# PART OF THE LARGACTIL HERITAGE

chlorpromazine

May and Baker's record of innovation in psychotropic medicines includes the first, major tranquilliser, Largactil, and now Piportil Depot—arguably the most useful of the depot neuroleptics in terms of:

## Efficacy

against a wide range of target symptoms of schizophrenia.

## Convenience

for patients, medical and nursing staff because of a full, four-week duration of activity.

## Acceptability

because of its greater freedom from extra-pyramidal effects than other depot neuroleptics<sup>1 2 3 4</sup>

## Experience

which comes from both short and long-term studies performed in the U.K. and worldwide.

# Piportil

DEPOT PIPOTHIAZINE PALMITATE

# HELPING TO SOLVE THE PUZZLES OF SCHIZOPHRENIA

## PRESCRIBING INFORMATION

### Dosage:

(Adults) Initially 25mg (0.5ml) by deep intramuscular injection into the gluteal region to assess susceptibility of patient. Dosage should be increased by increments of 25 or 50mg at appropriate intervals until a satisfactory response is obtained. Most patients respond to a dose of 50-100mg (1-2ml) every 4 weeks.

Patients should be stabilised under psychiatric supervision.

### Contra-indications:

Marked cerebral atherosclerosis, phaeochromocytoma, renal or liver failure, severe cardiac insufficiency or hypersensitivity to other phenothiazine derivatives.

### Precautions:

A history of convulsive disorders or marked extra-pyramidal reactions to oral phenothiazines, in pregnancy and lactation.

### Side-effects:

Reversible extra-pyramidal reactions, sleep disturbance, depression, blurred vision, asthenia, impotence, dry mouth, nausea, amenorrhoea, galactorrhoea, hypotension, hyperhydrosis and weight gain have been observed occasionally. Corneal or lenticular cloudiness have not been observed with Piportil alone, but in treatment with phenothiazine preparations in high dosage over a long period, there is a risk of such side-effects occurring. Local reactions at site of injection are rare.

### Presentations and Basic N.H.S.

#### Prices

Box of 10 x 1ml ampoules (5mg) £53.70. Box of 10 x 2ml ampoules (100mg) £87.875 (PL0012/0017)
