INDEX FOR VOLUME 119

PAGE

Berrick, A. J. & Tan, G. C. The minimal extension of P-localization on groups . . . 243

Bray, J. N., Curtis, R. T. & Hammas, A. M. A. A systematic approach to symmetric presentations I. Involuntary generators 23

Brown, B. M., Evans, W. D. & Ismail, M. E. H. The Askey–Wilson polynomials and q-Sturm–Liouville problems 1

Brown, G., Koumandos, S. & Wang, K.-Y. Positivity of more Jacobi polynomial sums . 681

Bshouty, D., Hengartner, W. & Hossian, O. Harmonic typically real mappings . . 673

Bunce, L. J. & Hamhalter, J. Extension of Jauch–Piron states on Jordan algebras . . 279

Cariñena, J. F. & Martínez, E. Geometric characterization of linearisable second-order differential equations 373

Ciach, L. J., Jajte, R. & Paszkiewicz, A. On the almost sure approximation of self-adjoint operators in $L_2(0, 1)$ 537

Cochran, T. D. Non-trivial links and plats with trivial Gassner matrices 43

Collins, D. J. & Turner, E. C. All automorphisms of free groups with maximal rank fixed subgroups 615

Cromwell, P. R. & Nutt, I. J. Embedding knots and links in an open book II: Bounds on arc index 309

Curtis, R. T., Hammas, A. M. A. & Bray, J. N. A systematic approach to symmetric presentations I. Involuntary generators 23

Dimov, G. D. & Tironi, G. Compactifications and A-compactifications of frames. Proximal frames 321

Doty, S. & Walker, G. Truncated symmetric powers and modular representations GL_n . 231

Dyakonov, K. M. On the zeros and Fourier transforms of entire functions in the Paley–Wiener space 357

Evans, W. D., Ismail, M. E. H. & Brown, B. M. The Askey–Wilson polynomials and q-Sturm–Liouville problems 1

Falconer, K. J. & Howroyd, J. D. Projection theorems for box and packing dimensions . 287

Falconer, K. J. & Mattila, P. The packing dimension of projections and sections of measures 695

Farhadi, H.-R. Isomorphisms between the second duals of group algebras of locally compact groups 657

Ferleger, S. V. & Sukochev, F. A. On the contractibility to a point of the linear groups of non-commutative L^p-spaces 545

Greenberg, P. Marked homeomorphisms and the realization problem 575

Hamhalter, J. & Bunce, L. J. Extension of Jauch–Piron states on Jordan algebras . . 279

Hammas, A. M. A., Bray, J. N. & Curtis, R. T. A systematic approach to symmetric presentations I. Involuntary generators 23

Hatcher, A. & Oertel, U. Full laminations in 3-manifolds 73

Hengartner, W., Bshouty, D. & Hossian, O. Harmonic typically real mappings . . 673

Hitczenko, P. & Montgomery-Smith, S. J. Tangent sequences in Orlicz and rearrangement invariant spaces 91

Hossian, O., Hengartner, W. & Bshouty, D. Harmonic typically real mappings . . 673

Howroyd, J. D. On Hausdorff and packing dimension of product spaces 715

Howroyd, J. D. & Falconer, K. J. Projection theorems for box and packing dimensions . 287

Huxley, M. N. & Trifonov, O. The square-full numbers in an interval 201

https://doi.org/10.1017/S0305004100074430 Published online by Cambridge University Press

Ismail, M. E. H., Brown, B. M. & Evans, W. D. The Askey–Wilson polynomials and q-Sturm–Liouville problems 1

Jajte, R., Paszkiewicz, A. & Ciach, L. J. On the almost sure approximation of self-adjoint operators in $L_2(0,1)$ 537

Jakubec, S. Congruence of Ankeny–Artin–Chowla type for cyclic fields of prime degree l . 17

Jiang, J. F. Sublinear discrete-time order-preserving dynamical systems 561

Joyal, A., Street, R. & Verity, D. Traced monoidal categories 447

Kaniuth, E. Minimal primal ideal spaces and norms of inner derivations of tensor products of C^*-algebras. 297

Katsoulis, E. G. Reflexivity for a class of subspace lattices. 67

Kirby, D. & Rees, D. Multiplicities in graded rings II: integral equivalence and the Buchsbaum–Rim multiplicity 425

Koskela, P. Normal solutions of elliptic equations 363

Koumandos, S., Wang, K.-Y. & Brown, G. Positivity of more Jacobi polynomial sums . 681

Kwasik, S. & Schultz, R. Fundamental groups of 4-manifolds with circle actions . . 645

Lapidus, M. L. & Pomerance, C. Counterexamples to the modified Weyl–Berry conjecture on fractal drums 167

Le Merdy, C. Representation of a quotient of a subalgebra of $B(X)$ 83

Lee, C.-N. Farrell cohomology and centralizers of elementary Abelian p-subgroups . . 403

Luft, E. On 2-dimensional aspherical complexes and a problem of J. H. C. Whitehead . 493

Majid, S. & Markl, M. Glueing operation for R-matrices, quantum groups and link-invariants of Hecke type 139

Marar, W. L. & Tari, F. On the geometry of simple germs of co-rank 1 maps from $\mathbb{R}^3$ to $\mathbb{R}^3$ 469

Markl, M. & Majid, S. Glueing operation for R-matrices, quantum groups and link-invariants of Hecke type 139

Martínez, E. & Cariñena, J. F. Geometric characterization of linearisable second-order differential equations 373

Martino, J. & Priddy, S. Unstable homotypy classification of $BG_{\hat{p}}$ 119

Mattila, P. & Falconer, K. J. The packing dimension of projections and sections of measures 695

Montgomery-Smith, S. J. & Hitczenko, P. Tangent sequences in Orlicz and rearrangement invariant spaces 91

Morimoto, K., Sakuma, M. & Yokota, Y. Examples of tunnel number one knots which have the property '1+1 = 3'. 113

Ng, C.-K. Discrete coactions on Hilbert C*-modules 103

Nutt, I. J. & Cromwell, P. R. Embedding knots and links in an open book II: Bounds on arc index 309

Oertel, U. & Hatcher, A. Full laminations in 3-manifolds 73

Ogi, H. On ground states for CCR algebras and Bogoliubov automorphism groups . . 419

Paszkiewicz, A., Ciach, L. J. & Jajte, R. On the almost sure approximation of self-adjoint operators in $L_2(0,1)$ 537

Peller, V. V. & Young, N. J. Superoptimal approximation by meromorphic functions . 497

Pomerance, C. & Lapidus, M. L. Counterexamples to the modified Weyl–Berry conjecture on fractal drums 167

Powell, G. M. L. Attaching cells to finite complexes, with an application to elliptic spaces 483

Priddy, S. & Martino, J. Unstable homotopy classification of $BG_{\hat{p}}$ 119

Rees, D. & Kirby, D. Multiplicities in graded rings II: integral equivalence and the Buchsbaum–Rim multiplicity. 425

Rein, G. Cosmological solutions of the Vlasov–Einstein system with spherical, plane, and hyperbolic symmetry 739

Richards, M. J. Some decomposition numbers for Hecke algebras of general linear groups. 383

Rippon, P. J. Towards a higher-dimensional MacLane class. 665
Rocha, A. C. Meromorphic extension of the Selberg zeta function for Kleinian groups via thermodynamic formalism 179
Ryba, A. J. E. A natural invariant algebra for the Harada–Norton group 597
Sakuma, M., Yokota, Y. & Morimoto, K. Examples of tunnel number one knots which have the property '1+1 = 3'. 113
Schultz, R. & Kwasik, S. Fundamental groups of 4-manifolds with circle actions . . 645
Stallard, G. M. The Hausdorff dimension of Julia sets of entire functions II . . . 513
Street, R., Verity, D. & Joyal, A. Traced monoidal categories 447
Sukochev, F. A. & Ferleger, S. V. On the contractibility to a point of the linear groups of non-commutative L^p-spaces 545
Tan, G. C. & Berrick, A. J. The minimal extension of P-localization on groups. . . 243
Tari, F. & Marar, W. L. On the geometry of simple germs of co-rank 1 maps from $\mathbb{R}^3$ to $\mathbb{R}^3$ 469
Taylor, M. J. The trace form for tame, abelian extensions of number fields . . . 209
Tironi, G. & Dimov, G. D. Compactifications and A-compactifications of frames. Proximal frames 321
Trifonov, O. & Huxley, M. N. The square-full numbers in an interval 201
Truss, J. K. Betweenness relations and cycle-free partial orders 631
Turner, E. C. & Collins, D. J. All automorphisms of free groups with maximal rank fixed subgroups 615
Valdés, A. Differential invariants of $\mathbb{R}^*$-structures 341
Verity, D., Joyal, A. & Street, R. Traced monoidal categories 447
Walker, G. & Doty, S. Truncated symmetric powers and modular representations of GL_n 231
Wall, C. T. C. Highly singular quintic curves 257
Wang, K.-Y., Brown, G. & Koumandos, S. Positivity of more Jacobi polynomial sums . 681
Werner, W. Beurling's projection theorem via one-dimensional Brownian motion . . 729
Willerton, S. Vassiliev invariants and the Hopf algebra of chord diagrams. 55
Wójcik, J. On a problem in algebraic number theory 191
Yagita, N. Note on the spectral sequence converging to cohomology of an extra special p-group for odd prime p. 35
Yokota, Y., Morimoto, K. & Sakuma, M. Examples of tunnel number one knots which have the property '1+1 = 3'. 113
Young, N. J. & Peller, V. V. Superoptimal approximation by meromorphic functions . 497

THE PREPARATION OF MANUSCRIPTS

The attention of authors is particularly directed to the following requests.

1. Papers should be typed, double-spaced, on one side of white paper (of which A4, 210 by 297 mm, is a suitable size). The pages must be numbered. Margins of 30 mm should be left at the side, top and bottom of each page. Two clear copies should be sent.

A cover page should give the title, the author's name and institution, with the address to which mail should be sent.

The title, while brief, must be informative (e.g. *A new proof of the prime-number theorem*, whereas *Some applications of a theorem of G. H. Hardy* would be useless).

The first paragraph or two should form a summary of the main theme of the paper, providing an abstract intelligible to mathematicians.

For a typescript to be accepted for publication, it must accord with the standard requirements of publishers, and be presented in a form in which the author's intentions regarding symbols etc. are clear to a printer (who is not a mathematician).

The following notes are intended to help the author in preparing the typescript. New authors may well enlist the help of senior colleagues, both as to the substance of their work and the details of setting it out correctly and attractively.

2. *Notation*

Notation should be chosen carefully so that mathematical operations are expressed with all possible neatness, to lighten the task of the compositor and to reduce the chance of error.

For instance n_k (n sub k) is common usage, but avoid if possible using c sub n sub k. Fractions are generally best expressed by a solidus. Complicated exponentials like

$$\exp\{z^2 \sin\theta/(1+y^2)\}$$

should be shown in this and no other way.

In the manuscript, italics, small capitals and capitals are specified by single, double and triple underlinings. Bold faced type is shown by wavy underlining; wavy will be printed **wavy**.

It helps if displayed equations or statements which will be quoted later are numbered in order on the right of their line. They can then be referred to by, for example, 'from (7)'.

The author must enable the printer (if necessary by pencilled notes in the margin) to distinguish between similar symbols such as o, O, o, O, 0; x, X, $\times$; ϕ, Φ, $\varnothing$; l, 1; $\hat{\mathrm{A}}$, $\in$; $\hat{\mathrm{I}}$, k.

Greek letters can be denoted by Gk in the margin.

If an author wishes to mark the end of the proof of a theorem, the sign ∎ may be used.

Footnotes should be avoided.

3. *Diagrams*

It is extremely helpful if diagrams are drawn in Indian ink on white card, faintly blue or green-lined graph paper, or tracing cloth or paper. *Symbols, legends and captions should be given on a transparent overlay.* Each text figure must be numbered as Figure 1, Figure 2, ... and its intended position clearly indicated in the manuscript:

Figure 1 here

The author's name in pencil must be on all separate sheets of diagrams.

A figure is expensive to reproduce and should be included only when the subject matter demands it, or when it greatly clarifies the exposition.

The Society recognizes that some authors do not have the facilities for producing drawings of a sufficiently high standard to be reproduced directly and it is therefore willing to have such diagrams redrawn, provided that they are clear.

4. *Tables*

Tables should be numbered (above the table) and set out on separate sheets. Indicate the position of each in the text as for figures:

Table 3 here

5. *References*

References should be collected at the end of the paper numbered in alphabetical order of the authors' names. Titles of journals should be abbreviated as in *Mathematical Reviews*. The following examples show the preferred style for references to a paper in a journal, a paper in a proceedings volume, a book and an unpublished dissertation:

[1] J. F. Adams. On the non-existence of elements of Hopf invariant one. *Ann. of Math.* (2) **72** (1960), 20–104.

[2] M. P. Fourman and D. S. Scott. Sheaves and logic. In *Applications of Sheaves*, Lecture Notes in Math. vol. 753 (Springer-Verlag, 1979), pp. 302–401.

[3] P. T. Johnstone. *Stone Spaces*. Cambridge Studies in Advanced Math. no. 3 (Cambridge University Press, 1982).

[4] F. W. Lawvere. Functorial semantics of algebraic theories. Ph.D. thesis. Columbia University (1963).
