The Pioneers

Of the Plywood industry were Venesta Ltd.; they held the premier position then because there were no competitors. Now, in the face of increasing competition from almost every country in the world, they hold it still—indisputably.

VENESTA PLYWOOD

It is in constant demand by the British and Allied Governments, the largest Shipbuilding and Railway Companies, Aeroplane & Motor Car Builders, etc. It is waterproof, unshrinkable, and practically indestructible, and these qualities, together with its smooth, clean surface, make it the finest material in the world for panelling of every description.

THE "GUARDIAN ANGEL" PARACHUTES.

For Life Saving uses on the Training Grounds : and for special Naval and Military operations. Open automatically, and dropped from Aeroplanes, always carry their man within $2\frac{1}{2}$ seconds. Open instantaneously, and bring their man safely to the ground from any height above 200 feet. All the Airman has to do is to jump overboard, everything else is done for him automatically. Pilots can in the last resort charge enemy Aeroplanes with every prospect of their own safety. Non-spinning Shock-Absorber Slings, taking all shocks off the Parachutist and Parachute. Aviator's Harness, to carry safely a wounded or insensible man. Instant release on landing. Standardised in every detail, air and waterproof, they can be carried continuously for six months. These Parachutes are under static and kinetic control in all the phases of their action. There is no possibility of the entanglement of their rigging in the fiercest air current. These Parachutes can be dropped with absolute safety from Aeroplanes flying at any speed. These Parachutes reduce free-fall to its minimum, thus preserving the Airman's nerves. Adapted for use with every type of Aircraft, kite and free balloons, airships and aeroplanes. Special adaptations made for special purposes : they are adaptable to every kind of purpose. These Parachutes are sealed to prevent tampering : the seals are broken
 only in the act of usage.

RELIABILITY, first—RELIABILITY, second—
RELIABILITY ALL THE TIME.

The efficiency of your machine depends upon your clutches and brakes.

Twenty years or so ago we invented Ferodo Fabrics. Since then, we have, by employing skilled engineers and the finest testing plant in the world, greatly improved Ferodo Fabrics, so that to-day they are readily acknowledged to be the finest friction surfaces in the world.

They are entirely unaffected by water, oil or acid, and absorb more foot lbs. of energy per square inch than any other material known. Wood and leather linings char and quickly wear out. Ferodo Fabrics are spark proof and non-inflammable.

Ferodo Fabrics have the name stamped on each foot. Look for it when ordering your new linings.

“ Done some very good work.”

“ I am pleased to state that the car (Belsize 3 Tonner) is running fine, and has done some very good work this last six months.”

Extract from letter from Motor Driver in A.S.C.

IN producing this series of pictorial testimonials we endeavour to lend the weight of user's opinion to our oft repeated claims.

During the awful weather of last winter the Belsize Three Tonner stood up to the test of war service day after day during the most severe winter for many years.

□ □ □

At present Belsize production has ceased—the whole of our up-to-date plant being devoted to Government service—but the after-war Belsize will still carry out our well-defined policy of strength and reliability.
