

# College Seminars Series

*College Seminars* is a series of textbooks covering the breadth of psychiatry. As well as helping junior doctors during their training years, *College Seminars* will make a contribution to the continuing medical education of established clinicians.

---

## Seminars In Psychiatric Genetics

*By P. McGuffin, M.J. Owen, M.C. O'Donovan, A. Thapar & I.I. Gottesman*

Comprehensive coverage of what is known of the genetics of psychiatric disorders, and an introduction to the relevant quantitative and molecular genetic methods.

£10.00, 240pp, 1994, ISBN 902241 65 6

## Seminars in Basic Neurosciences

*Edited by Gethin Morgan & Stuart Butler*

This book will appeal to anyone needing to update their knowledge of the neurological aspects of anatomy, physiology, pharmacology, psychology, pathology, endocrinology and radiology.

£15.00, 336pp, 1993, ISBN 0902241 61 3

## Seminars in Psychology and the Social Sciences

*Edited by Digby Tantam & Max Birchwood*

In some instances the links between clinical practice and the most recent theories considered in this book have yet to be made. However, over the next decade these are likely to dominate the research and service agenda, such as ethnicity as a determinant of health care, connectionist models of mental functioning, and the effects of sex and gender on mental health. For the trainee as well as for the clinician looking for new paradigms in the social sciences, the book will prove an essential source.

£17.50, 358pp, 1994, ISBN 0 902241 62 1

## Seminars in Child and Adolescent Psychiatry

*Edited by Dora Black & David Cottrell*

From assessment to outcome, from normal development to unusual syndromes, from theoretical perspectives to treatment, the reader will find this a clear, concise, and invaluable overview of the field.

£15.00, 298pp, 1993, ISBN 0902241 55 9

## Seminars in Alcohol and Drug Misuse

*Edited by Jonathan Chick & Roch Cantwell*

A clear review of the aetiology, epidemiology, treatment and prevention of dependence on and misuse of alcohol and illicit and prescribed drugs is presented. With a balance of theory, recent research and practical clinical guidelines, the book covers specific and common problems in mental health as well as in general medicine.

£13.50, 246pp, 1994, ISBN 0 902241 70 2

## Titles in preparation

■ Psychopharmacology ■ Adult Psychiatric Disorders ■ Learning Disorders and Disabilities ■ Practical Forensic Psychiatry

The books in this series, and other Gaskell publications, are available from the Publications Department, Royal College of Psychiatrists, 17 Belgrave Square, London SW1X 8PG (Tel. 0171 235 2351)

**Abbreviated Prescribing Information: LUSTRAL® (sertraline)**  
**Presentation:** Tablets containing 50mg or 100mg sertraline. **Indications:** Treatment of symptoms of depressive illness. Prevention of relapse or recurrence of depressive episodes. **Dosage:** LUSTRAL should be given as a single daily dose with food. The initial dose is 50mg and the usual therapeutic dose is 50mg or 100mg daily. Dosage can be further increased, if appropriate, to 150mg or a maximum of 200mg daily. Patients should be maintained on the lowest effective dose and doses of 150mg or more should not be used for periods exceeding 12 weeks. **Use in children:** Not recommended. **Use in the elderly:** Usual adult dose. **Contra-indications:** Hypersensitivity to LUSTRAL. Hepatic and renal insufficiency. **Use during pregnancy:** LUSTRAL should be used only if clearly needed. **Lactation:** Not recommended. **Precautions, warnings:**

Unstable epilepsy, E.C.T., driving. LUSTRAL should be discontinued in a patient who develops seizures. LUSTRAL should not be administered to patients concurrently being treated with tranquilizers who drive or operate machinery. Do not use with, or within two weeks of ending treatment with, MAOIs. At least 7 days should elapse before starting any MAOI following discontinuation of LUSTRAL. **Drug interactions:** Administer with caution in combination with other centrally active medication (e.g. lithium, tryptophan). Although LUSTRAL has been shown to have no adverse interaction with alcohol, concomitant use with alcohol is not recommended. The potential for LUSTRAL to interact with other highly protein bound drugs should be borne in mind. The potential of LUSTRAL to interact with e.g. digoxin, warfarin, propranolol and phenytoin has not been fully assessed. **Side-effects:** Dry mouth, nausea, diarrhoea/loose

stools, ejaculatory delay, tremor, increased sweating, dyspepsia, insomnia and somnolence. Asymptomatic elevations of serum transaminases resulting in discontinuation of therapy have occurred infrequently in clinical trials. These occurred predominantly at doses greater than 100mg (approximately 1.3% of patients) and resolved on cessation of therapy. Malaise and rashes have been reported. Seizures (see precautions, warnings). There have been isolated reports of movement disorders and rare cases of hyponatraemia. **category:** POM. **Basic NHS cost:** 50mg tablet (PL 57/0308) pack of 28, £26.51; 100mg tablet (PL 57/0309) Calendar pack of 28, £39.77. Further information on request. INVICTA\* Pharmaceuticals, A Division of Pfizer Limited, Sandwich, Kent. \*Trade Mark
