

## AUTHOR INDEX FOR VOLUME 91

ABTAHI, F., GHAFARPANAH, A. and REJALI, A.; Biprojectivity and biflatness of Lau product of Banach algebras defined by a Banach algebra morphism	134
AHMAD, B.; see ZHANG, L.	116
ALI, S. and KHAN, A. N.; On commutativity of Banach algebras with derivations	419
ANDRUSZKIEWICZ, R. R. and WORONOWICZ, M.; On <i>SI</i> -groups	92
BARNES, D. W.; Conditions for a Schunck class to be a formation	69
BENMOUSSA, M. T. and GUERBOUSSA, Y.; Some properties of semi-abelian $p$ -groups	86
BIVIÀ-AUSINA, C. A.; Multiplicity and Łojasiewicz exponent of generic linear sections of monomial ideals	191
BURNES, T. C. and COVATO, E.; On the prime graph of simple groups	227
CALDERÓN MARTÍN, A. J.; (Anti)commutative algebras with a multiplicative basis	211
CASTILLO-MEDINA, J., EBRAHIMI-FARD, K. and MANCHON, D.; Unfolding the double shuffle structure of $q$ -multiple zeta values	368
CATINO, F., COLAZZO, I. and STEFANELLI, P.; On regular subgroups of the affine group	76
CAVE, C. and DREESEN, D.; Embeddability of generalised wreath products	250
CHAOPRAKNOI, S., PHONGPATTANACHAROEN, T. and PRAKITSRI, P.; The natural partial order on linear semigroups with nullity and co-rank bounded below	104
CHEN, Y.; see HU, X.	177
CHUDZIAK, J.; Continuous on rays solutions of a Gołęb–Schinzel type equation	273
CIEŚLAK, W. and MOZGAWA, W.; Extremal perimeters of quadrangles in the Poncelet porism	487
COLAZZO, I.; see CATINO, F.	76
COOPER, S. and YE, D.; Eisenstein series to the tredecic base	19
CORR, B. P.; Estimation and computation with matrices over finite fields	175
COVATO, E.; see BURNES, T. C.	227
DEREGOWSKA, B. and LEWANDOWSKA, B.; On the minimal property of de la Vallée Poussin's operator	129
DONG, Y. and ZHENG, B.; On hyperstability of additive mappings onto Banach spaces	278
DOW, A. and GUERRERO SÁNCHEZ, D.; Domination conditions under which a compact space is metrisable	502
DREESEN, D.; see CAVE, C.	250
DUKE, W. and NGUYEN, H. N.; Infinite products of cyclotomic polynomials	400
DUTTER, S.; Gaps in Taylor series of algebraic functions	412

EBRAHIMI-FARD, K.; see CASTILLO-MEDINA, J.	368
FRANCE-JACKSON, H., WAHYUNI, S. and WIJAYANTI, I. E.; Radical related to special atoms revisited	202
GAO, J.; Note on support weight distribution of linear codes over $\mathbb{F}_p + u\mathbb{F}_p$	345
GE, Y. and LÜ, F.; A note on inhomogeneous Diophantine approximation in beta-dynamical system	34
GHAFFARPAH, A.; see ABTAHI, F.	134
GONZÁLEZ, B., HERNÁNDEZ CIFRE, M. A. and HINRICHS, A.; Successive radii of families of convex bodies	331
GRIGORYAN, A.; A version of Rouché's theorem for continuous functions	268
GUERBOUSSA, Y.; see BENMOUSSA, M. T.	86
GUERRERO SÁNCHEZ, D.; see DOW, A.	502
GU, R.; see HOU, H.	1
HERNÁNDEZ CIFRE, M. A.; see GONZÁLEZ, B.	331
HEYDARPOUR, M. and MAGHSOUDI, S.; The metric dimension of metric manifolds	508
HINRICHS, A.; see GONZÁLEZ, B.	331
HOU, H., GU, R. and SHANG, Y.; The join of split graphs whose quasi-strong endomorphisms form a monoid	1
HU, G.; Maximal Hardy spaces associated to nonnegative self-adjoint operators	286
HU, P.-C.; see WU, A.-D.	389
HU, X., ZHANG, Y. and CHEN, Y.; A note on almost balanced bipartitions of a graph	177
HUANG, J. and LI, S.; On the normalised Laplacian spectrum, degree-Kirchhoff index and spanning trees of graphs	353
JIN, W.; Finite 3-geodesic transitive but not 3-arc transitive graphs	183
KALENDA, O. F. K. and SPURNÝ, J.; On quantitative Schur and Dunford–Pettis properties	471
KANG, S. Y.; Bayesian models for spatio-temporal assessment of disease	516
KANG, Y.; Detection, classification and analysis of events in turbulence time series	521
KHAN, A. N.; see ALI, S.	419
KOBOS, T.; Hyperplanes of finite-dimensional normed spaces with the maximal relative projection constant	447
KREMPA, J. and STOCKA, A.; On sets of pp-generators of finite groups	241
LEWANDOWSKA, B.; see DEREGOWSKA, B.	129
LI, H.; Twisted topological graph algebras	514
LI, S.; see HUANG, J.	353
LORENSEN, K.; Addendum to ‘Cohomology and profinite topologies for solvable groups of finite rank’	351
LU, D.-M.; see SHEN, Y.	53
LÜ, F.; see GE, Y.	34
MAGHSOUDI, S.; see HEYDARPOUR, M.	508

MANCHON, D.; see CASTILLO-MEDINA, J.	368
MARQUES, D. and MOREIRA, C. G.; On a variant of a question proposed by K. Mahler concerning Liouville numbers	29
MOORS, W. B.; Fragmentability by the discrete metric	303
MOREIRA, C. G.; see MARQUES, D.	29
MOZGAWA, W.; see CIEŚLAK, W.	487
NARALENKOV, K. M.; Some comments on scalar differentiation of vector- valued functions	311
NGUYEN, H. N.; see DUKE, W.	400
PHONGPATTANACHAROEN, T.; see CHAOPRAKNOI, S.	104
PIGGOTT, A.; On groups presented by monadic rewriting systems with generators of finite order	426
PISZCZEK, K.; A Jordan-like decomposition in the noncommutative Schwartz space	322
PRAKITSRI, P.; see CHAOPRAKNOI, S.	104
REJALI, A.; see ABTAHI, F.	134
REN, W.; see WANG, S.	464
ROŠKARIČ, M. and TRATNIK, N.; Cardinality of inverse limits with upper semicontinuous bonding functions	167
ROTH, J.; A new result about almost umbilical hypersurfaces of real space forms	145
RUAN, H.-J. and XU, Q.; Fractal interpolation surfaces on rectangular grids	435
SHANG, Y.; see HOU, H.	1
SHEN, Y., ZHOU, G.-S. and LU, D.-M.; Homogeneous PBW deformation for Artin–Schelter regular algebras	53
SPURNÝ, J.; see KALENDA, O. F. K.	471
STEFANELLI, P.; see CATINO, F.	76
STOCKA, A.; see KREMPA, J.	241
SU, N. and WANG, Y.; On the $p$ -length and the Wielandt series of a finite $p$ -soluble group	219
SULTANOVA, N.; Aggregate subgradient smoothing methods for large scale nonsmooth nonconvex optimisation and applications	523
SUN, J.; see SUN, L.	264
SUN, L. and SUN, J.; A note on naturally ordered semigroups of transformations with invariant set	264
TERAI, N.; On exponential diophantine equations containing the Euler quotient	11
TRATNIK, N.; see ROŠKARIČ, M.	167
TREGUBOV, I.; The shallow water equations on the unit sphere with scattered data	519
WAHYUNI, S.; see FRANCE-JACKSON, H.	202
WANG, G.; see ZHANG, L.	116
WANG, S. and REN, W.; On the Aleksandrov–Rassias problem of distance preserving mappings	464

WANG, Y.; see SU, N.	219
WIJAYANTI, I. E.; see FRANCE-JACKSON, H.	202
WORONOWICZ, M.; see ANDRUSZKIEWICZ, R. R.	92
WU, A.-D. and HU, P.-C.; Uniqueness theorems for Dirichlet series	389
XIA, E. X. W.; A new congruence modulo 25 for 1-shell totally symmetric plane partitions	41
XU, Q.; see RUAN, H.-J.	435
YANG, X. and ZHAO, G.; A note on the Morse–Novikov cohomology of blow-ups of locally conformal Kähler manifolds	155
YAO, O. X. M.; Infinite families of congruences modulo 3 and 9 for bipartitions with 3-cores	47
YE, D.; see COOPER, S.	19
ZHANG, L., AHMAD, B. and WANG, G.; Successive iterations for positive extremal solutions of nonlinear fractional differential equations on a half-line	116
ZHANG, Y.; see HU, X.	177
ZHAO, G.; see YANG, X.	155
ZHENG, B.; see DONG, Y.	278
ZHOU, G.-S.; see SHEN, Y.	53

## INFORMATION FOR AUTHORS

The *Bulletin of the Australian Mathematical Society* aims at quick publication of original research in all branches of mathematics. To ensure speedy publication, only articles which are sufficiently well presented, able to be published without revision, and which are judged by the Editor (often in consultation with an Associate Editor) to be competitive are refereed. This policy is in the interests of authors, as a quick rejection is better than a slow rejection. The *Bulletin* receives more than five times the material that can be published, therefore there are many commendable papers not accepted. Editorial decisions on acceptance or otherwise are taken quickly, normally within a month of receipt of the paper. Papers are accepted only after peer review.

Manuscripts are accepted for review with the understanding that the same work is not concurrently submitted elsewhere. For a paper to be acceptable for publication, not only should it contain new and interesting results, but also

- (i) the exposition should be clear and attractive, and
- (ii) the manuscript should be in publishable form, without revision.

Further information regarding these requirements may be found through our website [www.austms.org.au/Bulletin](http://www.austms.org.au/Bulletin). Authors are asked to avoid, as far as possible, the use of mathematical symbols in the title.

Articles should be prepared in  $\LaTeX$  using  $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\LaTeX$  packages and submitted as a PDF file via our journal management system, at [www.austms.org.au/Publications/Submissions/BAustMS](http://www.austms.org.au/Publications/Submissions/BAustMS). This permits authors to track their papers through the editorial process. Recent versions of  $\TeX$  are able to produce PDF files directly. A  $\LaTeX$  class file for the *Bulletin* can be downloaded from the website. Authors who need assistance may email the secretary of the *Bulletin* at [editor@bulletin.austms.org.au](mailto:editor@bulletin.austms.org.au).

Authors are advised to keep copies of all files of the submitted article; the *Bulletin* will not accept responsibility for any loss.

## EDITORIAL POLICY

**1. References.** Arrange references alphabetically (by surname of the first author) and cite them numerically in the text. Ensure the accuracy of the references: authors' names should appear as in the work quoted. Include in the list of references only those works cited, and avoid citing works which are in preparation or submitted. Where the work cited is not readily accessible (for example, a preprint) a copy of the article should be included with your submission.

### 2. Abstracts.

1. Each paper must include an abstract of not more than 150 words, which should contain a brief but informative summary of the contents of the paper, but no inessential details.
2. The abstract should be self-contained, but may refer to the title.
3. Specific references (by number) to a section, proposition, equation or bibliographical item should be avoided.

**3. Subject Classification and Key Words.** Authors should include a few key words and phrases and one or more classification numbers, following the American Mathematical Society 2010 Mathematics Subject Classification for all codes. Details of this scheme can be found on the web at [www.ams.org/msc](http://www.ams.org/msc).

**4. Abstracts of PhD Theses.** The *Bulletin* endeavours to publish abstracts of all accepted Australasian PhD theses in mathematics. One restriction, however, is that the abstract must be received by the Editor within six months of the degree being approved.

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organisation established to promote the responsible management of the world's forests. Please see [www.fsc.org](http://www.fsc.org) for information.

## Table of Contents

<b>On the normalised Laplacian spectrum, degree-Kirchhoff index and spanning trees of graphs</b> <i>Huang, J. &amp; Li, S.</i>	353
<b>Unfolding the double shuffle structure of <math>q</math>-multiple zeta values</b> <i>Castillo-Medina, J., Ebrahimi-Fard, K. &amp; Manchon, D.</i>	368
<b>Uniqueness theorems for Dirichlet series</b> <i>Wu, A.-D. &amp; Hu, P.-C.</i>	389
<b>Infinite products of cyclotomic polynomials</b> <i>Duke, W. &amp; Nguyen, H. N.</i>	400
<b>Gaps in Taylor series of algebraic functions</b> <i>Dutter, S.</i>	412
<b>On commutativity of Banach algebras with derivations</b> <i>Ali, S. &amp; Khan, A. N.</i>	419
<b>On groups presented by monadic rewriting systems with generators of finite order</b> <i>Piggott, A.</i>	426
<b>Fractal interpolation surfaces on rectangular grids</b> <i>Ruan, H.-J. &amp; Xu, Q.</i>	435
<b>Hyperplanes of finite-dimensional normed spaces with the maximal relative projection constant</b> <i>Kobos, T.</i>	447
<b>On the Aleksandrov–Rassias problem of distance preserving mappings</b> <i>Wang, S. &amp; Ren, W.</i>	464
<b>On quantitative Schur and Dunford–Pettis properties</b> <i>Kalenda, O. F. K. &amp; Spurný, J.</i>	471
<b>Extremal perimeters of quadrangles in the Poncelet porism</b> <i>Cieślak, W. &amp; Mozgawa, W.</i>	487
<b>Domination conditions under which a compact space is metrisable</b> <i>Dow, A. &amp; Guerrero Sánchez, D.</i>	502
<b>The metric dimension of metric manifolds</b> <i>Heydari-pour, M. &amp; Maghsoudi, S.</i>	508
<b>Abstracts of PhD Theses</b>	
<b>Twisted topological graph algebras</b> <i>Li, H.</i>	514
<b>Bayesian models for spatio-temporal assessment of disease</b> <i>Kang, S. Y.</i>	516
<b>The shallow water equations on the unit sphere with scattered data</b> <i>Tregubov, I.</i>	519
<b>Detection, classification and analysis of events in turbulence time series</b> <i>Kang, Y.</i>	521
<b>Aggregate subgradient smoothing methods for large scale nonsmooth nonconvex optimisation and applications</b> <i>Sultanova, N.</i>	523
<b>Author Index for Volume 91</b>	525
