Comment on negative diffusion coefficients in quasi-linear theory D. MONTGOMERY and S. BODNER	<i>page</i> 131
Reply to the 'Comment on negative diffusion coefficients in quasi-linear theory' by D. Montgomery and S. Bodner I. B. BERNSTEIN and J. P. KLOZENBERG	135
Comment on revised quasi-linear equations dealing with wave-number spectra B. ABRAHAM-SHRAUNER	137
Quasi-linear theory in the non-resonant region S. E. BODNER	141
On resonances of a plane plasma condenser in crossed electric and magnetic fields N. A. NIKOLOV	145

JOURNAL OF PLASMA PHYSICS

Vol. 5 Part 1 January 1971

CONTENTS

A weak turbulence analysis of the two-stream instability D. F. SMITH and P. C. W. FUNG	<i>page</i> 1
Time asymptotic perturbation theory in weak plasma turbulence. I. Macroscopic description KLAUS ELSÄSSER	31
Time asymptotic perturbation theory in weak plasma turbulence. II. Vlasov description KLAUS ELSÄSSER	39
Interaction of electrostatic waves in collisionless plasmas G. J. LEWAK	51
Stability of the screw pinch with Hall current S. K. MALIK	65
Penetration to second order of an electrostatic field into a warm plasma E. M. ZAWADZKI and G. J. LEWAK	73
Measurement of microwave reflexion from a longitudinally magnetized plasma-filled co-axial wave-guide M. L. G. OLDFIELD and R. N. FRANKLIN	89
Parametric excitation in an inhomogeneous plasma C. S. CHEN	107
The contribution of electronic excitation to the total specific heats of high temperature gases: a misinterpreted absence M. CAPITELLI and E. FICOCELLI	115
Note on the existence of stationary shockwaves in collisionless plasmas D. PFIRSCH and K. SCHINDLER	123
