# GERMAN COMPOSITION AND CONVERSATION

Here is a new book for German classes, gay and inviting in appearance and furnishing an abundance of interesting material. As it contains a summary of grammatical forms it may be used without a reference grammar.

Part I is a systematic review of forms and syntax. Memory work, direct-method exercises, composition, and conversation provide drill on the grammatical material.

Part II provides conversation and composition exercises based on German models. The models consist of interesting anecdotes and of passages about Germany—her geography, history, government, and literature.

An excellent book for the second year of German in colleges or for the second and third year of German in high schools.
