Special sales and supplements

This journal accepts advertising and inserts. We also provide bulk reprints of suitable papers to meet teaching or promotional requirements. The journal also publishes supplementary material including conference proceedings on behalf of academic and corporate sponsors. Please contact Sarah Maddox at Cambridge University Press for further details (email: smaddox@cambridge.org).

Subscription information

Public Health Nutrition is an international journal published 18 times per year by Cambridge University Press on behalf of the Nutrition Society. The online edition is available at journals.cambridge.org/PHN, with free table of contents alert (upon registration).

Annual subscription rates

Volume 19, 2016 (18 issues):
Internet/print package: £1340/\$2570 Americas only/€2147 EU only
Internet only: £970/\$1840 Americas only/€1542 EU only

Any supplements to this journal published in the course of the annual volume are normally supplied to subscribers at no extra charge.

Claims for non-receipt of journal issues will be considered on their merit and only if the claim is received within six months of publication. Replacement copies supplied after this date will be chargeable.

Advertising: The Nutrition Society is willing to include advertisements in its journals. However, it will retain the right to make decisions on which advertisements are acceptable and

which are not, and will not be obliged to give reasons to prospective advertisers for its decisions. The appearance of an advertisement in the Society's journals does not imply endorsement by the Society. For further details, please contact Cambridge University Press.

Back volumes will be available in due course. Please contact Cambridge University Press for further information.

US POSTMASTERS: Please send address corrections to

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests. Please see www.fsc.org for information. Typeset by Macmillan India Limited, Bangalore, India and Printed in Europe by Bell and Bain, Glasgow.

Public Health Nutrition is covered in Science Citation Index Expanded (Web of Science), Current Contents, Agriculture, Biology & Environmental Sciences, Current Contents, Clinical Medicine, CAB ABSTRACTS[®], Global Health, Index Medicus[®] (MEDLINE[®]), EMBASE, Excerpta Medica, BIOSIS[®] Database and CINAHL[®] Database
Public Health Nutrition participates in the following initiatives: HINARI by WHO and AGORA by FAO.

Public Health Nutrition (PHN) provides a forum for the presentation of original research findings and high quality reviews of key topics, and for discussion of and debate on of current issues and controversies. It also publishes special issues on major topics of interest. Our field includes research, scholarship, and discussions on public health nutrition, that take a population, health promoting and preventive approach. Papers that do not have this emphasis may be directed to more appropriate journals. Potential contributors are encouraged to read the aims and scope of the journal, and to note and follow the guidelines set out below.

Content:

- **Original research findings and scientific reviews** are published as full papers usually less than 5000 words, not including the abstract, references, tables, figures and acknowledgements.
- **Editorials** express the opinion of the journal, as represented by its central editorial team, on topics judged by them to be important. Editorials, including guest editorials, are usually co-ordinated and developed by the editorial team.
- **Position papers**, including declarations and other statements of policy, may be invited or unsolicited.
- **Invited commentaries and book reviews** are expressions of opinion on a topical subject. These are commissioned by the members of the editorial team.
- **Letters to the Editors** are usually in response to material published in *PHN*. Submissions are sent to the author for comment and, when possible, published together with the author's reply.

Submission: PHN operates an online submission and reviewing system. All manuscripts should be submitted to <http://mc.manuscriptcentral.com/phnutr>. Please contact the Editorial Office on phn.edoffice@cambridge.org regarding any other types of submission.

Refereeing: Review articles and articles reporting original research are subject to external review by two or more referees who evaluate manuscripts based on their importance, relevance, and originality. Authors are asked to submit names and contact details (including email address) of up to four potential referees. All other contributions (editorials, position papers, invited commentaries, book reviews, and letters to the Editors) undergo an internal review process by at least two members of the editorial team. Invited commentaries and book reviews may also be checked externally as necessary to avoid technical errors and to improve salience.

Copyright: At the time of acceptance, authors will be asked to provide a completed copy of the 'Licence to Publish' (in lieu of copyright transfer), available at <https://www.nutritionociety.org/>. It is the author's responsibility to obtain written permission to reproduce any material (including text and figures) that has appeared in another publication.

Preparation of manuscripts: Please refer to the full Directions to Contributors on our website (<http://www.nutritionociety.org>). Manuscripts should be in clear and concise English, and spelling should follow the Oxford English Dictionary. For authors whose native tongue is not English, in-house editorial attention to their contributions will improve clarity. On acceptance, all contributions are subject to editorial amendment to conform to house style. Manuscripts should be prepared in a common word processing package (Word for Windows is preferred) in Times New Roman or other common typeface, prepared with double-spaced text, at least 2 cm margins, and page and line numbers. Standard abbreviations and SI units must be used.

Disclosure of financial support and any competing interests:

The submission must include a statement within an Acknowledgements section reporting any competing interests, all sources of funding, and the nature of the contribution of each author to the manuscript. If there are no competing interests, this must be stated. Authors are asked to provide this information during the submission process and should not include it as part of the manuscript to allow for double-blind reviewing.

Arrangement of papers:

1. **Title page** should include the article title, author(s), affiliation(s), up to eight keywords, one author identified for correspondence (with full postal address, telephone and fax numbers, and email address), and a running title of up to 45 characters. The title page should be submitted online as a separate cover letter, not as part of the manuscript, to enable double-blind reviewing.
2. **Abstract** should be structured, usually using the following internal headings: Objective, Design, Setting, Subjects, Results, Conclusions. Abstracts should be intelligible without reference to text or figures and should not exceed 250 words.
3. **Text** should be divided under headings (typically to include Introduction, Methods, Results, Discussion and Conclusions), and sub-headings as appropriate. Conclusions should include recommendations that derive from the research and that are concrete, feasible, and potentially effective. Emphasising that more research is needed is usually not necessary unless there is specific reason to say so. All submissions must include a statement that the research was conducted in accordance with guidelines laid down by the Declaration of Helsinki and approved by an ethics review committee.
4. **Acknowledgements** (sources of funding, competing interests declaration, authorship responsibilities, acknowledgements) should be provided during the submission process, not as part of the manuscript.
5. **References** should be in Vancouver style. Please refer to the full Directions to Contributors.
6. **Tables** should be reduced to the simplest form and should not be used where text or figures give the same information. Each table must be accompanied by a clear and concise caption that is comprehensible without reference to the text. Longer tables may be published online only.
7. **Figures** should be numbered, and legends should be provided. Each figure, with its legend, should be comprehensible without reference to the text and include definitions of abbreviations.

Proofs: Correspondence and proofs for correction will be emailed to the first named author unless otherwise indicated. The author will receive a PDF proof for checking. It is important that proofs be returned promptly. Authors may be charged for any alterations in excess of 10% of original setting.

Offprints: The corresponding author will receive a PDF of the published paper free of charge. Offprints are available to purchase and must be ordered before publication.

Editorial

- On the pitfalls of disclosure statements
*M Tseng, A Hodge, C Lachat,
S Vandevijvere and E Villamor* 383

Monitoring and surveillance

- Stability and change in fruit and vegetable intake of Brazilian adolescents over a 3-year period: 1993 Pelotas Birth Cohort
R Buffarini, LC Muniz, AJD Barros, CL Araújo, H Gonçalves, AMB Menezes and MCF Assunção 386

- Daily intake of dairy products in Brazil and contributions to nutrient intakes: a cross-sectional study
MM Murphy, LM Barraj, LD Toth, LS Harkness and DR Bolster 393

- Nutrient profile of 23 596 packaged supermarket foods and non-alcoholic beverages in Australia and New Zealand
CN Mhurchu, R Brown, Y Jiang, H Eyles, E Dunford and B Neal 401

Assessment and methodology

- Controlled trials of vitamin D, causality and type 2 statistical error
O Gillie 409

- Vitamin D, causation, conflict of interest and other issues – CORRIGENDUM
O Gillie 415

- Vitamin D, causation, conflict of interest and other issues – CORRIGENDUM
O Gillie 417

- The prevalence of metabolic syndrome among low-income South Asian Americans
SA Khan and RT Jackson 418

- Evaluation of a novel biomarker of added sugar intake ($\delta^{13}C$) compared with self-reported added sugar intake and the Healthy Eating Index-2010 in a community-based, rural US sample
VE Hedrick, BM Davy, GA Wilburn, AH Jähren and JM Zoellner 429

- Validity of an FFQ assessing the vitamin D intake of young Serbian women living in a region without food fortification: the method of triads model
M Djekic-Ivankovic, HA Weiler, M Nikolic, A Kadvan, M Gurinovic, LM Mandic and M Glibetic 437

Behavioural nutrition

- Fast-food intake and perceived and objective measures of the local fast-food environment in adolescents
C Svastisalee, T P Pedersen, J Schipperijn, S E Jørgensen, BE Holstein and R Krøllner 446

- Weight concerns among adolescent boys
C Kelly, A Fitzgerald, M Sentenac, J Gakewski, M Molcho and S N Gabhainn 456

- Speed of eating and 3-year BMI change: a nationwide prospective study of mid-age women
SL Leong, A Gray and CC Horwath 463

Nutritional epidemiology

- Vitamin D status in pre-school children in rural Nepal
D Avagyan, SP Neupane, TE Gundersen and AA Madar 470

- The association between socio-economic position and diet quality in Australian adults
K Backholer, E Spencer, E Gearon, DJ Magliano, SA McNaughton, JE Shaw and A Peeters 477

- High cardiometabolic risk in healthy Chilean adolescents: associations with anthropometric, biological and lifestyle factors
R Burrows, P Correa-Burrows, M Reyes, E Blanco, C Albala and S Gahagan 486

- Intake of ruminant *trans*-fatty acids, assessed by diet history interview, and changes in measured body size, shape and composition
CP Hansen, BL Heitmann, TIA Sørensen, K Overvad and MU Jakobsen 494

- Calcium, vitamin D, casein and whey protein intakes and periodontitis among Danish adults
ARA Adegboye, BJ Boucher, J Kongstad, N-E Fiehn, LB Christensen and BL Heitmann 503

Economics and environment

- Unemployment and household food hardship in the economic recession
J Huang, Y Kim and J Birkenmaier 511

- Buying health: assessing the impact of a consumer-side vegetable subsidy on purchasing, consumption and waste
N Smith-Drelich 520

- Ultra-processed foods have the worst nutrient profile, yet they are the most available packaged products in a sample of New Zealand supermarkets
CM Luiten, IHM Steenhuis, H Eyles, CN Mhurchu and WE Waterlander 530

- Ultra-processed foods have the worst nutrient profile, yet they are the most available packaged products in a sample of New Zealand supermarkets – CORRIGENDUM
CM Luiten, IHM Steenhuis, H Eyles, CN Mhurchu and WE Waterlander 539

Community nutrition

- Differences in healthy food supply and stocking practices between small grocery stores, gas-marts, pharmacies and dollar stores
CE Caspi, JE Pelletier, L Harnack, DJ Erickson and MN Laska 540

- Perceptions relating to body size, weight loss and weight-loss interventions in black South African women: a qualitative study
CE Draper, KJ Davidowitz and JH Goedecke 548

Sustainability

- Consumption of fruits and vegetables and probabilistic assessment of the cumulative acute exposure to organophosphorus and carbamate pesticides of schoolchildren in Slovenia
U Blaznik, A Yngve, I Eržen and CH Ribič 557

Letters to the editor

- Comment on: 'Ultra-processed foods have the worst nutrient profile, yet they are the most available packaged products in a sample of New Zealand supermarkets' by Luiten *et al.*
K Rich 564

- Comment on Luiten *et al.*'s paper: 'Ultra-processed foods have the worst nutrient profile, yet they are the most available packaged products in a sample of New Zealand supermarkets'
D Mackerras 570

- Response to two Letters to the Editor: we maintain that ultra-processed supermarket foods are less healthy than their minimally processed counterparts
WE Waterlander, CM Luiten, H Eyles and IHM Steenhuis 571
