break times have not been noted.**

REGISTER EARLY!

\$25 will be discounted when you register by April 15, 1996.

How to Register

1. Use one registration form for each individual. You may photocopy if extras are needed.
2. Clearly print or type all information.
3. Indicate which preconference workshops you would like to attend.
4. Make checks payable to Jems Communications.

Mail your check & registration form to: Jems Communications P.O. Box 2789, Carlsbad, CA 92018-2789

5. If you choose to pay by credit card you may fax your registration form to Jems Communications at (619) 431-8135.

Registration Cancellations

All cancellations must be made in writing to Jems Communications. Cancellations received prior to April 15, 1996, will receive a full refund of registration fees. Cancellations received from April 15 to May 1 will receive a full refund, minus a \$25 handling fee. Cancellations received after May 1, 1996 may result in forfeiture of the entire registration fee.

Group Discounts

Now you can provide the ECCU educational experience to additional employees and save money, too. Just send one person at full price and two or more others attend at \$20 off each. Combine this discount with the early registration discount and you get \$45 off of the regular price. One check may be issued for all representatives from a single organization, but we need a separate registration form for each person. Send all forms together.

The Jems Guarantee

If you are not completely satisfied with this conference, simply notify us in writing within 30 days for a full refund or credit. Our goal is 100 percent customer satisfaction.

Wheeled Coach Delivers New Angles on Warning Lights.

EnterSafe

It's a fact! Most accidents involving EMS vehicles happen at the intersection. This revolutionary new design option for Type II vehicles delivers the maximum warning light performance available anywhere.

With the only stationary 45° front warning light coverage in the industry, the *EnterSafe* system enables you to enter an intersection with much more visibility, by forcing more light out-in-front and to the sides of the vehicle. The new angled lights in the top of the vehicle allow light to travel farther and faster into the intersection at 45° angles where you need it most.

EnterSafe Top Design Features:

- Only Stationary 45° Warning Lights in the Industry
- Fully Customized, Programmable Warning Light System
- Eliminates the Need for an External Load Management System
- Offers the Most Effective Flash Pattern Available

**"EnterSafe" is Wheeled Coach's
Innovative Type II Top Design**

EnterSafe, Built-In Safety You Can See.
