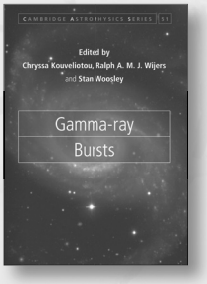
Gamma-ray Bursts



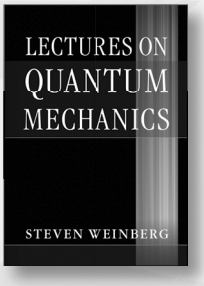
Edited by
Chryssa Kouveliotou,
Ralph A. M. J. Wijers, *and*
Stan Woosley

A comprehensive graduate-level review of GRB astrophysics and its history, featuring the latest research by an international team of experts.

Cambridge Astrophysics

$120.00: Hb: 978-0-521-66209-3: 358 pp.

Lectures on Quantum Mechanics



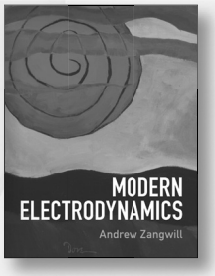
Steven Weinberg

Nobel Laureate Steven Weinberg combines his exceptional physical insight with his gift for clear exposition to provide a concise introduction to modern quantum mechanics. Ideally suited to a one-year graduate course, this textbook is also a useful reference for researchers. Readers are introduced to the subject through a review of the history of quantum mechanics and an account of classic solutions of the Schrödinger equation, before quantum mechanics is developed in a modern Hilbert space approach. The textbook covers many topics not often found in other books on the subject, including alternatives to the Copenhagen interpretation, Bloch waves and band structure, the Wigner–Eckart theorem, magic numbers, isospin symmetry, the Dirac theory of constrained canonical systems, general scattering theory, the optical theorem, the 'in-in' formalism, the Berry phase, Landau levels, entanglement and quantum computing. Problems are included at the ends of chapters, with solutions available for instructors at www.cambridge.org/9781107028722.

$75.00: Hb: 978-1-107-02872-2: 375 pp.

Modern Electrodynamics

Andrew Zangwill



"An outstanding achievement on so many levels, including scope, depth, insight, pedagogy, and historical background. It will become an instant classic."

–JOHN D. JOANNOPOULOS, Massachusetts Institute of Technology

"This book richly deserves the word "modern" in its title. Zangwill develops an intuitive picture of electrodynamics that will be a great resource for all."

–ROB PHILLIPS, California Institute of Technology

"This comprehensive textbook gives refreshing insights into classical electrodynamics, with emphasis on the physics without sacrificing mathematical rigor. I particularly like the numerous worked examples and sections on applications, which show the relevance of the topics to modern research. The problems, with comprehensive solutions for the busy instructor, will be excellent for students to get to grips with the material."

–SHIRLEY CHIANG, University of California-Davis

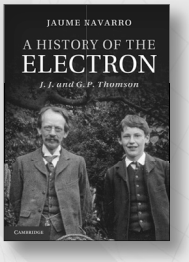
OUTSTANDING PHYSICS TITLES *from* Cambridge University Press

A History of the Electron
J. J. and G. P. Thomson

Jaume Navarro

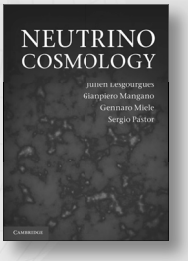
$80.00: Hb: 978-1-107-00522-8: 192 pp.

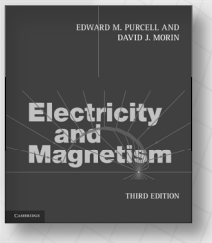


Neutrino Cosmology

Julien Lesgourgues, Gianpiero Mangano, Gennaro Miele, *and* Sergio Pastor

$85.00: Hb: 978-1-107-01395-7: 389 pp.



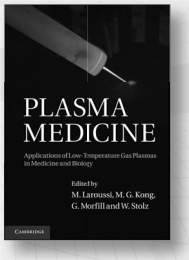


Third Edition

Electricity and Magnetism

Edward M. Purcell *and* David J. Morin

$80.00: Hb: 978-1-107-01402-2: 853 pp.



Plasma Medicine
Applications of Low-Temperature Gas Plasmas in Medicine and Biology

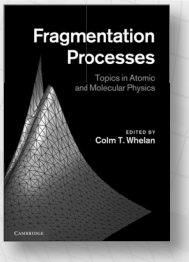
Edited by M. Laroussi, M. G. Kong, G. Morfill, *and* W. Stolz

$120.00: Hb: 978-1-107-00643-0: 364 pp.

Fragmentation Processes
Topics in Atomic and Molecular Physics

Edited by Colm T. Whelan

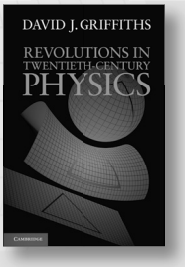
$140.00: Hb: 978-1-107-00744-4: 277 pp.

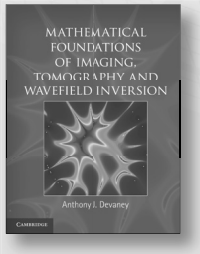


Revolutions in Twentieth-Century Physics

David J. Griffiths

$29.99: Pb: 978-1-107-60217-5: 182 pp.

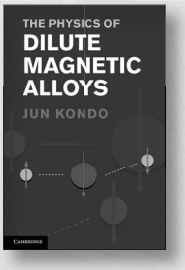




Mathematical Foundations of Imaging, Tomography and Wavefield Inversion

Anthony J. Devaney

$80.00: Hb: 978-0-521-11974-0: 536 pp.



The Physics of Dilute Magnetic Alloys

Jun Kondo
Translated by
Shigeru Koikegami, Kosuke Odagiri, Kunihiko Yamaji, *and* Takashi Yanagisawa

$99.00: Hb: 978-1-107-02418-2: 274 pp.

Instructions for Authors

Editorial policy The journal welcomes submissions in any of the areas of plasma physics. Its scope includes experimental and theoretical work on basic plasma physics, the plasma physics of magnetic and inertial fusion, laser–plasma interactions, industrial plasmas, plasma devices and plasmas in space and astrophysics. This list is, of course, merely illustrative of the wide range of topics on which papers are invited, and is not intended to exclude any aspect of plasma physics that is not explicitly mentioned.

Authors are urged to ensure that their papers are written clearly and attractively, in order that their work will be readily accessible to readers. Manuscripts must be written in English. *Journal of Plasma Physics* employs a rigorous peer-review process whereby all submitted manuscripts are sent to recognized experts in their subjects for evaluation. The Editors' decision on the suitability of a manuscript for publication is final.

Submission of manuscripts Papers may be submitted to the Editor or any of the Associate Editors, preferably by email in pdf format. When a paper is accepted, the authors will be asked to supply source files in LaTeX or Word. Instructions for the preparation of these files and LaTeX style files are given in the Instructions for Contributors link at journals.cambridge.org/pla.

Incremental publishing and DOIs In order to make articles which have been accepted for publication in *Journal of Plasma Physics* available as quickly as possible, they are now published incrementally online (at Cambridge Journals Online; journals.cambridge.org) The online version is available as soon as author corrections have been completed and before the article appears in a printed issue. A reference is added to the first page of the article in the journal catchline. This is the DOI – Digital Object Identifier. This is a global publishers' standard. A unique DOI number is created for each published item. It can be used for citation purposes instead of volume, issue and page numbers. It therefore suits the early citation of articles which are published on the web before they have appeared in a printed issue. See journals.cambridge.org/pla.

Proof reading Only typographical or factual errors may be changed at proof stage. The publisher reserves the right to charge authors for correction of non-typographical errors.

Offprints Corresponding authors will receive a PDF of their article upon publication. Print offprints may be purchased from the publisher if ordered at first proof stage.

Copying This journal is registered with the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923. Organizations in the USA who are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of US copyright law) subject to payment to C.C.C. of the per copy fee of $16.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0022–3778/2013 $16.00.

ISI Tear Sheet Service, 3501 Market Street, Philadelphia, Pennsylvania 19104, USA, is authorized to supply single copies of separate articles for private use only.

Organizations authorized by the Copyright Licensing Agency may also copy material subject to the usual conditions.

For all other use, permission should be sought from Cambridge or the American Branch of Cambridge University Press.
