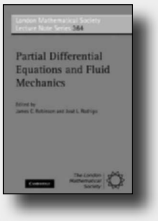
CAMBRIDGE

Fantastic New and Forthcoming Titles from Cambridge!

Waves and Mean Flows
Oliver Bühler
Cambridge Monographs on Mechanics
$99.00: Hb: 978-0-521-86636-1: 370 pp.

Partial Differential Equations and Fluid Mechanics
Edited by James C. Robinson and José L. Rodrigo
London Mathematical Society Lecture Note Series
$60.00: Pb: 978-0-521-12512-3: 270 pp.



Acta Numerica 2009
Volume 18
Arieh Iserles
Acta Numerica
$150.00: Hb: 978-0-521-19211-8: 352 pp.

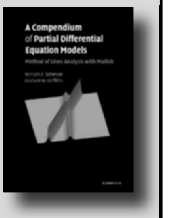
Non-linear Modeling and Analysis of Solids and Structures
Steen Krenk
$80.00: Hb: 978-0-521-83054-6: 360 pp.

Now in Paperback!
Fundamentals of Multiphase Flow
Christopher Brennen
$65.00: Pb: 978-0-521-13998-4: 368 pp.

Introduction to Computational Fluid Dynamics
Anil Date
$65.00: Pb: 978-0-521-14005-8: 398 pp.

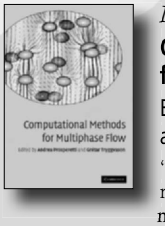
Ocean Engineering Mechanics
With Applications
Michael E. McCormick
$125.00: Hb: 978-0-521-85952-3: 550 pp.

A Compendium of Partial Differential Equation Models
Method of Lines Analysis with Matlab
William E. Schiesser and Graham W. Griffiths
$99.00: Hb: 978-0-521-51986-1: 490 pp.



Now in Paperback!
Measurement in Fluid Mechanics
Stavros Tavoularis

"…Professor Tavoularis's excellent book, … succeeds in bringing clarity and sense to the whole issue of experiments in fluid mechanics. This is a book that can be recommended to anyone working in fluid mechanics. On a basic level it provides a ready reference for the essential workings of the main experimental measurement processes that are so often referred to in the literature but which are rarely given sufficient explanation…this book can [also] be used in a much more advanced way to plan an entire experimental programme."
–Journal of Fluid Mechanics
$55.00: Pb: 978-0-521-13839-0: 368 pp.



Now in Paperback!
Computational Methods for Multiphase Flow
Edited by Andrea Prosperetti and Grétar Tryggvason
"This book was written by world-leading experts with much first-hand experience, which makes the book even more valuable. Its goal is undoubtedly well fulfilled. I highly recommend this volume to those readers who wish to acquaint themselves with computational methods for multiphase flow."
–Journal of Fluid Mechanics
$58.00: Pb: 978-0-521-13861-1: 488 pp.

Journal of Fluid Mechanics

25 Oct. 2009

1 On some consequences of the canonical transformation in the Hamiltonian theory of water waves
P. A. E. M. Janssen

45 The breaking of interfacial waves at a submerged bathymetric ridge
E. L. Hult, C. D. Troy & J. R. Koseff

73 Experimental study of flow separation in laminar falling liquid films
G. F. Dietze, F. Al-Sibai & R. Kneer

105 Flow organization in two-dimensional non-Oberbeck–Boussinesq Rayleigh–Bénard convection in water
K. Sugiyama, E. Calzavarini, S. Grossmann & D. Lohse

137 Damping mechanisms of internal waves in continuously stratified rotating basins
K. Shimizu & J. Imberger

173 Low-frequency sound radiated by a nonlinearly modulated wavepacket of helical modes on a subsonic circular jet
X. Wu & P. Huerre

213 On the asymptotic behaviour of large-scale turbulence in homogeneous shear flow
J. C. Isaza & L. R. Collins

241 The effects of hindered mobility and depletion of particles in near-wall shear flows and the implications for nanovelocimetry
P. Huang, J. S. Guasto & K. S. Breuer

267 Freak wave statistics on collinear currents
K. B. Hjelmervik & K. Trulsen

285 Transient flow of a viscous incompressible fluid in a circular tube after a sudden point impulse
B. U. Felderhof

305 Time-dependent response of a heterogeneous elastic plate floating on shallow water of variable depth
I. V. Sturova

327 The equatorial counterpart of the quasi-geostrophic model
J. Theiss & A. R. Mohebalhojeh

357 Acoustic radiation from turbulent premixed flames
R. Rajaram & T. Lieuwen

387 Turbulence structure above a vegetation canopy
J. J. Finnigan, R. H. Shaw & E. G. Patton

425 Structure and decay of rotating homogeneous turbulence
M. Thiele & W.-C. Müller

443 Numerical simulation of viscous, nonlinear and progressive water waves
A. Raval, X. Wen & M. H. Smith

475 Erratum
