Conference on Reuse of Medical Devices

by **Gina Pugliese, RN, MS**
Medical News Editor

The Association for the Advancement of Medical Instrumentation is collaborating with a number of organizations to cosponsor a conference on "Designing, Testing, and Labeling Reusable Medical Devices for Reprocessing in Healthcare

Facilities" to be held April 9-10, 1996, in Washington DC. Cosponsoring organizations include the Health Industry Manufacturer Association, the Food and Drug Administration, American Medical Association, the Association for Professionals in Infection Control and Epidemiology, and the Association of Operating Room Nurses.

Conference topics will include reprocessing techniques, the perspective of technicians, an overview of standards and regulations, device design considerations, manufacturer responsibilities regarding reusable devices, and the future of reprocessing.

For more information, call (703) 625-4890, ext 260.
