# JOURNAL OF PLASMA PHYSICS

https://doi.org/10.1017/S0022377800012630 Published online by Cambridge University Press

JOURNAL OF PLASMA PHYSICS exists for the publication of experimental and theoretical research papers on plasma physics and its applications.

EDITOR

DR J. P. DOUGHERTY

*Department of Applied Mathematics and Theoretical Physics, University of Cambridge, Silver Street, Cambridge CB3 9EW, England*

ASSOCIATE EDITORS

PROF. D. BERSHADER

*Department of Aeronautics and Astronautics, Stanford University, Stanford, California, 94305, USA*

PROF. F. D. KAHN

*Department of Astronomy, University of Manchester, Manchester M13 9PL, England*

PROF. W. B. THOMPSON

*Department of Physics, University of California, La Jolla, California 92093, USA*

Authors wishing to have papers published in the JOURNAL should communicate them to any one of the persons named above, choosing one in their own country where possible.

Authors are urged to ensure that their papers are written clearly and attractively, in order that their work will be readily accessible to readers.

Manuscripts should be typed in double spacing on one side of the paper only, with references listed at the end in alphabetical order of authors. Drawings should be done in Indian ink on plain white or transparent paper, and should not be larger than 15 in. by 24 in. Lettering should be shown clearly in pencil for reproduction by the printer, and as far as possible information relating to a figure should be placed in the caption rather than on the figure. A typed list of captions should be provided at the end of the manuscript. Proofs of papers from overseas will usually be despatched to authors by airmail. There is no charge for publication. Authors are entitled to receive 50 offprints of a paper in the JOURNAL free of charge, and additional offprints can be purchased if ordered in advance.

*Copying*

This journal is registered with the Copyright Clearance Center, 21 Congress St., Salem, Mass. 01970. Organizations in the USA who are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of US copyright law) subject to payment to C.C.C of the per copy fee of $05.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0022-3778/85/2828-0001 $05.00.

*ISI Tear Service*, 3501 Market Street, Philadelphia, Pennsylvania 19104, USA, is authorized to supply single copies of separate articles for private use only.

*For all other use*, permission should be sought from Cambridge or the American Branch of Cambridge University Press.

JOURNAL OF PLASMA PHYSICS (ISSN 0022-3778) is published once every two months in February, April, June, August, October and December, by Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 2RU and 32 East 57th Street, New York, NY 10022.

Three parts form a volume. The subscription price (which includes postage) of volumes 37 and 38 (1987) is £86.00 net per volume (US $205.00 in the USA and Canada) for institutions; £44.00 (US $105.00) per volume for individuals. Single parts cost £30.00 each (US $72.00 in the USA and Canada) plus postage. All orders must be accompanied by payment.

Copies of the journal for subscribers in the United States of America and Canada are sent by air to New York to arrive with minimum delay.

Second class postage paid at New York, NY, and at additional mailing offices. *POSTMASTER*: send address changes in USA and Canada to Cambridge University Press, 32 East 57th Street, New York, NY 10022.

# CONTENTS TO VOLUME 38

## PART 1 AUGUST 1987

Generalized Budden resonance tunnelling, with application to linear conversion nearly parallel to magnetic field. E. MJØLHUS 1

Effect of toroidicity during lower-hybrid mode conversion. S. RIYOPOULOS and S. M. MAHAJAN 27

Ponderomotive force near cyclotron resonance. M. KONO and H. SANUKI 43

On the theory of electromagnetic waves and instabilities in multi-species weakly ionized plasmas in external d.c. electric field. B. S. MILIĆ and S. R. KRSTIĆ 53

Geometrical effects in X-mode scattering. N. BRETZ 79

A plasma-optical system modelled using particles. W. N. G. HITCHON 87

A new collisional relaxation model for small deviations from equilibrium. P. STUBBE 95

Non-relativistic thermal effects on parallel-propagating ion cyclotron waves. L. T. BALL 117

Some remarks on spontaneous magnetic field generation and the nonlinear dynamics of a Langmuir plasma. V. I. BEREZHIANI, D. D. TSKHAKAYA and G. AUER 139

Nonlinear stage of the modulational instability of a whistler wave. Part 1. V. I. KARPMAN and A. G. SHAGALOV 155

## PART 2 OCTOBER 1987

Fundamental plasma emission involving ion sound waves. I. H. CAIRNS 169

Second harmonic plasma emission involving ion sound waves. I. H. CAIRNS 179

Third and higher harmonic plasma emission due to Raman scattering. I. H. CAIRNS 199

Toroidal plasma configuration with anisotropic pressure. H. M. RIZK 209

Kinetic theory of the high-frequency part of the slow electromagnetic mode in weakly ionized gas-discharge argon plasma with inelastic collisions. V. J. ŽIGMAN and B. S. MILIĆ 223

Spectral characteristics of hydromagnetic waves in the magnetosphere. S. P. KUO, M. C. LEE and A. WOLFE 235

https://doi.org/10.1017/S0022377800012630 Published online by Cambridge University Press

On steady-state classical transport in collision-dominated toroidal systems. A. H. ØIEN 245

Containment forces in low energy states of plasmoids. D. R. WELLS and L. C. HAWKINS 263

Asymptotic approximation for the dispersion relation of a hot magnetized plasma. A. BRAVO-ORTEGA, D. G. SWANSON and A. H. GLASSER 275

A general solution condition for collisionless sheaths. G. L. MAIN and S. H. LAM 287

A physical model of parallel whistler-mode propagation in a weakly relativistic plasma. S. S. SAZHIN 301

Dynamics of kink instability in a non-uniform magnetoplasma. R. BHARUTHRAM and P. K. SHUKLA 309

Fokker-Planck calculations on heat flow in plasmas. S. JORNA and L. WOOD 317

PART 3 DECEMBER 1987

Particle paths and phase plane for time-dependent similarity solutions of the one-dimensional Vlasov–Maxwell equations. D. A. ROBERTS and B. ABRAHAM-SHRAUNER 335

Kinetic and transport theory for a non-neutral plasma taking account of strong gyration and non-uniformities on the collisional scale. A. H. ØIEN 351

Nonlinear regular structures of drift magneto-acoustic waves. G. D. ABURDZHANIYA, V. P. LAKHIN and A. B. MIKHAILOVSKII 373

Dispersion ion-drift hydrodynamics. V. P. LAKHIN, S. V. MAKURIN, A. B. MIKHAILOVSKII and O. G. ONISHCHENKO 387

Vortices of ion-drift and related waves. V. P. LAKHIN, S. V. MAKURIN, A. B. MIKHAILOVSKII and O. G. ONISHCHENKO 407

Envelope solitons of surface waves in a plasma column. D. GROZEV, A. SHIVAROVA and A. D. BOARDMAN 427

A two-dimensional ion acoustic solitary wave in a weakly relativistic plasma. Y. NEJOH 439

Observation of three-half harmonic radiation from plasmas irradiated by a 0·26 $\mu$m wavelength laser. C. LABAUNE, E. FABRE and G. BONNAUD 445

Nonlinear excitation of slow shear Alfvén mode by electromagnetic waves. H. SALEEM 453

https://doi.org/10.1017/S0022377800012630 Published online by Cambridge University Press

Observations of large-amplitude ion acoustic solitary waves in a plasma. Y. NAKAMURA 461

Temporal evolution of reactive and resistive nonlinear instabilities. D. B. MELROSE 473

Probability-maximization theory for a highly turbulent beam–plasma system. T. NAKAMURA and T. YAMAMOTO 483

Stability of short-axial-wavelength internal kink modes of an anisotropic plasma. M. FAGHIHI and J. SCHEFFEL 495

AUTHOR INDEX TO VOLUME 38 501

https://doi.org/10.1017/S0022377800012630 Published online by Cambridge University Press
