

On Becoming Human

Nancy Tanner

Tanner presents a major new theory on the transition of our ancestors from ape-like beings into early hominids and develops a model of human origins which has several unusual features. She examines the roles of women and children during evolution, shows that the invention of food gathering was followed much later by hunting, and delineates the interaction of gathering, food sharing with offspring, and natural selection in a new environment in order to suggest the actual dynamics of the process of becoming human.

"Could well prove to be among the most stimulating and influential books in anthropology to be published over the past decade."—*F. Clark Howell, University of California, Berkeley* Hardcover \$29.95 Paper \$10.95

Mummies, Disease, and Ancient Cultures

Aidan and Eve Cockburn, Editors

Twenty-nine authorities in the field report from such places as Australia, Japan, the Aleutian Islands and Papua, New Guinea on the theoretical and experimental status of current knowledge concerning mummies, disease, and ancient cultures. Illustrations of preserved bodies are taken from around the world.

170 plates, 21 diagrams

Culture Contact and Culture Change

Early Iron Age Central Europe and the Mediterranean World

Peter S. Wells

Dr. Wells reviews the existing data, illustrates selected material, and develops a dynamic model for understanding the changes that resulted from the interaction between Early Iron Age Europe and the Greek and Etruscan societies to the south. His study illuminates the influence of the urban Mediterranean world and the evolution of Early Iron Age society and develops themes and a methodology for studying culture contact in archaeological contexts. *New Studies in Archaeology*

Stylistic Variation in Prehistoric Ceramics

Design Analysis in the American Southwest

Stephen Plog

Using archaeological data from the Chevelon Canyon area in east central Arizona, Professor Plog's seminal study questions the traditional archaeological interpretation of stylistic differences among the designs found on ceramic vessels at different prehistoric sites. He suggests that past methods of design classification or analysis are often inappropriate and demonstrates both the methodological and logical weaknesses in previous investigations.

STUDIES IN ARCHAEOLOGY SERIES

ROCK SHELTERS OF THE PERIGORD

Geological Stratigraphy and Archaeological Succession

By HENRI LAVILLE, JEAN-PHILIPPE RIGAUD and JAMES SACKETT

Concerns itself with the sedimentology and stratigraphy of Stone Age rock-shelter sites in the Perigord region of southwestern France—sites that have furnished the best documented archaeological sequence available from later Paleolithic times in Western Europe.

1980, 384 pp., \$29.50 ISBN: 0-12-438750-0

PARMANA

Prehistoric Maize and Manioc Subsistence along the Orinoco and Amazon Rivers

By ANNA CURTENIUS ROOSEVELT

This generously illustrated volume critically reviews ecological theories concerning aboriginal Amazonian cultural development.

1980, 336 pp., \$29.50 ISBN: 0-12-595350-X

NEW WORLD ARCHAEOLOGICAL RECORD SERIES

THE ARCHAEOLOGY OF NEW ENGLAND

By DEAN R. SNOW

Written both as a regional prehistory and a summary of current issues in New England prehistoric archaeology.

1980, 390 pp., \$32.50 ISBN: 0-12-653950-2

FLORIDA ARCHAEOLOGY

By JERALD T. MILANICH and CHARLES H. FAIRBANKS

Traces the evolution of the Florida aborigines from 10,000 B.C. to the 1750s and recounts the archaeology of the Florida Seminole Indians.

1980, 320 pp., \$19.50 ISBN: 0-12-495960-1

**Reading the isotopic clocks
If you need ^{14}C dates
come to the experts**

For the reliable data and custom service that your research demands, come to Teledyne Isotopes. Our labs have the staff, the equipment, the *experience* to handle all your research needs in radiocarbon and related analyses.

Reliability of data is assured through:

- Sample analysis done in modern, efficient labs
- Inter-calibration with major university and government labs
- Use of N.B.S. standards and other internationally recognized reference materials

For all your age determination needs, contact the *experienced* company . . .

47th ANNUAL MEETING SOCIETY FOR AMERICAN ARCHAEOLOGY

The Hotel Leamington
Minneapolis, Minnesota
Wednesday, April 14–Saturday, April 17, 1982

Annual Meeting Chairperson: Payson D. Sheets, Department of Anthropology, Campus Box 233, University of Colorado, Boulder, CO 80309

GUIDELINES FOR CONTRIBUTIONS

The Executive Committee has ruled that the privilege of presenting papers at the annual meeting of the Society will be restricted to paid-up members of the Society. The Committee further decided that a person may not deliver more than one paper although (s)he may, at the same meeting, chair a session or serve as joint author of a paper presented by someone else.

Completed symposia proposals, long and short abstracts of papers, abstracts of contributed papers and of research reports must reach the program chairperson by October 15, 1981. All proposals and abstracts should be submitted on appropriate SAA forms which may be acquired by writing the Program Chairperson. Long abstracts of contributed papers and symposium papers will be used for evaluation by the Program Committee. Authors of contributed papers and symposia organizers will be notified of the Program Committee's decision as soon as possible. Short abstracts of all papers and research reports accepted for presentation will be included in the final program.

SYMPOSIA (2-hour, 4-hour)

A symposium consists of a group of papers on a common theme. The symposium topic and the individual papers within it will be reviewed. Changes, such as consolidation of two symposia or changes in the individual papers, may be recommended.

Symposia suggestions, including title of symposium and name, address, and telephone number of the organizer(s), must be received by September 15, 1981. As soon as possible, organizer(s) should request copies of *Guidelines for Symposium Organizers*.

Complete symposia proposals must be submitted as a package by the symposium organizer(s) and must be received by October 15, 1981. The package should include for every paper presented in the symposium: *long abstracts* of no less than 300 and no more than 600 words, double-spaced in clean, typewritten form (5 copies); *short abstracts* of 100 words or less of each paper with author(s) name and institution, typewritten on separate pages in the style shown in the sample below (2 copies); *request for audiovisual equipment* (type of projector, blackboard, etc.).

CONTRIBUTED PAPERS (20 minutes)

Contributed papers are to be distinguished from Research Reports in that they generalize, synthesize, or compare and are addressed to problems of theory, method, culture history, or culture process. Contributed papers will be reviewed, and changes may be suggested.

Contributed papers must follow the same format as the symposia papers, including short abstracts (2 copies) and long abstracts (5 copies), as well as 3 suggestions as to topical and/or geographical area to which the paper may be assigned (e.g., Plains Archaeology, Method and Theory, Ceramic Analysis).

RESEARCH REPORTS (10 minutes)

A research report is a description of the results of a recent field or laboratory research project. This year the research report section will be divided into oral presentation and poster session; the author may choose which form to use. The poster session is especially appropriate for research results that can be described graphically better than verbally. Research reports will be reviewed. If the number submitted exceeds the space and time available, they will be accepted in the order of submission.

Research reports must be received in the following form: *abstract* of 100 words or less (2 copies); *suggestions* as to topical or geographical area; *audiovisual equipment* required.

Sample Abstract:

Name of Senior Author (Institution) Title in Caps. Abstract in single paragraph form:

Smith, Jane J. (Arizona) THE ROLE OF ARCHAEOLOGY IN SOCIETY.

Archaeology's Role in Modern Society is discussed, with an emphasis on . . . (up to 100 words maximum for short abstract and 300–600 words for long abstract).

Junior Author(s) Name in the following form at bottom of page:

Jones, Peter J. (see Smith, Jane J.)

Brown, Susan (see Smith, Jane J.)

Please follow the form exactly. Incorrect or late submissions will only be considered if space and time allow. Submit 2 copies of short abstracts, 5 copies of long abstracts.

All other scheduling and room requests (organization or committee meetings, promotional booths, etc.) should be directed to Lucille D. Horn, 1703 New Hampshire Ave., N.W., Washington, DC 20009.
