CAMBRIDGE JOURNALS

JFM FAST TRACK HAS EVOLVED

JFM RAPIDS

- Faster publication
- Greater visibility for papers
- Freely available to all for the first year

For more information visit

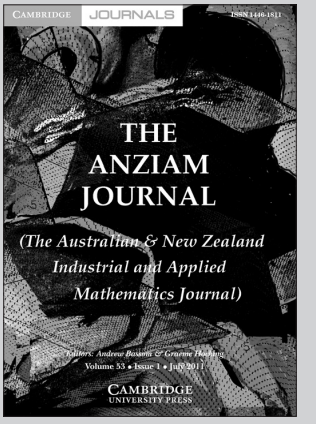
CAMBRIDGE JOURNALS

The ANZIAM Journal

Published for
The Australian Mathematical Society



Editors-in-Chief
A. Bassom, *The University of Western Australia, Australia*
G. C. Hocking, *Murdoch University, Australia*

The ANZIAM Journal considers papers in any field of applied mathematics and related mathematical sciences with the aim of rapid publication in print and electronic formats. Novel applications of mathematics in real situations are especially welcomed. All papers should include some indication of applicability, and an introduction that can be understood by non-specialist readers from the whole applied mathematical community.

The ANZIAM Journal is available online at:
http://journals.cambridge.org/anz

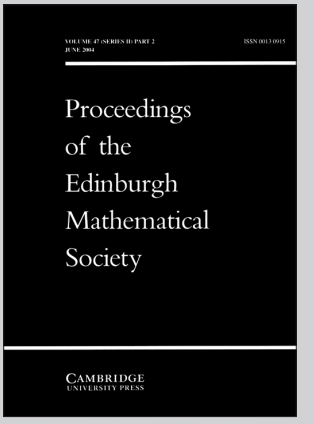
CAMBRIDGE JOURNALS

Proceedings of the Edinburgh Mathematical Society

Published for The Edinburgh Mathematical Society

Editorial Management
The Secretary, *ICMS, Edinburgh, UK*



The Edinburgh Mathematical Society was founded in 1883 and over the years, has evolved into the principal society for the promotion of mathematics research in Scotland. The Society has published its Proceedings since 1884. This journal contains research papers on topics in a broad range of pure and applied mathematics, together with a number of topical book reviews.

CAMBRIDGE UNIVERSITY PRESS

https://doi.org/10.1017/jfm.2013.266 Published online by Cambridge University Press

681 Formation, growth and instability of vortex pairs in an axisymmetric stagnation flow
J. J. Wang, C. Pan, K.-S. Choi, L. Gao & Q.-X. Lian

709 The dynamics of a non-dilute vesicle suspension in a simple shear flow
H. Zhao & E. S. G. Shaqfeh

JFM Rapids (online only)

R1 Reflections on dissipation associated with thermal convection
T. Alboussière & Y. Ricard

S indicates supplementary data or movies available online.

ISSN 0022-1120

Journal of Fluid Mechanics

25 June 2013

1 Sensitivity of stratified turbulence to the buoyancy Reynolds number
P. Bartello & S. M. Tobias

23 Pressure losses in grooved channels
A. Mohammadi & J. M. Floryan

55 Balance model for equatorial long waves
I. H. Chan & T. G. Shepherd

91 A simplified vortex model of propeller and wind-turbine wakes
A. Segalini & P. H. Alfredsson

117 Inertial and barotropic instabilities of a free current in three-dimensional rotating flow
G. F. Carnevale, R. C. Kloosterziel & P. Orlandi

152 Physical processes influencing acoustic radiation from jet engine inlets
C. K. W. Tam, S. A. Parrish, E. Envia & E. W. Chien

195 Two-dimensional magnetohydrodynamic turbulence in the limits of infinite and vanishing magnetic Prandtl number
C. V. Tran, X. Yu & L. A. K. Blackbourn

216 Shear-induced mixing in geophysical flows: does the route to turbulence matter to its efficiency?
A. Mashayek & W. R. Peltier

262 The stably stratified Taylor–Couette flow is always unstable except for solid-body rotation
J. Park & P. Billant

281 Spatial structure of spectral transport in two-dimensional flow
Y. Liao & N. T. Ouellette

299 Flow of a viscous nematic fluid around a sphere
M. Gómez-González & J. C. del Álamo

332 Spectral non-locality, absolute equilibria and Kraichnan–Leith–Batchelor phenomenology in two-dimensional turbulent energy cascades
B. H. Burgess & T. G. Shepherd

372 Growth rate of a shocked mixing layer with known initial perturbations
C. R. Weber, A. W. Cook & R. Bonazza

402 Faraday instability in floating liquid lenses: the spontaneous mutual adaptation due to radiation pressure
G. Pucci, M. Ben Amar & Y. Couder

428 Electromagnetically driven zonal flows in a rapidly rotating spherical shell
R. Hollerbach, X. Wei, J. Noir & A. Jackson

446 Moffatt-type flows in a trihedral cone
J. F. Scott

462 Droplet motion on inclined heterogeneous substrates
N. Savva & S. Kalliadasis

492 The classical hydraulic jump in a model of shear shallow-water flows
G. L. Richard & S. L. Gavrilyuk

522 Control of amplifier flows using subspace identification techniques
F. Juillet, P. J. Schmid & P. Huerre

566 Spreading and bistability of droplets on differentially heated substrates
J. B. Bostwick

588 Dense gravity currents moving beneath progressive free-surface water waves
T. O. Robinson, I. Eames & R. Simons

611 Emulsion flow through a packed bed with multiple drop breakup
A. Z. Zinchenko & R. H. Davis

S 664 Reynolds-number measurements for low-Prandtl-number turbulent convection of large-aspect-ratio samples
J. Hogg & G. Ahlers

Contents continued on inside back cover.
