**ONCE AGAIN THE MEETING OF EAST AND WEST**  
*An Inquiry Concerning World Understanding*  
IN PRINT by F.S.C. NORTHROP

This classic remains one of the most profound efforts to see international relations in terms of philosophical and cultural foundations. The great range and depth of scholarship gives the book a special status among modern works on political philosophy.

"I call the book great, difficult, and important. . . . The book is great because its theme is great. It is important because it is, so far as I know, the only book by an American philosopher to state the fundamental ideological conflicts in world culture. It is difficult because the problem is immense. . . ."

## **Nonproliferation and U.S. Foreign Policy**

JOSEPH A. YAGER, *Editor*

Checking the proliferation of nuclear weapons—a long-time objective of U.S. foreign policy—has become increasingly difficult as more and more countries acquire the technological expertise to produce them. In this volume, the authors examine the present and future policies on nuclear weapons of several countries grouped by region: Japan, South Korea, and Taiwan; India, Pakistan, and Iran; Israel and Egypt; Brazil and Argentina; and South Africa. The book concludes with an evaluation of U.S. policy choices in pursuing the goal of nonproliferation both in these countries and more generally.

## ***Collective Insecurity***

**The United States and the League  
of Nations During the Early Thirties**

**GARY B. OSTROWER**

Focusing on the Manchurian Crisis when the League first tested the collective security idea, the author discovers an international impulse neglected in standard accounts of U.S. policy during the 1930s.

"an important and well-crafted work. . .As a result of Ostrower's painstaking scholarship. . .students of American foreign policy will want to re-evaluate their understanding of this period."
