

# Infection Control & Hospital Epidemiology

Volume 44, No 5  
May 2023

ICHE

Artist: Nile Moss

CAMBRIDGE  
UNIVERSITY PRESS

# REGISTRATION NOW OPEN

SAVE THE DATE

**BOSTON, MA  
OCT. 11 – 15**

REGISTRATION IS OPEN FOR IDSA, SHEA, PIDS AND HIVMA MEMBERS, AS WELL AS SIDP MEMBERS WHO ARE NOT A MEMBER OF IDSA/HIVMA/SHEA/PIDS.

*\*SIDP members are not currently eligible for IDWeek member rates.*

**Don't miss the  
premier international  
infectious diseases  
meeting of the year!**

*See You There!*

## IMPORTANT DATES

**INTERACTIVE PROGRAM  
PLANNER NOW AVAILABLE**

**REGISTRATION OPENS TO  
ALL ATTENDEES, JUNE 6**

**LATE BREAKER  
ABSTRACT SUBMISSION  
SITE OPENS, JUNE 13**

[idweek.org/registration](https://doi.org/10.1017/ice.2023.99)

**ADVANCING SCIENCE, IMPROVING CARE**

## CONTENTS

### SHEA/IDSA/APIC Practice Recommendation

- 695** Strategies to prevent surgical site infections in acute-care hospitals: 2022 Update  
*Michael S. Calderwood, Deverick J. Anderson, Dale W. Bratzler, E. Patchen Dellinger, Sylvia Garcia-Houchins, Lisa L. Maragakis, Ann-Christine Nyquist, Kiran M. Perkins, Michael Anne Preas, Lisa Saiman, Joshua K. Schaffzin, Marin Schweizer, Deborah S. Yokoe and Keith S. Kaye*

### Original Articles

- 721** Using video-based surveillance for monitoring hand hygiene compliance according to the World Health Organization (WHO) Five Moments framework: A pragmatic trial  
*Katherine J. McKay, Cecilia Li and Ramon Z. Shaban*
- 728** Automated hand hygiene compliance system's audible alert reminder increases healthcare worker hand hygiene compliance  
*Kristen L. Webster, Sarah M. Bishop, LaShawn E. Scott, Leah M. Oppy, Crystal R. Heishman, Gina M. Stevenson and Forest W. Arnold*
- 732** Human-machine collaboration using artificial intelligence to enhance the safety of donning and doffing personal protective equipment (PPE)  
*Reny Segal, William Pierre Bradley, Daryl Lindsay Williams, Keat Lee, Roni Benjamin Krieser, Paul Mario Mezzavia, Rommie Correa de Araujo Nunes and Irene Ng*
- 736** Antibiotic stewardship to reduce inappropriate antibiotic prescribing in integrated academic health-system urgent care clinics  
*Dharmesh Patel, Teresa Ng, Lubna S. Madani, Stephen D. Persell, Mark Greg, Phillip E. Roemer, Sonali K. Oberoi and Jeffrey A. Linder*
- 746** Implementation and outcomes of a clinician-directed intervention to improve antibiotic prescribing for acute respiratory tract infections within the Veterans' Affairs Healthcare System  
*Karl J. Madaras-Kelly, Suzette A. Rovelsky, Robert A. McKie, McKenna R. Nevers, Jian Ying, Benjamin A. Haaland, Chad L. Kay, Melissa L. Christopher, Lauri A. Hicks and Mathew H. Samore*
- 755** After-hours consultations and antibiotic prescribing for self-limiting upper respiratory tract infections in primary-care practices  
*Zhuoxin Peng, Wen-Qiang He, Andrew Hayen, John Hall and Bette Liu*
- 762** Comparing the activity of novel antibiotic agents against carbapenem-resistant Enterobacterales clinical isolates  
*Pranita D. Tamma, Yehudit Bergman, Emily B. Jacobs, Jae Hyoung Lee, Shawna Lewis, Sara E. Cosgrove and Patricia J. Simner for the Centers for Disease Control and Prevention Epicenters Program*
- 768** Air dispersal of respiratory viruses other than severe acute respiratory coronavirus virus 2 (SARS-CoV-2) and the implication on hospital infection control  
*Shuk-Ching Wong, Veronica Wing-Man Chan, Christine Ho-Yan AuYeung, Jonathan Hon-Kwan Chen, Cyril Chik-Yan Yip, Simon Yung-Chun So, Xin Li, David Christopher Lung, Anita Man-Ching Tsang, Kelvin Kai-Wang To, Kwok-Yung Yuen and Vincent Chi-Chung Cheng*

**774** Environmental air sampling for detection and quantification of *Mycobacterium tuberculosis* in clinical settings: Proof of concept  
*Keren Middelkoop, Anastasia S. Koch, Zeenat Hoosen, Wayne Bryden, Charles Call, Ronnett Seldon, Digby F. Warner, Robin Wood and Jason R. Andrews*

**780** Central-line-associated bloodstream infections in a pediatric oncology and hematology hospital at home program  
*Sylvain C. Raimbault, Carine Domenech, Christine Fuhrmann and Amandine Bertrand*

### Concise Communication

**786** Using machine learning to examine drivers of inappropriate outpatient antibiotic prescribing in acute respiratory illnesses  
*Laura M. King, Michael Kusnetsov, Avgoustinos Filippoupolitis, Deniz Arik, Monina Bartoces, Rebecca M. Roberts, Sharon V. Tsay, Sarah Kabbani, Destani Bizune, Anirudh Singh Rathore, Silvia Valkova, Hariklia Eleftherohorinou and Lauri A. Hicks*

**791** Exploring unintended consequences of adult antimicrobial stewardship programs: An Emerging Infections Network survey  
*Michael J. Durkin, Jason Lake, Philip M. Polgreen, Susan E. Beekmann, Adam L. Hersh and Jason G. Newland*

**794** Trimethoprim-sulfamethoxazole resistance patterns among *Staphylococcus aureus* in the United States, 2012–2018  
*D. Cal Ham, Lucy Fike, Hannah Wolford, Lindsey Lastinger, Minn Soe, James Baggs and Maroya Spalding Walters*

**798** Severe acute respiratory coronavirus virus 2 (SARS-CoV-2) exposure investigations using genomic sequencing among healthcare workers and patients in a large academic center  
*Leigh Smith, C. Paul Morris, Morgan H. Jibowu, Susan Fallon, Stuart C. Ray, Sara E. Cosgrove, Melanie S. Curlless, Valeria Fabre, Sara M. Karaba, Lisa L Maragakis, Aaron M Milstone, Anna C. Sick-Samuels, Polly Trexler, Heba H. Mostafa, and Clare Rock for the CDC Prevention Epicenter Program*

**802** Hospital coronavirus disease 2019 (COVID-19) public health reporting: Lessons from validation of an automated surveillance tool to facilitate data collection  
*Shantini D. Gamage, Martin E. Evans, Brian P. McCauley, Karen R. Lipscomb, Linda Florida, Makoto M. Jones, Michael Baza, Jeremy Barraza, Loretta A. Simbartl and Gary A. Roselle*

**805** Respiratory virus coinfections with severe acute respiratory coronavirus virus 2 (SARS-CoV-2) continue to be rare one year into the coronavirus disease 2019 (COVID-19) pandemic in Alberta, Canada (June 2020–May 2021)  
*Jamil N. Kanji, Nathan Zelyas, Kanti Pabbaraju, David Granger, Anita Wong, Stephanie A. Murphy, Emily Buss, Clayton MacDonald, Byron M. Berenger, Mathew A. Diggle, Natalie C. Marshall, John M. Conly and Graham Tipples*

**809** Characteristics of nursing home residents and healthcare personnel with repeated severe acute respiratory coronavirus virus 2 (SARS-CoV-2) tests positive  $\geq 90$  days after initial infection: Four US jurisdictions, July 2020–March 2021  
*W. Wyatt Wilson, Kelly M. Hatfield, Stacy Tressler, Cara Bicking Kinsey, Gemma Parra, Renée Zell, Anitra Denson, Channyn Williams, Kevin B. Spicer, Ishrat Kamal-Ahmed, Baha Abdalhamid, Mahlet Gemechu, Jennifer Folster, Natalie J. Thornburg, Azaibi Tamin, Jennifer L. Harcourt, Krista Queen, Suxiang Tong, John A. Jernigan, Matthew Crist, Kiran M. Perkins, Sujan C. Reddy and for the Repeat Positive SARS-CoV-2 Test After 90 Days (REPOST-90) Study Team*

**813** Rapid molecular severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) testing in hospital employees with mild, nonspecific respiratory symptoms facilitates expedient return to work  
*Alyssa Y. Castillo, Allison Zelikoff, Jeannie D. Chan, John B. Lynch and Chloe Bryson-Cahn*

- 817** Predictors of persistent symptoms after severe acute respiratory coronavirus virus 2 (SARS-CoV-2) infection among healthcare workers: Results of a multisite survey  
*Aurora E. Pop-Vicas, Fauzia Osman, Geoffrey Tsaras, Claire Seigworth, L. Silvia Munoz-Price and Nasia Safdar*
- 821** Comparison of coronavirus disease 2019 (COVID-19) symptoms at diagnosis among healthcare personnel before and after the emergence of the omicron variant  
*Justin C. Laracy, Elizabeth V. Robilotti, Judy Yan, Anabella Lucca, Anoshe Aslam, N. Esther Babady and Mini Kamboj*
- 824** Assessing the utility of universal preprocedure severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) polymerase chain reaction (PCR) testing at a cancer center  
*Salma Abbas and Muhammed Aasim Yusuf*
- 827** Risk factors for severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) RNA environmental contamination in rooms of patients with coronavirus disease 2019 (COVID-19)  
*Jun-Won Seo, Da Young Kim, Na Ra Yun, You Mi Lee, Merlin Jayalal Lawrence Panchali, Mi-Seon Bang, Seong Yeon Hwang, Choon-Mee Kim and Dong-Min Kim*
- 830** Attitudes toward policies to encourage influenza vaccination in long-term care facilities: A national survey of US adults aged 50–80 years  
*Kimson E. Johnson, Preeti N. Malani, Matthias Kirch, Erica Solway, Dianne C. Singer and Jeffrey T. Kullgren*
- 834** Surface area matters: An evaluation of swabs and surface area for environmental surface sampling of healthcare pathogens  
*Rolieria M. West, Alicia M. Shams, Monica Y. Chan, Laura J. Rose and Judith A. Noble-Wang*
- 837** Effectiveness of a novel 1-step cleaner and disinfectant against *Candida auris*  
*Muhammed F. Haq, Jennifer L. Cadnum, Basya S. Pearlmutter, Annette L. Jencson and Curtis J. Donskey*
- 840** Protein detection by fluorescence of manually cleaned high-speed dental handpieces  
*Fábio B. Souza, Camila Q.M. Bruna, Rosa A.B. Mesiano, Regina M.B. Cicarelli, David Perrett and Kazuko U. Graziano*

### Research Brief

- 843** Detection of severe acute respiratory coronavirus virus 2 (SARS-CoV-2) in the air near patients using noninvasive respiratory support devices  
*Bruno Adler Maccagnan Pinheiro Besen, Camila Quartim de Moraes Bruna, Caroline Lopes Ciofi-Silva, Maria Cássia Mendes Correa, Kazuko Uchikawa Graziano, Anderson Vicente de Paula, Ho Yeh-Li, Daniel Joelsons, Pedro Vitale Mendes, Laísa Bubach Carvalho, Maria Luísa do Nascimento Moura, Thais Guimarães and Silvia Figueiredo Costa*
- 845** Hospital approaches to universal masking after public health “unmasking” guidance  
*Graham M. Snyder, Catherine L. Passaretti and Michael P. Stevens*
- 847** Can testing the environment for severe acute respiratory coronavirus virus 2 (SARS-CoV-2) be a signal for coronavirus disease 2019 (COVID-19) cases among nursing home staff?  
*Gabrielle M. Gussin, Raveena D. Singh, Izabela Coimbra Ibraim, Raheeb Saavedra, Thomas T. Tjoa, Micaila Curtis, Kristine P. Nguyen, Ilhem Messaoudi and Susan S. Huang*

### Letters to the Editor

- 849** Health equity: The missing data elements in healthcare outbreak response  
*Caroline A. Schrodt, Ayana M. Hart, Renee M. Calanan, Anita W. McLees, Joseph F. Perz and Kiran M. Perkins*

- 850** Identifying and addressing social determinants of health in pediatric outpatient parenteral antimicrobial therapy  
*Victoria J. L. Konold, Scott J. Weissman, Matthew P. Kronman, Adam W. Brothers, Daniel Pak, Kimberly K. Felder and Louise E. Vaz*
- 852** From a culture of blame to a culture of grace: A letter in reply to Papadakis  
*Kyle J. Gontjes and Kristin Collier*
- 853** Quantifying healthcare-acquired coronavirus disease 2019 (COVID-19) in hospitalized patients: A closer look  
*Farrin A. Manian and Chaitanya Karlapalem*
- 854** Author response: Quantifying healthcare-acquired coronavirus disease 2019 (COVID-19) in hospitalized patients: A closer look  
*William E. Trick, Carlos A. Q. Santos, Sharon Welbel, Marion Tseng, Huiyuan Zhang, Onofre Donceras, Ashley I. Martinez and Michael Y. Lin*
- 856** More harm than good? Potential benefits and unintended consequences associated with screening asymptomatic hospital admissions for severe acute respiratory syndrome coronavirus 2  
*Maria M. Torres-Teran, Maria E. Navas, Nataliya M. Kachaluba, Josh M. Meyer and Curtis J. Donskey*

#### Corrigendum

- 858** Web-Based Training to Improve Knowledge and Change Practice in Preventing Healthcare Infection – CORRIGENDUM  
*Hilary Humphreys, Seamus McHugh, Borislav D. Dimitrov, Seamus Cowman, Sean Tierney and Arnie D. K. Hill*
- 859** Predicting asymptomatic severe acute respiratory coronavirus virus 2 (SARS-CoV-2) infection rates of inpatients: A time-series analysis — CORRIGENDUM  
*Frida Rivera, Kwang Woo Ahn and L. Silvia Munoz-Price*

*An Official Publication of the Society for Healthcare Epidemiology of America*

*Infection Control & Hospital Epidemiology* (ISSN 0899-823X) is published monthly by Cambridge University Press, One Liberty Plaza, New York, NY 10006, USA.

## Editorial Office

Communications should be addressed to the Editor, *Infection Control & Hospital Epidemiology*, One Liberty Plaza, New York, NY 10006 (email: iche.managingeditor@cambridge.org). Contributors should consult the Instructions for Contributors, which is available at the journal's Web site.

## Advertising

Please direct advertising inquiries to M. J. Mrvica Associates, 2 West Taunton Avenue, Berlin, NJ 08009 (e-mail: mjmrvica@mrvica.com; telephone: 856-768-9360, fax: 856-753-0064). Publication of an advertisement in *Infection Control & Hospital Epidemiology* does not imply endorsement of its claims by the Society for Healthcare Epidemiology of America, by the Editor, or by Cambridge University Press.

## Permissions

Articles may be copied or otherwise reused without permission only to the extent permitted by Sections 107 and 108 of the US Copyright Law. Permission to copy articles for personal, internal, classroom, or library use may be obtained from the Copyright Clearance Center (<http://www.copyright.com>,

email: info@copyright.com). For all other uses, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale, please contact Cambridge University Press. Full details may be found at: [www.cambridge.org/about-us/rights-permissions](http://www.cambridge.org/about-us/rights-permissions).

## Subscriptions

The individual subscription prices for 2023 are: Print & Online: \$305; Online Only: \$236. Individuals have the option to order directly from Cambridge University Press. Institutional print + electronic and e-only subscriptions are available from Cambridge University Press and include unlimited online access; rates are tiered according to an institution's type and research output and may be reviewed at the journal's homepage on Cambridge Core: [cambridge.org/ICHE](http://cambridge.org/ICHE).

Please direct subscription inquiries and requests for back issues to Customer Services at Cambridge University Press, e-mail: [subscriptions\\_newyork@cambridge.org](mailto:subscriptions_newyork@cambridge.org) (USA, Canada, and Mexico) or [journals@cambridge.org](mailto:journals@cambridge.org) (outside of USA, Canada, and Mexico).

**Postmaster:** Send address changes to *Infection Control & Hospital Epidemiology*, Cambridge University Press, One Liberty Plaza, New York, NY 10006 USA.

## About the cover:

Title: Nile's Joy, Horses & Hope, 2006

Beginning with volume 43 (January 2022), the cover of *Infection Control & Hospital Epidemiology* (ICHE) will feature art inspired by or reflective of topics within the scope of the journal and their impact on patients, healthcare personnel and our society. These topics include healthcare-associated infections, antimicrobial resistance, and healthcare epidemiology. The intent is to feature original artwork that has been created by individuals who have a personal connection to one or more of these topics through their clinical work, research, or experience as a patient or an affected patient's family member, friend or advocate. The goal is to provide readers with a visual reminder of the human impact of the topics addressed in the journal and the importance of the work being done by those who read or contribute to ICHE and by all who are trying to make healthcare safer through the elimination of healthcare-associated infections.

For more information about the ICHE cover and how to submit artwork for consideration for a future cover, please visit the ICHE website: <https://www.cambridge.org/core/journals/infection-control-and-hospital-epidemiology/front-covers>

**Artist:** Nile Moss (1990-2006)

**Medium:** Tissue paper, stained glass technique

### **Nile's parents, Carole and Ty Moss, spoke to ICHE about his artwork.**

**What was the inspiration for this artwork?** Nile began every morning with a loud announcement, "It's going to be such a great day!" At the end of the day, he would jump off the school bus and announce, "I had such a great day!" Nile's love of horses began very early in life thanks to his school's participation at a nearby therapeutic riding center. His horses brought him great joy and his faith gave him the hope and promise of a rainbow every day. This piece was inspired by the love Nile had for his horses, Tex and Clutch.

**Why is this work appropriate for the cover of *Infection Control & Hospital Epidemiology*?** Nile's art expression and techniques blossomed from August 2005 to April 2006 in his first high school art class. He returned home with this final creation on April 14, 2006. His life ended only days later when physicians failed to recognize the initial symptoms of sepsis caused by methicillin-resistant *Staphylococcus aureus* (MRSA) that he had acquired while receiving care in a local hospital. Nile's story represents the preventable harm that happens when people are unaware and unprepared to protect their loved ones and their patients. Patient safety begins with a robust bench of healthcare professionals, including healthcare epidemiologists, infection preventionists and antimicrobial stewards, that are given the knowledge, tools, training and support they need to do their work effectively. Our healthcare professionals deserve to feel joy and hope at the start of each new day, just as Nile did, and not doubt that their hard work saving lives is appreciated.

**What is your personnel connection to the content of ICHE?** When Nile died, our lives were changed forever. After researching the "why" and the "how," we decided to become a part of the solution to end preventable harm in honor of Nile. We became educated on the science of infection prevention to help inform and empower the public and educate healthcare professionals about what happens when healthcare facilities don't maintain a culture of safety and allow preventable healthcare-associated infections to occur. We celebrate his life every day by empowering the public and healthcare professionals with our story of prevention and action to end preventable healthcare harm.

*Carole and Ty Moss are the founders and Executive Directors of Nile's Project, a non-profit organization founded in 2007 to end unnecessary deaths due to preventable hospital-acquired infections. Nile's Project works with survivors, families, healthcare professionals, public health officials, and other advocacy groups to increase public awareness and advocate for changes that will make the healthcare system safer. For more information, visit [www.nilesproject.com](http://www.nilesproject.com).*
