

Here's the disposable soap system you've asked for . . .

The Vestal Handwash System for the clean hands people

Easy to maintain.

Closed system for added safety.

Easy to use, gentle on hands.

Vestal's complete handwash system encourages frequent and effective handwashing.

Vestal Lotion Soap and Medicated Lotion Soap are gentle to your hands, but effective weapons in your fight against cross-infection.

When used with Vestal's Easy-Fill Dispenser, the cosmetic-quality lotion soaps are even more convenient. A simple pull dispenses the product from its throw-away container directly into your palm. And, it's a closed system for added protection from bacteria.

For a free analysis of how you can make best use of the Vestal Handwash System in *your* fight against cross-infection, fill in and mail the coupon below.

YES, I'd like to know more about the Vestal Handwash System. Please have my Vestal rep call me.

Speed reader.

Confirmatory tests for syphilis have been known to leave you in the dark. Besides being expensive, time-consuming, and subject to misinterpretation, the FTA-ABS method lets you set up and read only one test at a time.

Enlighten yourself. Sera-Tek Treponemal Antibody Test (MHA-TP) from Ames is an easy-to-perform, easy-to-read confirmatory test for syphilis—specific for *Treponema pallidum*. With the micro-hemagglutination technique, you can set up all your tests at once and read the results rapidly on one multiwell plate. You'll get accurate, objective results... less chance of error from misinterpretation. And with MHA-TP, you can do more tests a day at a lower cost.

For more information, contact your Ames representative or write: Ames Division, Miles Laboratories, Inc., P.O. Box 70, Elkhart, IN 46515.

Kendall has discovered a way to control UTI.

That's right, movies. Three of them. Produced by Kendall. And widely acclaimed by the nursing profession as one of the most comprehensive and useful film series ever developed for the purpose of teaching UTI control practices.

A unique, in-service training tool, the series deals—in-depth and realistically—with the prin-

ciples and techniques for catheterization and catheter care.

And movies are just one example of Kendall's total approach to the control of the most common and persistent of all nosocomial infections.

Our CURITY Urological Products are among the most innovative on the market. From individual catheters and

Movies.

drainage bags to complete closed system catheterization trays and urine meters, they're engineered to guard against UTI.

Of course, products are only as good as the people who use them, and that's where your Kendall representatives come in. Available to you on a three-shift basis, they're trained to provide

your nursing staff with professional instruction on the use of Kendall urological products and on overall catheter care.

And since people and products are most effective when they're part of an overall coordinated effort, we've developed that, too:

People and Products:
A unique new program that takes a nursing

process approach to UTI control. Assessment, planning, implementation and evaluation—four familiar steps toward better patient care.

For more information about the various ways we're helping hospitals reduce the incidence of UTI, contact your Kendall representative. Or write The Kendall Company, Hospital Prod-

ucts, One Federal Street, Boston, MA 02101, Attn: Marketing Services.

You'll find that where UTI control is concerned, we present a total picture.

EXCLUSIVE BREAKTHROUGH IN DISINFECTION

New two-minute
effectiveness test kit
...designed specifically for

Cidex^{aqueous formula}7*

long-life activated dialdehyde solution

CIDEX FORMULA 7* Solution stands on a proud record of safety and scientific acclaim. Now the Effectiveness Test Kit adds a new dimension of safety. Because no matter what solution you use, inadvertent dilution can occur. This simple, two-minute test pushes

medical technology ahead in the same way that spore strips did for ETO and steam. You'll want the Effectiveness Test Kit as a routine link in your total patient care system. The Effectiveness Test Kit — one more reason why SURGIKOS sets the pace in hospital asepsis.
