

PREHOSPITAL and DISASTER MEDICINE

Volume 5, Number 4

October-December 1990

Original Research

A Prospective Evaluation of Prehospital Patient Assessment by
Direct In-Field Observation
Correlation between Motor Vehicle Mortality Rate and
Density of Medical Resources
Endotracheal Versus Intravenous Epinephrine in the
Prehospital Treatment of Cardiac Arrest

Brief Reports

The Role of Aeromedical Transportation in Disaster Health Care
The Role of Regional Anesthesia Under Field Conditions
Hospital Disaster and Evacuation Planning

Collective Review

Management of Persons Internally Contaminated with Radionuclides

Special Report

The Language of Disasters

Special Feature

Quality versus Quantity in Medical Research

Editorial

Minimum Data Set for EMS Report Form

Venue

First International Conference on Burns and Fire Disasters

The Official Journal of the
National Association of EMS Physicians and the
World Association for Emergency and Disaster Medicine
in association with the
Acute Care Foundation and the
National Association of State EMS Directors

Marquette announces a defibrillator that thinks

The new Responder™ 1500 is the next best thing to having a cardiologist at your side. The 1500 is a full-featured defibrillator with the added capability of on-the-spot computer-analyzed 12-lead ECGs. It is a complete defibrillator and a computer-enhanced electrocardiograph in one lightweight package.

The Responder 1500 uses Marquette's proven 12SL analysis program to collect data from all 12 leads simultaneously and to perform a full analysis of morphology and rhythm in just 15 seconds. The report, which is printed instantly, can also be transmitted by cellular or conventional telephone to a cardiologist for overreading and verification. The 1500 makes pre-hospital thrombolytic therapy a real possibility.

The 12SL program is used worldwide. The sensitivity and specificity with which it recognizes acute myocardial infarction is based on a data base of 20 million ECGs. Breakthroughs in computer miniaturization technology permit this powerful and accurate program to be included in the 1500.

The 1500 also features full-disclosure digital ECG recording for unprecedented medical control capabilities. All field data can be reviewed, analyzed and printed, or stored for later review. Other, optional features include external pacing (demand or non-demand) and an arrhythmia advisory system.

For more information about the versatile Responder 1500, contact your Marquette representative or call us at 1-800-558-5120, ext. 3000.

I N S I D E R

Two Ways to Get Your EMS Information

The oldest and most respected EMS newsletter in the nation—formerly published as the *EMS Communicator*—the **EMS INSIDER** has a new look, a new style and a new MONTHLY schedule.

The **EMS INSIDER** uses 21st century technology to bring you late-breaking EMS news, weeks, sometimes months, before it is available elsewhere.

The **EMS INSIDER** covers management issues,

financial topics, new regulations and legislation, controversies and innovations in the field.

**IF YOU ARE AN EMS ADMINISTRATOR,
MANAGER, SUPERVISOR, EDUCATOR,
MEDICAL DIRECTOR OR PHYSICIAN, YOU
CAN'T AFFORD NOT TO BE
AN EMS INSIDER.**

For a limited time, Jems Publishing Company is offering the **EMS INSIDER** at the low price of just \$29.50 a year (12 issues). That's 40 percent off the regular subscription price. Just fill out the coupon below.

There has never been a better time to become an **EMS INSIDER**.

YES, I want to be an EMS INSIDER for only \$29.50 a year (12 issues)

Improve Prehospital Care In Your Community!

New!

NATIONAL ASSOCIATION OF EMS PHYSICIANS: EMS MEDICAL DIRECTORS' HANDBOOK

National Association of EMS Physicians; Edited by Alexander E. Kuehl, M.D., M.P.H., F.A.C.S.; with 25 contributors

"This is an important publication, and is long overdue...at the present time there is no other comparable book on this subject..." (Prepublication review)

Over the years, EMS systems have grown at an unprecedented rate. But many of them have developed without the perspective that EMS is the practice of medicine -- through intermediaries -- in the prehospital setting. This new book will help. In it, you'll find clear objectives for improving prehospital care. From system development and medical control to operational issues and facilities direction, it covers everything you need to supervise an EMS system.

- funding strategies
- labor relations
- direct medical control
- levels of certification of providers
- refusal of medical assistance
- aero-medical services

1989. 448 pages, illustrated. (Book Code: 05854) \$29.95 (U.S.); \$39.00 (Can.)

**Save time, call FREE
