# The Journal of Laryngology and Otology

(FOUNDED in 1887 by MORELL MACKENZIE and NORRIS WOLFENDEN)

EDITED BY

G. H. BATEMAN

ASSISTANT EDITOR

LIONEL TAYLOR

1. Original articles which have not been published elsewhere are invited and should be sent to the Editor. They are considered for publication on the understanding that they are contributed to this *Journal* solely. Reproduction elsewhere, in whole or in part, is not permitted without the previous written consent of the Author and Editor and the customary acknowledgement must be made.

2. Manuscripts should be typewritten, on one side only of the paper, and well spaced. Captions to illustrations should be typed on a separate sheet and sent at the same time as original photographs, etc.

The Harvard system of recording references should be used, e.g. GREEN, C., and BROWN, D. (1951), *Journal of Laryngology and Otology*, 65, 33. The titles of all Journals should be given without abbreviation.

It is most important that authors should verify personally the accuracy of every reference before submitting a paper for publication.

3. Galley proofs and engraver's proofs of illustrations are sent to the author. Corrections, which should be kept to a minimum, must be clearly marked, and no extra matter added. Proofs should be returned within 5 days.

4. Illustration blocks will normally be held by the Printers for three years, after which they will be destroyed. Any author is entitled to have these returned to him, but a request for this must be sent within three years of the appearance of the article, to HEADLEY BROTHERS LTD., The Invicta Press, Ashford, Kent. Coloured illustrations will be charged to authors, unless a special grant is authorized by the Editor.

5. Orders for reprints must be sent when returning galley proofs, and for this purpose special forms are supplied.

6. Editorial communications may be addressed to THE EDITOR, *Journal of Laryngology*, c/o HEADLEY BROTHERS LTD., The Invicta Press, Ashford, Kent.

7. The annual subscription is £8 (eight pounds sterling) post free; U.S.A. \$23 post free, and payable in advance.

8. Single copies of current or back numbers (when available) will be on sale at £1 (including postage) each.

9. All subscriptions, advertising and business communications should be sent to the publishers, or subscription agents.

# **AUDIOCUPS**

## **The only noise-excluding enclosures for audiometer headphones without threshold shift**

- \* Permit accurate pure tone audiometry in conditions of ambient noise too high for unshielded earphones
- \* Easily fitted to any audiometer earphone using standard TDH 39 inserts with MX-41 AR Cushions
- \* Complete freedom from threshold shift—no change in audiometer calibration at time of fitting
- \* Subsequent periodic recalibration can be effected on standard ISO 6 cc. coupler without removal of inserts from Audiocups
- \* Invaluable where a silent cabin or sound-proof room is not available
- \* Give extra attenuation when a booth is available.

*Write for detailed leaflet and price list to:-*

# Floxapen simplifies antibiotic treatment in hospital... and after

Floxapen, like Orbenin\* (cloxacillin B.P.), is active against virtually all staphylococci, streptococci and pneumococci, irrespective of their sensitivity to other antibiotics.

However, it is simpler to use than Orbenin, the established first-line treatment for Gram-positive infections in hospitals, because:

**The standard dose, orally or by injection, is only 250 mg. q.i.d.**

**Equivalent serum levels are obtained by either route.**

**Transfer from injectable to oral therapy may be justified at an earlier stage of treatment.**

Floxapen also offers the penicillin advantages of low toxicity and bactericidal action.

For outpatient treatment, Floxapen is ideal; its simple oral dosage and minimal side-effects encourage patients to follow the correct dosage and to complete the course of therapy.

**Indications:** Infections due to sensitive Gram-positive organisms.

**Dosage:** Oral and Intramuscular:  
Adults: 250 mg. q.i.d.  
Children: 2-10 years—half adult dose;  
Under 2 years—quarter adult dose.  
Oral doses should be taken one hour before meals. In severe infections dosages may be increased if required.

**Availability:** Capsules (black/caramel) and Vials, each containing 250 mg. flucloxacillin.

**Contra-indications:** Penicillin hypersensitivity. Subconjunctival injection.

**Side-effects:** Rare and mild, as with other penicillins.

*Further information is available on request.*

**Floxapen** *simplifies antibiotic treatment*  
flucloxacillin

Floxapen\* (flucloxacillin) is a product of British research at

*Clinical, Diagnostic, Screening and Bekesy Audiometers. Acoustic Impedance Apparatus.  
Stereo Auditory Trainers. Acoustic Cabins. Artificial Mastoid, etc.*

*Kamplex DA11 Twin-Channel Clinical Audiometer*

Our latest model with  
many new features:

Probably the most keenly  
priced twin-channel audio-  
meter currently available.

Fowler, Sisi, Luscher and  
Rainville test facilities  
inbuilt.

Complete speech facilities.

Narrow band and white  
noise masking to 100 db.

Pure tone attenuation to  
120 db.

# New for the infected ear OTOSEPTIL eardrops

## Containing a broad spectrum antibiotic and possessing antifungal properties

Candida and aspergillus are found in about 20% of cases of otitis externa.

Otoseptil ear drops destroy both pathogenic bacteria and fungi commonly found in ear infections.

Otoseptil ear drops contain:

Neomycin Undecylenate – antibacterial and antifungal.

Tyrosin – active against gram-positive cocci.  
(Containing gramicidin and tyrocin).

Hydrocortisone alcohol – anti-inflammatory.

Ethylene oxide polyoxypropylene glycol condensate –  
to ensure rapid tissue contact.

Otoseptil ear drops control infection, relieve pain, erythema and itching.

Neomycin Undecylenate was researched by H R Napp Ltd.

*Presentation* : 8 ml bottle with separate dropper.

Samples and full information available to the medical profession upon request.  
H R Napp Ltd Watford WD2 7RA England

A new product by Nepp—Developed by International Research Group. Dedicated to Physician and Patient for over 40 years.

## New from Zeiss Ceiling Suspension Unit

Suitable for new and existing Theatres.

All seven Zeiss Operating Microscopes can be attached to it.

Avoids the need for large floor stands.

Automatic electro-hydraulic operation by hand or foot controls.

Two telescoping speeds – one for rapid positioning, one for precision fine focusing of the microscope.

The illustration shows the Ceiling Unit carrying the new Zeiss Operating Microscope 6.

**PETERS CLINIC AUDIOMETERS AND BÉKÉSY**  
ARE THE IDEAL TOOLS FOR MORE ADVANCED AUDIOMETRY

The Audiometers offer :

- Two continuously variable attenuators accurate to 1 db.
- SISI Test (built-in) and automatic alternate loudness balance switching.
- Maximum attenuation of 120 db for loudness discomfort level tests.
- Narrow band SYNCHRONOUS masking (a new semi-automatic masking technique).
- Full speech test facilities with white noise masking.
- Plug-in circuit boards and operator output checks.
- Conversion to a true BÉKÉSY AUDIOMETER at will.
- Extra features not listed are offered by the AP/6 compared to the AP/5 AUDIOMETER.
