

CLAY MINERALS

VOLUME 23, NUMBER 3, SEPTEMBER 1988

CONTENTS

S. W. BAILEY. Odinite, a new dioctahedral-trioctahedral Fe ³⁺ -rich 1:1 clay mineral	237
A. PLANÇON, R. F. GIESE and R. SNYDER. The Hinckley index for kaolinites	249
H. GRAF V. REICHENBACH and B. BEYME. Oxidation of structural ferrous iron in vermiculites: I. Oxidation by Fe ³⁺	261
V. C. FARMER, B. F. L. SMITH, M. J. WILSON, P. J. LOVELAND and R. W. PAYTON. Readily-extractable hydroxyaluminium interlayers in clay- and silt-sized vermiculite	271
S. BRAVARD and D. RIGHI. Characteristics of clays in an Oxisol-Spodosol toposequence in Amazonia (Brazil)	279
U. SCHWERTMANN and E. MURAD. The nature of an iron oxide—organic iron association in a peaty environment	291
B. A. GOODMAN and P. H. NADEAU. Identification of oxide impurity phases and distribution of structural iron in some diagenetic illitic clays as determined by Mössbauer spectroscopy	301
E. AZZARO, A. BELLANCA and R. NERI. Clay mineral studies of the Tripoli Formation (Lower Messinian), Sicily	309
C. BREEN. The acidity of trivalent cation-exchanged montmorillonite: II. Desorption of mono- and di-substituted pyridines	323
Notes	
R. M. CORNELL. The influence of some divalent cations on the transformation of ferrihydrite to more crystalline products	329
W. HÄUSLER and H. STANJEK. A refined procedure for the determination of the layer charge with alkylammonium ions	333
M. SANCHEZ-CAMAZANO, J. FORTEZA and L. F. LORENZO. Occurrence of pyrophyllite in soils from Sierra de San Pedro (Caceres, Spain)	339
Announcement	346
