Prices include ordinary postage. For special airmail rates for countries outside Europe please apply to the address above.  
Half-price subscriptions are available to students in the United Kingdom and Irish Republic on application to

### Purpose

The Review is intended to be of service to those, in business and elsewhere, who need to take a view of the general economic situation and prospects. The workings of the economy are not fully understood ; and even if they were economic prediction would remain hazardous because of the impact of political events and technological developments. Nevertheless the Institute believes that a group of economists, presenting a comprehensive account of current economic developments and a coherent view of likely trends, can perform a useful service.

### Acknowledgements

The Institute is indebted to the Ford Foundation for a five-year grant which made it possible to undertake this project, and to British companies and banks who are supporting the work by contributions to the Institute's funds.

The Institute is also grateful to many people in industry for giving the authors the benefit of their knowledge and experience, and to officials in Government departments who have assisted with advice in the interpretation of official statistics.

### Authorship

This Review is the joint work of members of the research staff, under the general supervision of the editors. The contents will usually be unsigned, the views expressed being the responsibility of the Director and staff. Signed articles may appear from time to time.

Those listed below contribute material for the general surveys and statistical tables. Contributors to special articles are mentioned in footnotes.
