Plant Genetic Resources: Characterization and Utilization

Volume 9 2011 ISSN: 1479-2621

Aims and Scope

The journal provides a forum for describing the application of novel genomic technologies, as well as their integration with established techniques, towards the understanding of the genetic variation captured in both *in situ* and *ex situ* collections of crop and non-crop plants; and for the airing of wider issues relevant to plant germplasm conservation and utilisation. We particularly welcome multi-disciplinary approaches that incorporate both a technical and a socio-economic focus.

Technical aspects can cover developments in technologies of potential or demonstrated relevance to the analysis of variation and diversity at the phenotypic and genotypic levels; the development of rational germplasm collection, evaluation and conservation strategies; and the impact of crop genetic modification and biotechnology on plant genetic resources. Authors should note that the journal will not review submissions using the RAPD marker system, except where very large numbers of assays place a cost limitation on the analysis, or where RAPD data is combined with, and is co-analysed with other forms of descriptive data, which allows an objective means of assessing the credibility of the RAPDs.

Non-technical aspects can include ethical, legal, commercial and social issues of relevance, in particular relating to farmers' rights, intellectual property and ethnobotany.

Plant Genetic Resources Characterization and Utilization

Contents

Pollen flows within and between rice and millet fields in relation to farmer variety development in The Gambia <i>Edwin Nuijten and Paul Richards</i>	361
Genetic diversity in Anatolian wild grapes (<i>Vitis vinifera</i> subsp. <i>sylvestris</i>) estimated by SSR markers <i>Ali Ergül, Gemma Perez-Rivera, Gökhan Söylemezoğlu, Kemal Kazan and Rosa Arroyo-Garcia</i>	375
Antioxidant content in guava (<i>Psidium guajava</i>) and araçá (<i>Psidium</i> spp.) germplasm from different Brazilian regions <i>Luiz Claudio Corrêa, Carlos Antonio F. Santos, Fabio Vianello and Giuseppina Pace P. Lima</i>	384
Protection of plant varieties: systems across countries <i>Pratibha Brahmi and Vijaya Chaudhary</i>	392
Propagation management methods have altered the genetic variability of two traditional mango varieties in Myanmar, as revealed by SSR <i>R. Hirano, H. Ishii, Than Htun Oo, S. A. Gilani, A. Kikuchi and K. N. Watanabe</i>	404
Strategies for conservation of germplasm in endemic redwoods in the face of climate change: a review <i>M. R. Abuja</i>	411
The allelic state at the major semi-dwarfing genes in a panel of Turkish bread wheat cultivars and landraces <i>F. E. Yediay, E. E. Andeden, F. S. Baloch, A. Börner, B. Kilian and H. Özkan</i>	423
Microsatellite fingerprinting in the International Cocoa Genebank, Trinidad: accession and plot homogeneity information for germplasm management <i>Lambert A. Motilal, Dapeng Zhang, Pathmanathan Umabaran, Sue Mischke, Stephen Pinney and Lyndel W. Meinhardt</i>	430
Applicability of chromosome-specific SSR wheat markers for the introgression of <i>Triticum urartu</i> in durum wheat breeding programmes <i>C. Rodríguez-Suárez, M. C. Ramírez, A. Martín and S. G. Atienza</i>	439
AFLP-based molecular characterization and population structure analysis of <i>Silybum marianum</i> L. <i>Seyed Abolghasem Mohammadi, Majid Shokrpour, Mohammad Moghaddam and Aziz Javansbir</i>	445
Evaluation of phenotypic diversity and geographical variation of cultivated (<i>Eruca sativa</i> L.) and wild (<i>Diplotaxis tenuifolia</i> L.) rocket plant <i>M. Kadri Bozokalfa, Dursun Eşiyok, Hülya İlbi, Süleyman Kavak and Tansel Kaygısız Aşçıoğlu</i>	454
Diversity, characterization and utilization of ginger: a review <i>Jaleel Kizhakkayil and B. Sasikumar</i>	464
Quality indicators for passport data in <i>ex situ</i> genebanks <i>Theo van Hintum, Frank Menting and Elisabeth van Strien</i>	478
Book Review	486
Reviewers' list for 2010 for PGR	487

Plant Genetic Resources: Characterization and Utilization is an international journal published tri-annually by Cambridge University Press in April, August and December on behalf of NIAB. The online edition is available at journals.cambridge.org/pgr.

Special sales and supplements:

This Journal accepts advertising and inserts. We also provide bulk reprints of suitable papers to meet teaching or promotional requirements. The Journal also publishes proceedings on behalf of academic and corporate sponsors. Please contact Katy Christomanou at the Cambridge address above.

Subscription information:

The subscription rates for Volume 9, 2011 (4 issues) are:

Institutional subscription

Internet/Print Package £321.00/\$616.00 (Americas only)

Internet only £252.00/\$486.00 (Americas only)

Print only £297.00/\$535.00 (Americas only)

Any **supplements** to this Journal published in the course of the annual volume are normally supplied to subscribers at no extra charge.

Back volumes are available. Please contact CUP Publishing for further information.

Claims for non-receipt of journal issues will be considered on their merit and only if the claim is received within six months of

publication. Replacement copies supplied after this date will be chargeable.

US POSTMASTERS: please send address corrections Plant Genetic Resources USA address.

Information for Authors:

Please email manuscript (with any accompanying figures or tables) to the Journal Administrator Faye Kalloniatis at plantgeneticresources@googlemail.com

Notes for Authors are available on the internet at journals.cambridge.org/pgr

Offprints: The corresponding author of an accepted paper will receive a pdf offprint. Additional offprints are available for a fee and should be ordered at proof stage. **No page charges or submission charges are levied by this journal.**
