

The Restoration of Land, Studies in Ecology Vol.6, edited by A.D. Bradshaw and M.J. Chadwick. Blackwell, £13.50.

In the discussions of limited and renewable resources that conservationists are continually engaged in, it is often overlooked that the most basic of all our resources is clearly finite: the land. In some parts of the world large areas of land have yet to be cultivated, and the problem then is to balance the need to keep wilderness areas with the perception of an untapped resource in a hungry world. In many areas, however, and particularly in Western Europe, these reserves no longer exist. Pressure on land is then intense, and the importance of wisely using all the available land is enormous.

For this reason this book will be valuable. As its title implies it is concerned with land restoration in the widest sense, and its authors are well known as the major practitioners of the scientific approach to the problem. Here, as with so many problems, the answer lies in the soil, and they start off by explaining the features of soils that are important to healthy plant growth. Typically, misuse of land – whether by mining, dumping of waste, road-building or whatever – results in a material that lacks structure and fertility. The central message of the book is that it is usually possible to restore these essential soil properties, without great cost and without using scarce top soil, if sensible note is taken of the particular problems of the material.

The book is well written, with a minimum of technical language, and copiously illustrated. Anyone who is concerned with the re-establishment of vegetation on disturbed land should read it, and it would be nice to think that a copy was to be found on every planning officer's desk.

ALASTAIR FITTER

The Bird Business by Greta Nilsson. Animal Welfare Institute, \$5. Also available from RSPB, £3 plus postage.

It is altogether too easy to become depressed by the trade in wild animals, and this book (quite intentionally) offers no relief. Concentrating on birds it documents the staggering level of the trade, the nauseating wastage and cruelty involved, and the appalling disregard of fast-improving legal controls. It tells of Japan, which imports three million wild birds a year, and of yellow-headed parrots wrapped in newspaper, their bills bound with tape, to be smuggled into the United States. It documents the absurdity of an international airline's conviction for negligence being quashed on the grounds that the cause of a mass bird death took place outside British air space. As Dillon Ripley puts it in his introduction, wildlife laws fail because of the 'constant ingenuity of humans to avoid restraint'. Yet laws can be made to bite. Exotic Newcastle disease cost \$56 million in dead chickens in California – now quarantine is taken seriously.

This is the second edition of a book first published in the USA in 1977. It has been improved by the addition of colour plates that bring home the full horror of the bird trade. Written mainly from an American angle, but with a masterly resumé of the Indian trade by Tim Inskipp, it should be required reading for legislators worldwide. Unfortunately it seems unlikely to fall into the hands of any but the convinced. The book supplies the ammunition – what wildlife needs is its own big guns. Rachel Carson where are you now?

JOHN GOODERS

A Handbook for Naturalists, edited by Mark R.D. Seaward (Constable, £4.95), is a handy little reference book, with contents ranging from the historical background of the UK natural history movement to conservation organisations, books and periodicals.

In *Between Earth and Paradise* (Heinemann, £7.95) Mike Tomkies describes his satisfying life, and his observations and interactions with the wildlife around him – seals, birds, wild cats, foxes, otters – in an isolated cabin on a west-coast Scottish island.

Books and Reports from ffPS

The Biological Aspects of Rare Plant Conservation £28

Contributions from scientists throughout the world, edited by Hugh Sygne, with all royalties going to ffPS plant projects (see page 199 for details)

John Wiley & Sons 1981

A World Like Our Own £17.50

Dr Alison Jolly's stunning natural history of Madagascar, with 196 photographs by Russ Kinne ('Dr Jolly shows only too vividly that Madagascar must be reckoned one of the most important priorities in the conservation battle' – David Attenborough, *Oryx*, June 1981)

Yale University Press 1981

The New Larousse Encyclopedia of Animal Life £12.95

The latest edition of one of the most respected and successful books on the animal kingdom, edited by Maurice Burton, with 800 colour photographs supplied by Bruce Coleman

Hamlyn 1980

The Penitent Butchers £2.00

The history of ffPS from its formation in 1903 as the Society for the Preservation of the Wild Fauna of the Empire until its 75th anniversary, written by Richard Fitter and illustrated by Sir Peter Scott

Collins/ffPS 1978

The Penguin Dictionary of British Natural History £3.20

The only dictionary of its kind, with accounts of thousands of species found in the British Isles and the surrounding seas, by Richard and Maisie Fitter

Penguin/Allen Lane 1978

International Trade in Harp and Hooded Seals £2.00

Jon Barzdo's comprehensive and unique study of harp and hooded seal products and their paths through international markets

ffPS/International Fund for Animal Welfare 1980

International Trade in Wildlife £1.50

The report by Tim Inskipp and Sue Wells on the purpose and administration of the Convention on International Trade in Endangered Species

Earthscan/ffPS 1979

The 1982 Program

Stimulate your mind on a Questers nature tour. We search out the plants and animals, birds and flowers... and explore rain forests, mountains and tundra, seashores, lakes and swamps. There is ample time to photograph, absorb, reflect. Naturalist guides, small tour parties, first-class accommodations.

Worldwide Nature Tours 1982 Departures

The Americas

Everglades: 11 days, Apr. 8, Nov. 4 • **Hawaii:** 15 days, Feb. 14, Mar. 21, Oct. 10, Dec. 19 • **Alaska:** 17 days, June 12, 26, July 10, 24, Aug. 7 • **Pacific Northwest:** 12 days, June 20, Aug. 1 • **Superior Forest Canoe Trip:** 9 days, July 10, Aug. 14 • **Northwest Canada:** 16 days, July 2 • **Churchill:** 11 days, July 17 • **Newfoundland:** 16 days, June 13 • **Baja California:** 11 days, Apr. 16, Oct. 15 • **Southern Mexico:** 14 days, Feb. 14, Dec. 19 • **Costa Rica & Panama:** 16 days, Feb. 13, Nov. 20, Dec. 18 • **The Amazon:** 17 days, Jan. 17, May 9, July 4, Aug. 8, Oct. 10, Nov. 14 • **Galapagos:** 15 days, Jan. 28, Apr. 22, July 15, Aug. 5, Oct. 28 • **Peru:** 23 days, July 17, Nov. 6 • **Patagonia:** 21 days, Nov. 6 • **Trinidad & Tobago:** 11 days, Mar. 8, Nov. 8.

Europe

Iceland: 16 days, June 11, July 2, Aug. 6 • **Islands/Highlands of Scotland:** 21 days, May 27, July 15, Aug. 19 • **Switzerland:** 17 days, July 16, Aug. 13 • **Greece:** 19 days, Mar. 29, Sept. 20 • **Spain:** 20 days, Apr. 16, Sept. 3.

Asia and Africa

Israel: 16 days, Mar. 15, Oct. 18 • **The Himalayas:** 23 days, Mar. 18, Oct. 7 • **India:** 23 days, Jan. 30, Oct. 30, Nov. 27 • **Sri Lanka:** 18 days, Feb. 19, Nov. 19 • **Kenya:** 23 days, Feb. 4, July 22, Oct. 21 • **Zimbabwe & Botswana:** 19 days, July 8, Aug. 5.

Australasia

Australia & New Zealand: 30 days, Feb. 13, Oct. 2 • **New Zealand & the Milford Track:** 22 days, Feb. 12, Nov. 12 • **The Complete Australia:** 35 days, Sept. 3.
