ASSOCIATE EDITORS

Lesleigh Anderson, Patrick J. Bartlein, Robert Booth, Louisa Bradtmiller, Aaron Diefendorf, John Dodson, Mary Edwards, Tyler Faith, Jaime Fucugauchi, Kathleen Johnson, Terri Lacourse, Pete Langdon, Thomas Lowell, Curtis W. Marean, Barbara Mauz, James O'Connor, W. Wyatt Oswald, Jeff Pigati, Yeong Bae Seong, James Shulmeister, Ashok K. Singhvi, Xiaoping Yang

EDITORS EMERITI

A. Lincoln Washburn
Estella B. Leopold
Stephen C. Porter
Eric J. Steig
Alan R. Gillespie

MANAGING EDITOR

Karin Perring

Quaternary Research Center

Box 351360

University of Washington
Seattle, WA 98195-1360

EDITORIAL BOARD

ZHISHENG AN
Institute of Earth Environment, Chinese
Academy of Sciences
*Quaternary geology, monsoon and
global change, dust and aerosols*

GAIL ASHLEY
Rutgers University
*Paleoenvironments, paleohydrology of springs,
wetlands and rivers, geoarchaeology*

JULIE BRIGHAM-GRETTE
University of Massachusetts
*Stratigraphy, sedimentology, chronology
of Arctic climate and sea level*

JOHN DODSON
Institute of Earth Environments, Xi'an, China
*Australia, Pacific Islands, China, vegetation
history, human impacts*

YEHOUDA ENZEL
Hebrew University of Jerusalem
*Desert geomorphology, palaeohydrology of
lakes and streams*

DAVID FINK
Australian Nuclear Science and Technology
Organisation
Cosmogenic dating

SHERI FRITZ
University of Nebraska–Lincoln
*Paleoclimate, paleolimnology, diatom
ecology of North and South America*

ALAN R. GILLESPIE
University of Washington
*Glacial geology, paleoclimate, megafloods,
Central Asia*

LISA GRAUMLICH
University of Washington
*paleoclimatology, paleoecology,
climate change, mountain ecosystems*

VANCE T. HOLLIDAY
University of Arizona
*Geoarchaeology, North American
Archaeology, Peopling of the New World,
Soils, Late Quaternary Stratigraphy*

RICHARD G. KLEIN
Stanford University
Human origins, Quaternary paleontology

MELANIE LENG
British Geological Survey,
University of Nottingham
*Stable isotope geochemistry, climate and
environmental change*

DANIEL R. MUHS
U.S. Geological Survey
*Quaternary sea level history, Eolian
stratigraphy, soils North America, Pacific,
Atlantic, and Caribbean Islands*

COLIN V. MURRAY-WALLACE
University of Wollongong
*Coastal evolution, neotectonism, geochronology,
Quaternary sea-level changes*

JAY QUADE
Department of Geosciences,
University of Arizona
*geochemistry, paleoclimatology,
Quaternary geology*

MARIA SOCORRO LOZANO-GARCIA
Universidad Nacional Autónoma de México
*Tropical paleoecology, paleoclimatology,
human impact on ecosystems*

CATHY L. WHITLOCK
Montana State University
*Paleoecology and vegetation history:
North and South America*

YURENA YANES
University of Cincinnati
*Isotope geochemistry, paleoclimatology,
Quaternary mollusks, taphonomy,
paleoecology*

LIPING ZHOU
Peking University
*Land-sea correlation, loess, geochronology,
geomorphology, Central Asia, East Asia*

Cover photo. Lake Nyinambuga is one in a cluster of lakes occupying crater kettles, part of the Ndali-Kasenda crater lake landscape in Kabarore District, and located approximately 25 kilometers south of the town of Fort Portal in western Uganda, in the Albertine Rift. Lake Nyinambuga is adjacent to Lake Kifuruka, where sediment cores that were collected by Kiage et al. provide evidence environmental change about 4300 cal yr BP that has been linked to anthropogenic activity. Photo: Lawrence Kiage (see the article by Kiage et al., pages 172–186 this issue.)
