1 (FEBRUARY 1982)

|   | PAGE |
|---|------|
| CHAPPEL, R. J., HAYES, J., BRAIN, G. J. and MCNAUGHT, D. J. A modified radio-immunoassay for antibodies against <i>Brucella abortus</i> . . . . .   | 1    |
| CHAPPEL, R. J., HAYES, J., ROGERSON, B. A. and SHENFIELD, L. J. The serological response of cattle to vaccines against brucellosis as measured by the brucellosis radioimmunoassay and other tests. . . . .                           | 11   |
| HAYES, J. and CHAPPEL, R. J. A comparison of the brucellosis radioimmunoassay and other serological tests in experimentally infected cattle. . . . .  | 21   |
| TURNBULL, P. C. B. and ROSE, PHYLLIS. <i>Campylobacter jejuni</i> and salmonella in raw red meats. A Public Health Laboratory Service Survey . . . . .  | 29   |
| PRESTON, N. W., SURAPATANA, NAREKUL and CARTER, E. J. A reappraisal of serotype factors 4, 5 and 6 of <i>Bordetella pertussis</i> . . . . .   | 39   |
| GEDEBOU, MESSELE and TASSEW, ALEBACHEW. <i>Shigella</i> species from Addis Ababa: frequency of isolation and <i>in vitro</i> drug sensitivity . . . . .   | 47   |
| KHAIRY, AMAL E. M., EL SEBAIE, OLFAT, ABDEL GAWAD, ALEYA and EL ATTAR, LAILA. The sanitary condition of rural drinking water in a Nile Delta village. I. Parasitological assessment of 'zir' stored and direct tap water . . . . .    | 57   |
| EL ATTAR, LAILA, ABDEL GAWAD, ALEYA, KHAIRY, AMAL E. M. and EL SEBAIE, OLFAT. The sanitary condition of rural drinking water in a Nile Delta village. II. Bacterial contamination of drinking water in a Nile Delta village . . . . . | 63   |
| ROTIMI, V. O. and DUERDEN, B. I. The bacterial flora of neonates with congenital abnormalities of the gastro-intestinal tract . . . . .   | 69   |
| TILLET, HILARY E. and SPENCER, INGE-LISE. Influenza surveillance in England and Wales using routine statistics. Development of 'cusum' graphs to compare 12 previous winters and to monitor the 1980/81 winter . . . . .              | 83   |
| DAVIES, F. G. Observations on the epidemiology of lumpy skin disease in Kenya . . . . .   | 95   |
| REALI, D. Enterotoxin A and B production in strains of <i>Staphylococcus aureus</i> isolated from human beings and foods . . . . .  | 103  |
| CRAVEN, J. A. and HURST, D. B. The effect of time in lairage on the frequency of salmonella infection in slaughtered pigs. . . . .  | 107  |
| HARVEY, R. W. S. and PRICE, T. H. Influence of multiple plating from fluid media on salmonella isolation from animal feeding stuffs . . . . .   | 113  |
| BETTELHEIM, K. A. and WILSON, M. W. The enterotoxigenicity of strains of <i>Escherichia coli</i> isolated from the faeces of healthy people and cattle . . . . .  | 121  |
| TAMMINGA, S. K., BEUMER, R. R. and KAMPELMACHER, E. H. Microbiological studies on hamburgers . . . . .  | 123  |
| HAMBRAEUS, A. and MALMBORG, A.-S. Is a bed centre in a hospital a hygienic hazard? . . . . .  | 143  |

## No. 2 (APRIL 1982)

|  |     |
|--|-----|
| EDITORIAL: Rubella antibody screening . . . . .  | 149 |
| KENDALL, E. J. C. and TANNER, ELIZABETH I. <i>Campylobacter</i> enteritis in general practice . . . . .  | 155 |
| WATSON, K. C. and KERR, E. J. C. Comparison of agglutination, complement fixation and immunofluorescence tests in <i>Campylobacter jejuni</i> infections . . . . .   | 165 |
| CARNE, H. R. and ONON, ELEANOR O. The exotoxins of <i>Corynebacterium ulcerans</i> . . . . .   | 173 |
| FROST, J. A., ROWE, B., WARD, L. R. and THRELFALL, E. J. Characterization of resistance plasmids and carried phages in an epidemic clone of multi-resistant <i>Salmonella typhimurium</i> in India . . . . .   | 193 |
| DE JONCKHEERE, J. F. Hospital hydrotherapy pools treated with ultra violet light: bad bacteriological quality and presence of thermophilic <i>Naegleria</i> . . . . .  | 205 |
| MURRAY, C. K., HOBBS, G. and GILBEFT, R. J. Scombrototoxin and scombrototoxin-like poisoning from canned fish . . . . .  | 215 |
| WIEGERSMA, N., JANSEN, G. and VAN DER WAAIJ, D. Effect of twelve anti-microbial drugs on the colonization resistance of the digestive tract of mice and on endogenous potentially pathogenic bacteria . . . . .  | 221 |
| REPORT OF THE INTERNATIONAL FEDERATION FOR ENTERIC PHAGE-TYPING (IFEPT). The geographical distribution of <i>Salmonella typhi</i> and <i>Salmonella paratyphi A</i> and <i>B</i> phase types during the period 1 January 1970 to 31 December 1973. . . . . | 231 |
| JONES, P. W., COLLINS, P., BROWN, G. T. H. and AITKEN, M. Transmission of <i>Salmonella mbandaka</i> to cattle from contaminated feed . . . . .  | 255 |
| WRIGHT, R. C. A medium for the rapid enumeration of <i>Escherichia coli</i> in the presence of other faecal coliforms in tropical waters . . . . .   | 265 |
| FALBO, VINCENZO, CAPRIOLI, ALFREDO, MONDELLO, FRANCESCA, CACACE, MARIA LUISA, LUZI, STEFANIA and GRECO, DONATO. Anti-microbial resistance among salmonella isolates from hospitals in Rome . . . . .   | 275 |
| SUTMOLLER, F., AZEREDO, R. S., LACERDA, M. D., BARTH, O. M., PEREIRA, H. G., HOFFER, E. and SCHATZMAYR, H. G. An outbreak of gastroenteritis caused by both rotavirus and <i>Shigella sonnei</i> in a private school in Rio de Janeiro . . . . .           | 285 |
| LINDBERG, A. A., HEGGMAN, S., KARLSON, K., CARLSSON, H. E. and MAIR, N. S. Enzyme immunoassay of the antibody response to <i>Brucella</i> and <i>Yersinia enterocolitica</i> 09 infections in humans. . . . .  | 295 |
| ANDERSON, M. J., DAVIS, L. R., JONES, S. E., PATTISON, J. R. and SERJEANT, G. R. The development and use of an antibody capture radioimmunoassay for specific IgM to a human parvovirus-like agent . . . . .   | 309 |
| OXFORD, J. S., YETTS, R. and SCHILD, G. C. Quantitation and analysis of the specificity of post-immunization antibodies to influenza B viruses using single radial haemolysis . . . . .  | 325 |
| TEDDER, R. S., YAO, J. L. and ANDERSON, M. J. The production of monoclonal antibodies to rubella haemagglutinin and their use in antibody-capture assays for rubella-specific IgM . . . . .  | 335 |

## NOTES FOR CONTRIBUTORS

Papers for publication should be sent to Professor J. R. Pattison, Department of Medical Microbiology, King's College Hospital Medical School, Denmark Hill, London SE5 8RX. The typescript and two copies should be sent with 3 copies of all tables and illustrations. Papers forwarded to the Editor for publication are understood to be offered to the *Journal of Hygiene* alone, unless the contrary is stated.

### *General*

Careful preparation of manuscripts will promote rapid publication. Authors are advised to refer to a recent issue of the journal in addition to the notes below, paying particular attention to the form of references, tables and figures and the use of symbols and abbreviations. Papers should be in double-spaced typescript throughout (including reference lists, footnotes and legends) on A4 paper with a left hand margin of at least 4 cm.

### *Format*

Papers must commence with a separate title page indicating the full title, initial(s), surname(s), address(es) of the authors and a short title not exceeding 45 characters. Papers should usually be divided into SUMMARY, INTRODUCTION, MATERIALS AND METHODS, RESULTS, DISCUSSION and REFERENCES. Some observations are best described in the form of a continuous narrative with the only subsection being a Summary at the beginning. Such papers will also be considered.

Acknowledgements are put at the end of the discussion after a space of one line.

### *Tables*

Tables should be numbered separately with arabic numerals and each table typed on a separate sheet of paper. Whenever possible they should be so designed that they can be printed across the width of a page. Note that columns and lines are not separated by vertical or horizontal lines but are grouped by the use of braces of varying lengths.

### *Illustrations*

Line drawings, diagrams and charts should be accurately drawn on plain white board or paper or faintly blue-lined graph paper and should not be more than twice publication size. Points should be indicated by the following symbols: ○, △, □, ●, ▲, ■. Lettering and numbering will not be directly reproduced but should be clearly shown either in pencil on the drawing or on overlaid transparent paper.

Illustrations for plates should be sent as unmounted glossy prints with good contrast. If more than one photograph is to be included in a single plate, a rough sketch of the suggested lay-out should be sent.

Legends for figures and descriptions of plates should be typed on separate sheets of paper. Each illustration should bear on the back the author's name and illustration number.

### *References*

In the text references by up to three authors are cited in the form Jones, Smith & Brown (1950) and those by four or more authors in the form Jones *et al.* (1950).

The reference list should be arranged alphabetically and should include authors' names, initials, year of publication in parentheses, title of the paper, name of the journal *in full*, the volume number and first and last page numbers. References to books and monographs should be in the form: authors' names, initials, year of publication in parentheses, title, edition editors (if appropriate), page number(s), place of publication and publisher.
