

Astronomical Society of Australia

Proceedings

Volume 7 Number 2 1987

Theoretical

The Stability of Rotating Stars	Leigh Brookshaw	108
Evolution of a horizontal scale for magnetoconvection	J. O. Murphy & J. M. Lopez	112
The accuracy of timing the minima of eclipsing variables	Z. Kviz & A. P. S. Wong	117
An emission line model for AM Herculis systems	Lilia Ferrario, D. T. Wickramasinghe & I. R. Tuohy	119
The effect of magnetic field spread and temperature & density variations in cyclotron emission regions	D. T. Wickramasinghe & Lilia Ferrario	123
Electron scattering in cyclotron emission regions	S. M. A. Meggitt & D. T. Wickramasinghe	128
Star formation in cooling flows	P. E. J. Nulsen, R. M. Johnstone & A. C. Fabian	132
Modelling large body impacts	Helen Pongracic	136
On solar neutrinos & chemically inhomogeneous solar models	S. J. Robinson	139

Stellar

SN1987a: a progress report	M. A. Dopita, N. Achilleos, J. A. Dawe, C. Flynn, S. J. Meatheringham & R. D. McNaught	141
On the existence of bright ($M_{bol} < -6$) upper AGB stars	S. M. G. Hughes & P. R. Wood	147
A spectroscopic & photometric study of 1H 052-407: a new magnetic variable	D. A. H. Buckley & I. R. Tuohy	151
The Australian radio star survey	Alan E. Wright, O. B. Slee, G. J. Nelson, R. T. Stewart, David L. Jauncey, Graeme L. White, A. E. Vaughan, J. Lim, M. I. Large, John D. Bunton, K. Thompson, D. W. Coates, J. L. Innes, W. L. Peters, S. G. Ryan, R. D. Robinson, Mark Cropper, David A. Allen & A. A. Page	159

Spectroscopy

Gamma ray astronomy from balloons and satellites	R. K. Sood	163
Periodic analysis of gamma ray data	R. J. Protheroe	167
The Lyman far ultraviolet spectroscopic mission	Ian R. Tuohy & Michael A. Dopita	173
A highly excited ammonia cloud at least 300 pc from the galactic centre	F. F. Gardner & F. Boes	185
Ammonia mapping of the southern molecular cloud NGC 6334	J. R. Forster, J. B. Whiteoak, F. F. Gardner, W. L. Peters & T. B. H. Kuiper	189
115 GHz CO distribution towards the southern Coalsack	Robina E. Otrupcek & Jing-Sheng Wang	194
A multi-purpose, multi-channel radio-spectrograph for the Parkes telescope	J. Lim, G. J. Nelson & A. E. Vaughan	197
Upper limits to the prompt X-ray flux from supernova 1987a	P. J. Edwards	205

Extragalactic

The structure & size of radio galaxy 1308-441	P. A. Jones	208
Multichannel studies of X-ray selected active galactic nuclei	R. J. V. Brissenden, I. R. Tuohy, R. A. Remillard, D. A. H. Buckley, G. V. Bicknell, H. V. Bradt & D. A. Schwartz	212

Comets

Cometary dust and the rainfall singularity shift	Z. Kviz	216
--	---------	-----

Prognosis

Science with the Australia Telescope	B. J. Robinson	220
--------------------------------------	----------------	-----

<i>History of Australian Astronomy</i>		
The calamity of the Great Melbourne Telescope	W. Lewis Hyde	227
<i>Book Reviews</i>		
Universe by <i>William J. Kaufmann III</i>	Graeme L. White	231
The Analysis of Starlight by <i>J. B. Hearnshaw</i>	David Allen	232
Astrophysics of Brown Dwarfs, edited by <i>Kaftos, Harrington & Maran</i>	M. S. Bessell	232
Radar Days by <i>E. G. Bowen</i>	R. X. McGee	233
