Invest in a Marquette defibrillator, get the company free

M0233IE0

When you buy a defibrillator from Marquette Electronics, you get more than a state-of-the-art piece of equipment. You also get the commitment of a long-established medical electronics company with an unsurpassed record of standing behind its products.

Marquette is a world leader in the manufacture of advanced diagnostic cardiology equipment, critical care monitoring systems and defibrillators. Our innovations have set industry standards for a quarter of a century.

Marquette's Emergency Care Division supplies a wide range of advanced hospital and pre-hospital defibrillators through direct sales offices to over 50 countries worldwide, including the United Kingdom. Our pre-hospital care defibrillators have set a standard for all other manufacturers. Our Responder 1500, for example, incorporates the most accurate simultaneous 12-lead ECG analysis system in the world.

So when you buy a Marquette defibrillator you not only get one of the most advanced defibrillators available, you are also purchasing more than 25 years of standard-setting innovation and experience in medical electronics along with a company that stands firmly behind its products.

The National Conference on EMS Law and Policy

October 19-20, 1991

HYATT REGENCY WASHINGTON on Capitol Hill
WASHINGTON, D.C.

Sponsored by JEMS Communications and The Conference Corporation

The clinical aspects of EMS continue to expand, bringing increasingly sophisticated care to victims of sudden and unexpected illness and injury. Does the law promote this progress or obstruct it? Is the public represented and protected in the policy that defines and governs prehospital emergency care? Through 20 years of medical-legal experience, have trends developed that might affect EMS policies, practices and procedures? Join James O. Page, Esq., and many other prominent members of the legal and EMS communities to explore the current status of EMS Law and Policy.

For the first time in 16 years, a national conference will explore the interfaces between the medical science of pre-hospital emergency medical care and the law and policy which authorizes, defines, and funds it.

Topics include:

- The national experience with EMS lawsuits
- Living wills, DNR orders and durable powers of attorney in the prehospital setting
- Quality assurance as a function of risk management
- Emergency Medical Dispatching—40 million calls without a claim
- What trial lawyers want in an expert witness
- Gross negligence and “Good Samaritan” protections
- To restrain or avoid: Legal risks presented by dangerous, abusive or disruptive patients
- COBRA/OBRA—Is it making a difference?
- Spinal Injury—The legal consequences
- Quality Assurance records: discoverable, admissible, confidential?

A conference for CEOs, Administrators, Instructors, Medical Directors, Supervisors and Attorneys who represent EMS Services

Yes! *I'd like to receive information on The National Conference on EMS Law and Policy.*

The Disposables You'll Hate To Throw Away

Ferno's disposable immobilization devices are made with the same high quality and attention to detail as our other products, only these devices are carefully designed for single-patient use.

The Cervi VII and HeadHugger immobilization devices are constructed of a strong corrugated material that is biodegradable and treated for fluid resistance. They are lightweight and easy to store, yet rigid enough to meet the rigors of emergency rescue. Both are economical, so you can afford to have plenty on hand.

Disposable Cervi VII™ Extrication Collars, Model 454 —
Excellent support at an affordable price!

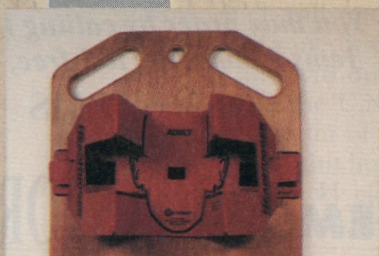

- comes in three sizes color-coded for convenience
- easy to apply with hook-and-loop closures
- ideal to have on hand for mass-casualty incidents

HeadHugger™ Disposable Head Immobilizer, Model 455 —
A low-cost method of immobilization!

- takes less than a minute to apply
- stores on backboard ready for use
- ample access for monitoring ears and scalp

Find out more!

Call Ferno for details at 800-541-8360.

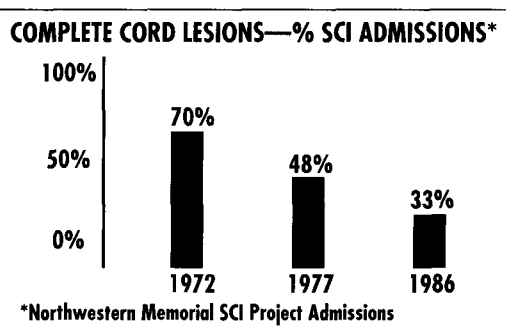

You Can Make A Difference

Cervical Spine Issues in Prehospital Medicine

An educational videotape by Ron Stewart, MD

Every year, 13,000 Americans suffer a spinal cord injury. Of those victims, 8,000 survive thanks to advances in the study of cervical spine issues.

Dr. Stewart examines the history of spinal cord injury (SCI) and presents some startling numbers on the changing face of SCI treatment in the prehospital setting. Learn the facts about SCI and how you can make a difference.

Spinal cord injury (SCI) registries reveal a consistent decline in the number of patients with complete cord lesions presenting to hospitals caring for SCI. In 1972, some 70 percent of patients presenting to major SCI centers had complete cord lesions, compared to 48 percent in 1977 and 33 percent in 1986. Many would attribute much of this decline to improved training, procedures, and equipment of prehospital care personnel.

Cervical Spine Issues in Prehospital Medicine is a non-profit videotape produced by California Medical Products in conjunction with Emergency Medical Update. Proceeds from the sale of every tape go to support research conducted by the National Association of EMS Physicians.

Cervical Spine Issues in Prehospital Medicine: \$49.95
