

# THE MARINE BIOLOGICAL ASSOCIATION OF THE UNITED KINGDOM

THE ASSOCIATION was founded in 1884 to promote accurate researches leading to the advancement of zoological and botanical science and to an increase in our knowledge of the food, life, conditions and habits of British fishes. The work of the Association is controlled by a Council elected annually by its subscribing members.

Professor T. H. Huxley took the chair at the initial meeting held in the rooms of the Royal Society and was elected the first President. Among those present were Sir John Lubbock (afterwards Lord Avebury), Sir Joseph Hooker, Professor H. N. Moseley, Mr G. J. Romanes, and Sir E. Ray Lankester who, after Professor Huxley, was for many years president of the Association. It was decided to build a laboratory at Plymouth, where a rich and varied fauna is found.

The Plymouth Laboratory was opened in June 1888, and, since that date, considerable additions have been made to the buildings, including a library, lecture-hall, and extensive laboratory accommodation with up-to-date equipment. Additional sea-water reservoirs have also been built, and an aquarium, modernized in 1959, opened to the public.

The Association is maintained by subscriptions and donations from private members, universities, scientific societies and other public bodies; a generous annual grant has been made by the Fishmongers' Company since the Association began. Practical investigations upon matters connected with sea-fishing are carried on under the direction of the Council, and from the beginning a Government Grant in aid of the maintenance of the laboratory has been made; in recent years this grant has been greatly increased in view of the assistance which the Association has been able to render in fishery problems and in fundamental work on the environment of marine organisms. Accounts of the laboratory and aquarium and the scope of the researches will be found in Vol. 27 (p. 761), Vol. 39 (p. 391) and Vol. 43 (p. 281) of this *Journal*.

The laboratory is open throughout the year and its work is carried out by a fully qualified research staff under the supervision of the Director. The names of the members of the staff will be found at the beginning of this number. Accommodation is available for British and foreign scientific workers who wish to carry out independent research in all branches of marine science. Arrangements are made for courses for advanced students, and marine animals and plants are supplied to educational institutions.

Work at sea is undertaken by two research vessels and by a motor boat, and these also collect the specimens required in the laboratory.

## TERMS OF MEMBERSHIP

	<i>£</i>	<i>s.</i>	<i>d.</i>
Annual Members . . . . . per annum	1	1	0
Life Members . . . . . Composition fee	15	15	0
Founders . . . . .	100	0	0
Governors . . . . .	500	0	0

Members of the Association have the following rights and privileges: they elect annually the Officers and Council; they receive the *Journal* of the Association free by post; they are admitted to view the laboratory at Plymouth, and may introduce friends with them; they have the first claim to rent a place in the laboratory for research, with use of tanks, boats, etc.; they have the privilege of occupying a table for one week in each year free of charge; and they have access to the books in the library at Plymouth.

The Commissioners of Inland Revenue have approved the Association for the purposes of Section 16, Finance Act, 1958, and that the whole of the annual subscription paid by a member who qualifies for relief under the section will be allowable as a deduction from his emoluments assessable to income tax under Schedule E.

All correspondence should be addressed to the Director, The Laboratory, Citadel Hill, Plymouth.

# CONTENTS

	PAGE
W. CLIFFORD JONES. Photographic records of living oscular tubes of <i>Leucoselenia variabilis</i> . III. Irregular growth of the oscular tube . . . . .	I
B. B. RAE, R. JOHNSTON and J. A. ADAMS. The incidence of dead and dying fish in the Moray Firth, September 1963 . . . . .	29
D. L. URRY. Observations on the relationship between the food and survival of <i>Pseudo-</i> <i>calanus elongatus</i> in the laboratory . . . . .	49
F. E. G. COX. <i>Ditrypanocystis cirratuli</i> [Sporozoa, Archigregarinida] parasitic in <i>Cirratulus</i> <i>cirratulus</i> from Plymouth . . . . .	59
G. W. BRYAN and EILEEN WARD. The absorption and loss of radioactive and non-radioactive manganese by the lobster, <i>Homarus vulgaris</i> . . . . .	65
G. W. BRYAN. Ionic regulation in the squat lobster <i>Galathea squamifera</i> , with special refer- ence to the relationship between potassium metabolism and the accumulation of radio- active caesium . . . . .	97
L. J. WALLEY. The development and function of the oviducal gland in <i>Balanus balanoides</i> .	115
JOANNA M. KAIN (MRS N. S. JONES). Aspects of the biology of <i>Laminaria hyperborea</i> . IV. Growth of early sporophytes . . . . .	129
S. K. ELTRINGHAM. The respiration of <i>Limnoria</i> [Isopoda] in relation to salinity . . . .	145
R. HAMOND. On some amphipods from the coast of Norfolk . . . . .	153
A. J. SOUTHWARD and D. J. CRISP. Activity rhythms of barnacles in relation to respiration and feeding . . . . .	161
C. T. MACER. The distribution of larval sand eels (Ammodytidae) in the Southern North Sea	187
J. S. ALEXANDROWICZ. The neurosecretory system of the vena cava in Cephalopoda. II. <i>Sepia</i> <i>officinalis</i> and <i>Octopus vulgaris</i> . . . . .	209
MARIA FELINSKA. Marine Ciliata from Plymouth: Peritricha, Vaginicolidae . . . . .	229
I. MANTON, D. G. RAYNS, H. Ettl and M. PARKE. Further observations on green flagellates with scaly flagella: the genus <i>Heteromastix</i> Korshikov . . . . .	241
G. BRINLEY WILLIAMS. Observations on the behaviour of the planulae larvae of <i>Clava</i> <i>squamata</i> . . . . .	257
J. M. GEE and G. BRINLEY WILLIAMS. Self- and cross-fertilization in <i>Spirorbis borealis</i> and <i>S. pagenstecheri</i> . . . . .	275
ABSTRACTS OF MEMOIRS . . . . .	287
BOOK REVIEWS . . . . .	290

The subscription price of the Journal to non-members of the Association is £11 a volume of three parts, post free, or \$35.00 in U.S.A., payable in advance. Subscriptions may be sent to any book-seller or to the Cambridge University Press, and in U.S.A. to the Cambridge University Press American Branch.
