

The Journal of Laryngology and Otology

EDITED BY
SIR GEOFFREY BATEMAN

ASSISTANT EDITOR
JOHN BALLANTYNE

Contents

✓ Congenital syphilitic deafness	A. G. KERR, G. D. L. SMYTH, and M. J. CINNAMOND	1 ✓
✓ Malignant (necrotizing) otitis externa	I. T. G. EVANS and S. H. RICHARDS	13 ✓
✓ Round window occlusion in otosclerosis	HENRY GRANT	23 ✓
Tympanoplasty: Factors in post-operative assessment	J. B. BOOTH	27 ✓
✓ External injuries to the larynx	E. KOTARBA	69 ✓
Clinical records—		
✓ Angio-osteohypertrophy syndrome with fibrous dys- plasia	CARLOS DANTAS	77 ✓
✓ Hodgkins disease of maxilla	R. M. TIWARI	85 ✓
✓ Multiple osseous metastases in hypopharyngeal car- cinoma	P. L. BHATIA, R. L. MATHUR, and H. K. JAIN	89 ✓
✓ Sarcoma of the ear in children—Two case histories .	J. T. BUFFIN and R. BUCK-BARRETT	95 ✓
General notes		99

The Journal of Laryngology and Otology

(FOUNDED in 1887 by MORELL MACKENZIE and NORRIS WOLFENDEN)

EDITED BY
SIR GEOFFREY BATEMAN

ASSISTANT EDITOR
JOHN BALLANTYNE

1. Original articles which have not been published elsewhere are invited and should be sent to the Editor. They are considered for publication on the understanding that they are contributed to this *Journal* solely. Reproduction elsewhere, in whole or in part, is not permitted without the previous written consent of the Author and Editor and the customary acknowledgement must be made.

2. Manuscripts should be typewritten, on one side only of the paper, and well spaced. Captions to illustrations should be typed on a separate sheet and sent at the same time as original photographs, etc.

The Harvard system of recording references should be used, e.g. GREEN, C., and BROWN, D. (1951), *Journal of Laryngology and Otology*, 65, 33. The titles of all Journals should be given without abbreviation.

It is most important that authors should verify personally the accuracy of every reference before submitting a paper for publication.

3. Galley proofs and engraver's proofs of illustrations are sent to the author. Corrections, which should be kept to a minimum, must be clearly marked, and no extra matter added. Proofs should be returned within 5 days.

4. Illustration blocks will normally be held by the Printers for three years, after which they will be destroyed. Any author is entitled to have these returned to him, but a request for this must be sent within three years of the appearance of the article, to HEADLEY BROTHERS LTD., The Invicta Press, Ashford, Kent. Coloured illustrations will be charged to authors, unless a special grant is authorized by the Editor.

5. Orders for reprints must be sent when returning galley proofs, and for this purpose special forms are supplied.

6. Editorial communications may be addressed to THE EDITOR, *Journal of Laryngology*, c/o HEADLEY BROTHERS LTD., The Invicta Press, Ashford, Kent.

7. The annual subscription is £8 (eight pounds sterling) post free; U.S.A. \$23 post free, and payable in advance.

8. Single copies of current or back numbers (when available) will be on sale at £1 (including postage) each.

9. All subscriptions, advertising and business communications should be sent to the publishers, or subscription agents.

AMPLIVOX 84

The successor to the world's most widely used clinical Audiometer.

**Take a look at all the advantages you get
with this superb audiometer.**

- *Pure tone at eleven frequencies—now including 750 Hz*
 - *Bone conduction at eight frequencies*
 - *Narrow band masking via insert and headphones*
 - *Automatic presentation*
 - *ISO specification*
 - *Trimpot calibration*
 - *Continuously variable second channel for ABLB (Fowler) recruitment test*
 - *Tone decay test*
 - *Illuminated patient's signal*
- PLUS Calibrated speech audiometry via microphone or tape.**

Write now for illustrated brochure to :

AMPLIVOX HEARING CONSERVATION LTD

Beresford Avenue, Wembley, Middx. HA0 1RU. Phone: 01-902 8991

Sudafed clears noses, leaves minds alert.

Unlike many decongestants SUDAFED* does not cause drowsiness because it contains no antihistamine. SUDAFED leaves your patient breathing clearly . . . and thinking clearly.

Each SUDAFED tablet contains 60 mg of pseudoephedrine hydrochloride.

Also available SUDAFED Elixir containing 30 mg pseudoephedrine hydrochloride in each 5 ml.

Sudafed oral decongestant

Oto-, Rhino-, Laryngology

*Important, up-to-date, and scientifically accurate abstracts
of reports from the world's biomedical literature dealing with
Oto-, Rhino-, Laryngology
are brought to your desk in this monthly publication.*

*First published in 1948,
Oto-, Rhino-, Laryngology currently contains some 4,750 abstracts each year.*

MAIN CHAPTER HEADINGS

- | | |
|------------------------------------|--------------------------------------|
| 1. SKULL | 16. NASOPHARYNX |
| 2. FACE AND LIPS | 17. NASAL SINUSES |

ALLERGIC RHINITIS

A completely fresh approach

The unique way in which sodium cromoglycate prevents asthmatic reactions has been the subject of over 150 clinical trials. Prompted by this success, more recent investigators have shown that, in the form of RYNACROM, sodium cromoglycate has a similar protective effect on the nasal mucosa and can provide year-round prophylaxis in allergic rhinitis.²

RYNACROM is not a decongestant, anticholinergic, antihistamine or steroid. Its action is unlike any other form of treatment.

In the face of challenge – pollen, house dust, feathers, pets, etc – RYNACROM (sodium cromoglycate) prevents the degranulation of those cells which normally rupture and release histamine and inflammatory agents. Thus regular insufflation of RYNACROM provides continuous prophylaxis from a condition which, hitherto, has been difficult to control symptomatically and even more difficult to prevent. A number of patients who

have failed to respond to other forms of treatment have greatly benefited from RYNACROM!

RYNACROM does not produce inconvenient side effects associated with conventional therapy.

ZEISS

Cine adapter with automatic diaphragm setting

The new cine adapters for the Beaulieu 16mm and Super 8mm cameras makes cinephotography with all ZEISS operation microscopes easier, faster and safer.

All factors for the diaphragm setting, such as primary magnification on the film, object illumination, film speed and exposure frequency, are automatically adjusted.
