## Table of Contents

Preface: J. M. Burgers and R. N. Thomas

Opening Address: F. L. Whipple

Part I: Empirical Studies of Velocity Fields in, and Related Structure of, the Interstellar Medium:

- Density and Velocity Distribution of the Interstellar Gas. H. C. van de Hulst
- Sydney Work on 21-cm Observations of the HI Galactic Disk. F. J. Kerr
- Large-Scale Structure and Direction of Rotation in Galaxies. G. de Vaucouleurs
- Twenty-one-cm Studies of Some Interstellar Clouds. R. D. Davies
- On the Nature of the Galactic Halo. S. B. Pickelner and I. S. Shklovsky
- Validity of the Cloud Model of the Interstellar Medium. Bertram Donn
- On the Formation of Interstellar Gas Clouds. S. A. Kaplan
- On the Problem of the Mechanism of the Origin of Stars in Stellar Associations. V. A. Ambartsumian
- Statistical Study of Globules Projected on Stellar Clouds. D. A. Rojkovsky
- Star Chains and Dark Filaments in Galactic Nebulae. V. G. Fessenkov
- Microstructure of the Galactic Magnetic Field. K. Serkowski

Part II: Theoretical Considerations on the Production and Dissipation of Velocity Fields in the Interstellar Medium:

- Gross Dynamics of the Interstellar Medium. E. N. Parker
- Aerodynamic Dissipation. H. E. Petschek
- Magnetohydrodynamic Dissipation. L. Biermann and A. Schlüter
- Thermal Inelastic Collision Processes. M. J. Seaton
- Cross Sections for Photoionization from Valence-Electron States. A. Burgess and M. J. Seaton

Part III: General Summarizing Discussion of Problems Raised in Parts I and II.

Part IV: Cooling and Condensation of Interstellar Matter:

- On the Cooling of Interstellar Matter. E. Schatzman
- On the Condensation of Interstellar Material. E. Schatzman
- On the Gravitational Instability of a Medium in Nonuniform Rotation. N. Bel and E. Schatzman
- Possible Mechanisms of Single and Multiple Star Formation. G. J. Odgers and R. W. Stewart
- Magnetic Field of a Contracting Proto-Star. L. Mestel
- On the Turbulence in the Protoplanetary Cloud. V. S. Safronov

Part V: Kinematic Structure of Gaseous Envelopes:

- Internal Kinematics of the Planetary Nebulae. O. C. Wilson
- Comparison of Gas and Radiation Pressure in the Problems of the Dynamics of Planetary Nebulae. H. Zanstra
- Local Density Variations in Planetary Nebulae. M. J. Seaton

Internal Motions in the Orion Nebula. G. Münch  
Kinematics of the Filaments in the Crab Nebula. G. Münch  
On the Nature of the Emission of the Crab Nebula. I. S. Shklovsky  
Cygnus Loop and Some Related Nebulosities. R. Minkowski

**Part VI: Conditions at the Ionization and Shock Fronts in Collisions of Gas Clouds:**

Bright Rims in Diffuse Nebulae. Stuart R. Pottasch  
On the Stability of Ionization Fronts. F. D. Kahn  
On the Propagation and Structure of Ionization Fronts. F. A. Goldsworthy  
Collision of Two Highly Ionized Clouds of Gas. F. D. Kahn  
Gas-Dynamical Effects of Star Formation. M. P. Savedoff  
Gas Dynamics of Galaxy Collisions. M. P. Savedoff

**Part VII: Some General Gas-Dynamical Problems:**

Examples of Gas Motion and Certain Hypotheses on the Mechanism of Stellar Outbursts. L. I. Sedov  
Some Exact Solutions of the Equations of Magnetohydrodynamics When Both Self-Attraction and  
Magnetic Fields Are Present. G. C. McVittie  
On the Mathematical Structure of Turbulence. J. Bass  
Distortion of a Toroidal Field by Convection. D. W. Allan and E. C. Bullard  
Shock Waves in Magneto-Gasodynamic Turbulence. S. A. Kaplan  
Possible Hydromagnetic Simulation of Cosmical Phenomena in the Laboratory. Winston H. Bostick

**Part VIII: Summaries and Conclusions:**

Over-all impressions:

J. M. Burgers  
H. Liepmann  
H. C. van de Hulst  
F. D. Kahn

Summary on Cooling Mechanisms. M. J. Seaton  
Summary on Ultraviolet Stellar Output. J. C. Pecker and E. Schatzman  
Over-All Summary. L. Spitzer, Jr.  
General Discussion
