Fifty Years of Nuclear Astrophysics: a Foreword

John Lattanzio

i–i

Nuclear Astrophysics Before 1957

*Edwin E. Salpeter*

1–6

Stardust in the Laboratory

*Ernst Zinner*

7–17

Nuclear Physics of the *s* Process

*I. Dillmann, C. Domingo Pardo, F. Käppeler, A. Mengoni and K. Sonnabend*

18–29

B<sup>2</sup>FH, the Cosmic Microwave Background and Cosmology

*G. Burbidge*

30–35

Chemical Evolution of Heavy Elements in the Early Galaxy: Implications for Stellar Sources

*Yong-Zhong Qian*

36–43

Solar Neutrinos: Models, Observations and New Opportunities

*W. C. Haxton*

44–51
