

ADVANCES IN APPLIED PROBABILITY

INCLUDING A SECTION ON
STOCHASTIC GEOMETRY AND
STATISTICAL APPLICATIONS

VOLUME 35

NUMBER 3

SEPTEMBER 2003

EDITOR-IN-CHIEF C. C. HEYDE

FOUNDING EDITOR (1964–1989) J. GANI

Advances in Applied Probability

This is a companion publication to the *Journal of Applied Probability* published by the Applied Probability Trust. It contains reviews and expository papers in applied probability, as well as mathematical and scientific papers of interest to probabilists, letters to the editor and a section devoted to stochastic geometry and statistical applications (SGSA). An annual volume of up to 1200 pages is published in four issues appearing in March, June, September and December.

EDITORIAL BOARD

- Editor-in-Chief* C. C. HEYDE (Columbia University and Australian National University)
- Coordinating Editors* N. H. BINGHAM (Brunel University)
M. F. NEUTS (University of Arizona)
E. B. VEDEL JENSEN SGSA (Aarhus Universitet)
- Editors* R. J. ADLER (Technion, Haifa)
R. AMBARTZUMIAN SGSA (National Academy of Sciences of Armenia)
A. J. BADDELEY SGSA (University of Western Australia)
P. BRÉMAUD (ENS, Paris, and EPFL, Lausanne)
C. CANNINGS (University of Sheffield)
E. ÇINLAR (Princeton University)
R. COWAN SGSA (University of Sydney)
D. J. DALEY (Australian National University)
P. J. DONNELLY (University of Oxford)
P. EMBRECHTS (ETH, Zürich)
A. HORDIJK (Universiteit Leiden)
P. JAGERS (Chalmers University of Technology and Göteborgs Universitet)
S. JANSON (Uppsala Universitet)
W. S. KENDALL SGSA (University of Warwick)
G. KERSTING (Johann Wolfgang Goethe-Universität, Frankfurt am Main)
J. F. C. KINGMAN (Isaac Newton Institute, Cambridge)
C. KLÜPPELBERG (Technische Universität München)
T. MIKOSCH (Københavns Universitet)
S. I. RESNICK (Cornell University)
L. C. G. ROGERS (University of Cambridge)
D. STOYAN SGSA (Bergakademie Freiberg)
J. L. TEUGELS (Katholieke Universiteit Leuven)
D. VERE-JONES SGSA (Victoria University of Wellington)
R. A. VITALE SGSA (University of Connecticut)
R. R. WEBER (University of Cambridge)
W. WEIL SGSA (Universität Karlsruhe)
W. WHITT (Columbia University)

EDITORIAL OFFICE

- Executive Editor* L. J. NASH (University of Sheffield)
Production Editor D. A. CRUICKSHANK (University of Sheffield)

All correspondence relating to the submission of papers should be sent to: The Executive Editor, Applied Probability, School of Mathematics and Statistics, University of Sheffield, Sheffield S3 7RH, UK. Subscription rates and notes for contributors are to be found on the inside back cover.

FORTHCOMING PAPERS
ADVANCES IN APPLIED PROBABILITY

Stochastic Geometry and Statistical Applications

BARTLOMIEJ BŁASZCZYŚZYN AND RENÉ SCHOTT. Approximate decomposition of some modulated-Poisson Voronoi tessellations

PIERRE CALKA. An explicit expression for the distribution of the number of sides of the typical Poisson–Voronoi cell

MARCO DALL’AGLIO AND MARCO SCARSINI. Zonoids, linear dependence, and size-biased distributions on the simplex

ALFRED KUME AND HUILING LE. On Fréchet means in simplex shape spaces

ILYA MOCHANOV AND VADIM SCHERBAKOV. Coverage of the whole space

TOMASZ SCHREIBER. Asymptotic geometry of high density smooth-grained Boolean models in bounded domains

SANDEEP R. SHAH. A note on stochastic domination and conditional thinning

General Applied Probability

ATTAHIRU SULE ALFA. Algorithmic analysis of the BMAP/D/k system in discrete time

DANIEL BEREND AND LUBA SAPIR. Between the expert and majority rules

V. ČEKANA VIČIUS. Infinitely divisible approximations for discrete nonlattice variables

HANS-OTTO GEORGII AND ELLEN BAAKE. Supercritical multitype branching processes: the ancestral types of typical individuals

ANDREW G. HART, SERVET MARTÍNEZ AND JAIME SAN MARTÍN. The λ -classification of continuous-time birth-and-death processes

BERND HEIDERGOTT AND ARIE HORDIJK. Taylor series expansions for stationary Markov chains

ULRICH HORST. Stability of linear stochastic difference equations in strategically controlled random environments

AMAURY LAMBERT. Coalescence times for the branching process

S. LEORATO, E. ORSINGHER AND M. SCARVINO. An alternating motion with stops and the related planar, cyclic motion with four directions

J.-P. RAOULT AND R. WORMS. Rate of convergence for the generalized Pareto approximation of the excesses

JOHAN SEGERS. Functionals of clusters of extremes
