ALS IN THE NAVY

The Departments of Veterans Affairs and National Defense have funded a study on the possible association between work in the navy and the subsequent development of amyotrophic lateral sclerosis.

The study requires a nationwide sample of all ALS patients, living and deceased, diagnosed between (and including) the years of 1950 and 1988.

The study team greatly appreciates support from all neurologists in providing the names, ages and addresses of all such patients.

Information should be sent to:
