## **Aristotle to Zoos**

*A Philosophical Dictionary of Biology*

P. B. Medawar and J. S. Medawar

"One of the most delightful, and delightfully eccentric dictionaries I have ever encountered. . . One can learn a tremendous amount of modern biology from it. Indeed, I do not agree with the authors' suggestion that one should simply browse around in it; it is too good for that, too well organized and coherent. I began at the beginning and read it to the end."

## **Of Mind and Other Matters**

Nelson Goodman

*Of Mind and Other Matters* displays both the remarkable diversity of Nelson Goodman's concerns and the essential unity of his thought. Incorporated in the book are new and significantly revised studies ranging from science policy, museum administration, and art education to narrative in literature and painting and the analysis of elusive aspects of literal and metaphorical reference. \$17.50

## **Personal Being**

*A Theory for Individual Psychology*

Rom Harré

A leading European philosopher and social psychologist suggests that personal identity derives from the complementary powers of human beings to display themselves socially as unique and to create novel linguistic forms that make individual thought and feeling possible.

*Typescript.* Typescript, double-spaced, should be submitted (in triplicate) to Professor Robert E. Butts, Department of Philosophy, Talbot College, University of Western Ontario, London, Ontario, Canada N6A 3K7. Typescripts will not be returned unless return postage is prepaid by cheque, money order, International Reply Coupons or Canadian stamps. A bibliographical list of cited references beginning with the author's last name, initials, followed by the year of publication in parentheses, should be headed 'References' and placed on a separate sheet in alphabetical order. Simple citations should then be made by employing in the text, rather than by footnote, the reference list by citing author and year of publication, e.g., Jones (1958) or (Smith 1974, p. 46). A detailed guide to the new reference style appears in the March issue of each year. Discursive footnotes should be numbered consecutively throughout the typescript. *Typescript should not exceed thirty-five double-spaced pages. Longer essays will be returned to the author(s) to be cut to the acceptable maximum. A summary abstract of approximately 100 words should accompany each article.* All illustrations must be professionally drawn and lettered. All formulas and equations should be put in such a form as to help minimize the number of printed lines in the journal. In the following examples the form on the right is preferable to that on the left:

$$(1) \quad p = -\frac{dx}{dy} = -\frac{dz}{dt} \qquad p = -dx/dy = -dz/dt$$

$$(2) \quad \frac{1}{x} \prod_{n=1}^{\infty} \left(1 + \frac{1}{a_n}\right) \qquad (1/x) \prod_{n=1}^{\infty} [(1 + 1/a_n)/(1 - 1/b_n)]$$

$$\frac{1}{x} \prod_{n=1}^{\infty} \left(1 - \frac{1}{b_n}\right)$$
