AIDS FOR THE DEAF

HAWKSLEY'S AURICLES

The best non-electric aid for slight and moderate degrees of deafness and specially suitable when the patient is suffering from Tinnitus.

For Extreme Cases—

HAWKSLEY'S "GREEN STRIPE" CONVERSATION TUBES

are very much more powerful and reliable than any electrical aid.

IMPORTANT NOTICE

to the Medical Profession and their Patients

We are the originators of a

10 DAYS' FREE HOME TRIAL,

without obligation to purchase, of any of our Acoustic Aids, and, in our opinion, this is the only fair and satisfactory method of selling such instruments to the public. We daily hear most distressing tales from deaf people who have been coerced into purchasing expensive aids without a proper home trial.

T. HAWKSLEY, LTD.

(ESTABLISHED 1869)

CHEVALIER JACKSON'S INSTRUMENTS FOR ŒSOPHAGOSCOPY, LARYNGOSCOPY, AND BRONCHOSCOPY

New Models as made for Walter G. Howarth, F.R.C.S.

Each Instrument is made in accordance with the details of Chevalier Jackson's most recent models, and each is supplied with a *spare light carrier*, i.e., 2 light carriers and 2 lamps. All the models have been redesigned with a view to rendering them more easily cleansed; all the crevices and corners for the dirt have been taken away.

To ensure better visibility the tips of the forceps are *black*.

The Howarth-Jackson's Instruments are **less expensive than other American or English models**, and a further economy has been effected by rendering the instrument tips interchangeable, thus reducing the number of forceps handles and tips required.

The lamps are 2.5 volt and more durable than the usual models.

Manufactured only by

DOWN BROS., L^{TD.}

The Choice of Medical Men

for their own deafness or to recommend to patients is the "Ardente" method because it is so entirely different, uncopyable, and carries a written lifelong guarantee and service of its originator—Mr R. H. Dent—not any mere selling agent or company.

It is the most complete method—the commonsense way and the only individual method. Made in a wide range of types—one is suited to the individual needs of the patient and only when tested and found suitable is the right type completed and supplied. Interest is taken and adjustments made in accordance with any changed condition of hearing of the user.

"Ardente" is also the Choice of

Prof. SIR AMBROSE FLEMING, Kt., M.A., B.Sc., F.R.S.
Col. SIR HENRY KNOLLYS, K.C.V.O.

The late Gen. BRAMWELL BOOTH, C.H., and
Major F. E. VERNEY, M.C.

and many leading medical men—professional etiquette makes it necessary for us to withhold their names. "ARDENTE" is shown and appreciated at every B.M.A. meeting and every improvement is made in direct collaboration after test and consultation with eminent medical men and scientists. No distinguished name used is that of a staff-member—all are of deaf people themselves lending their names and experience for the benefit of fellow-sufferers without personal gain or profit.

All are men of knowledge and world-wide experience, able to judge and have the BEST.

"Ardente" is the choice of every important medical journal and TRUTH and for use at Hospitals and supplied through charities, Government Departments (also used by government officials).

Behind "ARDENTE" is a personality—his interest is yours, his success built by his users who chose "Ardente" on its merits—

"Ardente" can be tested Free at any of our SERVICE BUREAUX—the most complete in the whole deaf world—or at Doctors' surgeries or patients' homes any day any time—week-ends and evenings if preferred. Please send for particulars—we will be happy to arrange a free demonstration to you at your or any of our addresses if Deaf yourself or interested on behalf of patients.

Mr Dent is the inventor of "Ardente."

Mr Dent is the pioneer of individual ear-fitting.

Mr Dent is the originator of the "Free Home Test."

The most Complete and Extensive Service for the Deaf under personal supervision

**New Catalogue
of
ACOUSTIC
INSTRUMENTS**

Illustrating the most modern "Aids for the Deaf," electrical and non-electrical, will shortly be issued.

A valuable reference book for the Aurist.

Will be forwarded free on application.

The New OTOAUDION

An instrument of entirely new design for estimating **Exactly** the amount of error in a patient's hearing. Also indicates the **Type** of deafness present. Enables tests to be made not only at certain definite tones, but at **All** frequencies.

Sounds are produced by means of an Oscillating Valve on the principle of a wireless valve receiver.

EASY TO USE AND MAINTAIN

Special features include a Moving Coil Loud Speaker which reproduces low tones of 30 frequencies or under, perfectly.

Full particulars with illustration on request

THE GOLDEN SQUARE THROAT, NOSE AND EAR HOSPITAL LONDON, W.1

HONORARY MEDICAL STAFF

Surgeons

Mr T. JEFFERSON FAULDER	Mr THEODORE JUST
Mr LIONEL COLLEDGE	Mr F. C. ORMEROD
Mr GILBERT CHUBB	Mr A. R. DINGLEY

Assistant Surgeons

Mr SANDIFORD	Mr WILSON
Mr HOWELLS	Mr BEARDS

The Hospital has recently undergone very extensive reconstruction and extension, and now has 73 beds for In-patients and an annual Out-patient attendance of about 60,000.

CLINICAL INSTRUCTION

Clinical Instruction in the Diagnosis and Treatment of Diseases of the Ear, Nose and Throat is daily given in the Out-patient Department from 2 to 5 p.m. On Tuesdays and Fridays from 6.30 to 8 p.m. also. Major operations are performed daily, except Saturdays, in the In-patient Operating Theatres. Minor operations are performed in the Out-patient Department by the Assistant Surgeons on three mornings a week.

Practitioners and Medical Students are admitted to the practice of the Hospital, and Clinical Assistants, whose duty it is to assist the staff, are appointed from time to time among them. For further information apply to the Dean, Mr F. C. ORMEROD.

THE DENVER CHEMICAL MFG. CO.
LONDON, E. 3

The Journal of Laryngology and Otology

(Founded in 1887 by MORELL MACKENZIE and NORRIS WOLFENDEN)

EDITED BY
WALTER HOWARTH

ASSISTED BY
V. E. NEGUS AND F. W. WATKYN-THOMAS

1. Original Articles are accepted on the condition that they have not been published elsewhere.

2. Manuscripts should be typewritten, on one side only of the paper, and well spaced.

3. Galley proofs and engraver's proofs of illustrations are sent to the author. Corrections, which should be kept to a minimum, must be clearly marked and no additional matter should be added.

4. The order for reprints should be sent when returning galley proofs, and for this purpose special forms are supplied, on which the price of the reprints is stated.

5. Authors of Original Communications on Oto-Laryngology in other Journals are invited to send a copy, or two reprints, to the *Journal of Laryngology*. If they are willing, at the same time, to submit their own abstract (in English, French, Italian, or German) it will be welcomed.

6. Editorial Communications should be addressed to "EDITOR, *Journal of Laryngology*, c/o Messrs OLIVER AND BOYD, Tweeddale Court, Edinburgh."

7. The Annual Subscription is Forty Shillings, post free, and is payable in advance.

8. Single copies of back numbers, both of the present and the previous series, are on sale at Four Shillings each.

9. An Annual Subscription can be commenced with any number of the Journal, and the preceding numbers of the current year can be purchased at Four Shillings each.

UNITED STATES OF AMERICA

Orders for this Journal, for single parts or yearly subscriptions, can be sent either through a local bookseller, or to Messrs G. E. STECHERT & CO., 31-33 East 10th Street, New York.
