THE REVIEW OF SYMBOLIC LOGIC
Information for Contributors

Aims and Scope. The *Review of Symbolic Logic* is an established journal from the Association for Symbolic Logic, published in partnership with Cambridge University Press. *The Review of Symbolic Logic* will publish papers in: philosophical and non-classical logics, algebraic logic, and their applications in such fields as computer science, linguistics, game theory and decision theory, formal epistemology, and cognitive science; history and philosophy of logic; philosophy and methodology of mathematics, past and present.

Submission of Manuscripts. Authors are directed to http://aslonline.org/journals/the-review-of-symbolic/the-review-of-symbolic-logic-submission-guidelines/ for guidelines and instructions for submissions.

Electronic Manuscripts. The publisher encourages submission of manuscripts in LaTeX which can be used for direct typesetting. Authors using LaTeX should use the RSL LaTeX class file. This along with related files, can be obtained using anonymous FTP from ftp://ftp.cambridge.org/pub/texarchive/journals/latex/rsl-cls. If you have difficulties obtaining these files please contact dtranah@cambridge.org; there is also a help-line available via email– please contact texline @cup.cam.ac.uk. While use of the RSL class file is preferred, plain LaTeX or TeX files can also be accepted.

Layout of Manuscripts. Manuscripts should begin with an abstract of not more than 300 words. Papers should conform to a good standard of English prose; please consult a style guide such as *The Elements of Style* by Strunk and White (New York: Macmillan). Do not begin sentences with a symbol or identifier name. Present programs in one of two styles: either with identifiers in italics and keywords in bold, or entirely in a fixed-width teletype font. Please supply Web URLs for the home page of each author of the paper.

References. The Harvard system of references should be used. Citations are by author's surname and year of publication, and may stand either as a noun phrase (e.g., "Curry (1993) ") or as a parenthetical note (e.g., "(Curry 1933)"). List references at the end of the text in alphabetical order. A typical entry is: Curry, H.B. (1933) Apparent variables from the standpoint of mathematical logic, *Ann. of Math*., 34 (2): 381– 404.

Artwork. To ensure that your figures are reproduced to the highest possible standards, Cambridge Journals recommends the following formats and resolutions for supplying electronic figures. LINE ARTWORK Format: tif or eps; Resolution: 1200 dpi. BLACK AND WHITE HALFTONE Format: tif; Resolution: 300 dpi. COMBINATION ARTWORK Format: tif; Resolution: 800 dpi. If you require further guidance on creating suitable electronic figures please visit http://dx.sherid an.com/guidelines/digital_art.html. Here you will find extensive guidelines on preparing artwork and gain access to an online preflighting tool where you can check to see if your figures are suitable for reproduction. If you're not providing the paper in LaTeX, please supply a list of figure captions in a separate file.

Copyediting and Proofreading. The publisher reserves the right to copyedit and proofread all articles for publication, but the corresponding author will receive page proofs for final proofreading. These should be checked and returned within three days of receipt. Only typographical or factual errors may be changed at the proof stage. The publisher reserves the right to charge authors for excessive correction of non-typographical errors.

Offprints. No paper offprints are provided, but the corresponding author will be sent a link to the pdf of the published article.
