## ACUTE RESPIRATORY DISEASES

In the management of

**SIMPLE COLD · INFLUENZA · BRONCHITIS**

and in chest conditions, as pneumonia, Antiphlogistine Dressing is an effective and suitable method of treatment.

Its physiological action on inflammatory areas is that of hyperaemia, which acts as a decongestant, an analgesic and corrective agent, promoting elimination of the toxic products and an improvement in the clinical picture.

# GUY'S SILENT SUCTION APPARATUS

as made for

WM. MAYHEW MOLLISON, C.B.E., F.R.C.S.

“An efficient *silent* suction apparatus is essential in many throat investigations and operations and indeed is used for many operations on other parts of the body.

“The above illustration shows an Electric Suction Apparatus which can rightly claim to be more efficient than the apparatus generally in use. The suction is continuous and so powerful that clots of blood and the most tenacious mucus are quickly removed. The apparatus is quiet and can easily be moved about the operation theatre and from one theatre to another. It is possible to use it for intra-tracheal

insufflation at the same time as suction since the pump delivers sixty litres of air per minute. The valves in the cylinder head are strong and specially designed for silence in operation and the sump of the machine carries enough oil for six months' continuous use; this ensures efficiency with the minimum of attention. The entire unit is mounted in a robust mahogany case which is fitted with four rubber-tyred castors. On the side of the case two large screw necked bottles are mounted. These bottles are the commercial “Kilner” type and can therefore be replaced with the minimum of expense. Blood and other fluids are removed from the operating field by the suction plant and find their way into the big bottle. The second bottle is a safety trap in the unlikely event of the first bottle becoming full at a moment when it is inconvenient to change it.

“There are no resistances to regulate the speed and in order to use the apparatus it is only necessary to connect it to the main electrical supply.” The makers are Down Bros., Ltd., London.

# The Journal of Laryngology and Otology

(Founded in 1887 by MORELL MACKENZIE and NORRIS WOLFENDEN)

EDITED BY

WALTER HOWARTH

ASSISTED BY

V. E. NEGUS AND F. W. WATKYN-THOMAS

1. Original Articles are accepted on the condition that they have not been published elsewhere.
2. Manuscripts should be typewritten, on one side only of the paper, and well spaced.
3. Galley proofs and engraver's proofs of illustrations are sent to the author. Corrections, which should be kept to a minimum, must be clearly marked and no additional matter added.
4. Orders for reprints should be sent when returning galley proofs, and for this purpose special forms are supplied, on which the price of the reprints is stated.
5. Authors of Original Communications on Oto-Laryngology in other Journals are invited to send a copy, or two reprints, to the *Journal of Laryngology*. If they are willing, at the same time, to submit their own abstract (in English, French, Italian, or German) it will be welcomed.
6. Editorial Communications may be addressed to THE EDITOR, *Journal of Laryngology*, c/o HEADLEY BROTHERS, 109 Kingsway, London, W.C.2.
7. The Annual Subscription commencing with the January issue is Two Pounds sterling, post free, and is payable in advance.
8. Single copies, both of the present and the previous series, are on sale at Four Shillings each.
9. All Subscriptions, advertising and business communications should be sent to the Publishers, HEADLEY BROTHERS, 109 Kingsway, London, W.C.2.

*United States of America*

Orders for this Journal, for single parts or yearly subscriptions, may be sent either through a local bookseller, or to Messrs. G. E. STECHERT & Co., 31-33 East 10th Street, New York.

Please mention *The Journal of Laryngology* when replying to advertisements

## BINDING

### Journal of Laryngology & Otology

Subscribers wishing to have their Journals bound can do so by sending them to the Publishers.

Volumes are strongly bound in whole dark blue buckram cases, with gilt tops and gold lettering on spine. The cost of binding is 8s. 6d. per volume including postage.

Any missing parts can be supplied at 4s. each, or the whole volume, complete in the above binding, for 45s. 6d.

Publishers' cases can be supplied for 3s. 6d.

---

**HEADLEY BROTHERS, 109 KINGSWAY, LONDON, W.C.2**

### The Catalogue of the Onodi Collection

describes and illustrates the famous collection which is now in the Museum of the Royal College of Surgeons of England.

Copies, strongly bound in library cloth and containing 132 pages of descriptive matter and 45 plates, may be obtained for 10/- post free.

Copies of a wallet containing the plates only, printed especially for demonstration purposes, and for use in an epidiascope, can be obtained for 5/- post free.
