

## THE MATHEMATICAL ASSOCIATION

The fundamental aim of the Mathematical Association is to promote good methods of mathematical teaching. A member receives each issue of the *Mathematical Gazette* and/or *Mathematics in School* (according to the class of membership chosen), together with Newsletters. Reports are published from time to time and these are normally available to members at a reduced rate. Those interested in becoming members should contact MA Headquarters for information and application forms. The address of the Association Headquarters is **259 London Road, Leicester LE2 3BE, UK (telephone 0116 221 0013)**. The Association should be notified of any change of address. If copies of the Association periodicals fail to reach a member through lack of such notification, duplicate copies can only be supplied at the published price. If change of address is due to a change of appointment, the Association will be glad to be informed. Subscriptions should be submitted to the Treasurer via Headquarters. Correspondence relating to **Teaching Committee** should be addressed to Dr Chris Pritchard. The **Association's Library** is housed in the University Library, Leicester. Views expressed in the *Mathematical Gazette* by authors or advertisers are not necessarily those of the Association.

## THE MATHEMATICAL GAZETTE

### *Editor:*

Dr Gerry Leversha,  
St Paul's School,  
Lonsdale Road,  
London SW13 9JT  
*g.leversha@btinternet.com*

### *Problem Corner:*

Mr Nick Lord,  
Tonbridge School,  
Tonbridge,  
Kent TN9 1JP  
*njl@tonbridge-school.org*

### *Production Editor:*

Mr Bill Richardson,  
Kintail,  
Longmorn,  
Elgin IV30 8RJ  
*wpr3@tutor.open.ac.uk*

### *Reviews Editor:*

Dr Martin Griffiths,  
School of Education,  
University of Manchester, Oxford Road,  
Manchester M13 9PL  
*gazette-reviews@m-a.org.uk*

Potential advertisers should send an e-mail to: *advertisingcontroller@m-a.org.uk*

Material for publication should be sent to the Editor.

Books for review should be sent to Martin Griffiths.

### *Advice to authors of notes and articles.*

Study the format of articles in the *Gazette*. Please note the format for references, which should be listed in their order of appearance in an article. MSS should be typed and two copies submitted. (Mathematical expressions may be hand written.) Once an item has been accepted, electronic versions would be very helpful. This edition of the *Gazette* was produced on an Acorn machine using TechWriter and Draw.

## CONTENTS (continued)

### Notes 94.11 to 94.25 (continued)

Irrational roots revisited	<i>Scott Duke Kominers</i>	303
Evaluating the Euler constant	<i>JA Scott</i>	304
Proof without words: Two inequalities proved by convexity	<i>Angel Plaza and Sergio Falcon</i>	306
A calculus-based approach to the von Staudt-Clausen theorem	<i>Grzegorz Rządkowski</i>	308
An interesting constraint on cutting corners	<i>Nick Lord</i>	312
Grandma, grandaunts and distant cousins	<i>Anthony Sofo</i>	314
Proof without words: decompositions of $\binom{n+1}{2}$ and $n^2$	<i>Joe DeMaio</i>	317
Handshaking across a table	<i>Tony Crilly</i>	317
Sudoku is four-dimensional	<i>Andrew Jobbings</i>	321
Binomial within binomial yields binomial	<i>Tony Robin</i>	327
<b>Teaching Notes</b>		
Binomial averages when the mean is an integer	<i>Nick Lord</i>	331
The integral of $\frac{1}{x}$	<i>Glyn George</i>	332
<b>Correspondence</b>		335
<b>Feedback</b>		336
<b>Problem Corner</b>	<i>Nick Lord</i>	342
<b>Student Problems</b>	<i>Stan Dolan</i>	350
<b>In Memoriam</b>		353
<b>Reviews</b>		355

## CONTENTS

### Articles

How to choose your relations	<i>Tony Crilly and Colin Fletcher</i>	193
Optimising the acceleration due to gravity on a planet's surface	<i>Michael Jewess</i>	203
Integrating expressions of the form $\frac{\sin^n x}{x^m}$ and others	<i>J. Trainin</i>	216
An unexpected use of primes: solving sudokus by calculator	<i>Mark Spahn, Ron Lancaster, Deborah Moore-Russo and Gerald Rising</i>	224
Rugby conversions: a 3-dimensional model (The Bride's Chair) <sup>2</sup>	<i>Tony Crilly and Alan Pryor</i> <i>Nick Lord, John Rigby and Douglas Quadling</i>	233 239
Stop-sign theorems and binomial coefficients	<i>Peter Hilton and Jean Pedersen</i>	247
A footnote to the theory of double integrals	<i>Juan Pla</i>	262
Regarding a generalisation of Ioachimescu's constant	<i>Alina Sîntămărian</i>	270
<b>Notes 94.11 to 94.25</b>		
Visualising continued fractions	<i>Michael Z Spivey</i>	284
The non-existence of integer solutions to $py^2 = x^4 + x$	<i>Konstantine Zelator and Ovidiu Furdui</i>	290
Group theory lends a hand to number theory	<i>B. Sury</i>	294
On an identity involving binomial coefficients via $\arctan(x)$	<i>Thomas P. Dence</i>	296
Napier's table of logarithms	<i>Bob Burn</i>	299
