The 'WELLCOME' Brand

DOUBLE CYANIDE WOOL

Realises an ideal hitherto unattained. It is in fact as well as in name a three (3) per cent. double cyanide wool. The antiseptic is distributed uniformly and not in patches. Ordinary double cyanide wool looks patchy and when tested will be found to be patchy. On the contrary, in 'Wellcome' Brand Double Cyanide Wool the distribution of cyanide looks uniform and is proved to be uniform on quantitative test. This wool is remarkable also for its softness. The cylindrical packing is convenient for the removal of small quantities as required for use.

One sixth actual size

Supplied to the medical profession, in 8 oz.
and 16 oz. containers, at 1/8 and 3/- each.

FORMAWN

(Chlormethylmenthylæther
 $C_{10}H_{19}OCH_2Cl$)

Clinically tested and declared by medical men to be an absolutely reliable remedy for Nose Catarrh. Highly recommended in the case of influenza as a preventive and as affording relief. Method of use: as a preventive and for mild attacks—Formawn Nose Wool; in cases of more serious colds: Formawn Tablets for Inhalation through the Formawn Inhaler. Almost infallible when applied in good time.

RETAIL PRICE—{ 7½d. per box of Formawn Nose Wool (dainty pocket size);
2s. per box containing Formawn Inhaler and 10 tablets;

Literature and Samples on application.

THE CHEMICAL WORKS, 59—63, Park Street, London, S.E.
