## **ENGAGING THE PAST**

**The Uses of History  
across the Social Sciences**

Eric H. Monkkonen, editor

“The past twenty-five years have witnessed a remarkable upsurge of historical research—and historical thinking—across the social sciences, transforming knowledge about phenomena ranging from capitalist development, to welfare states, to professions and organizations.

The essays collected here range from the comprehensive to the quirky. They chart many of the rich insights of historical social science, and display the challenges and limits of interdisciplinary dialogue. Students and teachers alike will find this collection a vital resource, as they chart new frontiers for theory and investigation.” —Theda Skocpol, Harvard University

Originally published as a series of articles in the journal *Social Science History*, the essays in this volume provide a guide to historical social science by surveying the use of historical data and methodologies in anthropology, sociology, political science, economics, and geography.

**REMAKING  
AMERICA**

Public Memory, Commemoration, and  
Patriotism in the Twentieth Century

**JOHN BODNAR**

In a compelling inquiry into public events ranging from the building of the Vietnam Veterans Memorial through ethnic community fairs to pioneer celebrations, John Bodnar explores the stories, ideas, and symbols behind American commemorations over the last century. Such forms of historical consciousness, he argues, do not necessarily preserve the past but rather address serious political matters in the present.

**"Bodnar has made an insightful contribution to a lively area of contemporary cultural studies.... Anyone interested in the social meaning of public ceremonials will want to come to terms with this thoughtful book."**—Paul Boyer, *American Historical Review*

**PRICING THE PRICELESS CHILD**

The Changing Social Value of Children

**VIVIANA A. ZELIZER**

In this landmark book, Viviana Zelizer traces the emergence of the modern child, at once economically "useless" and emotionally "priceless," from the late 1800s to the 1930s. A vivid account of changing attitudes toward children, this book dramatically illustrates the limits of economic views of life that ignore the pervasive role of social, cultural, emotional, and moral factors in our marketplace world.

**"[Zelizer's book] is an imaginative work on an important topic, which will surely find an appreciative audience among historians."**
