SOUTH ASIA

A Short History

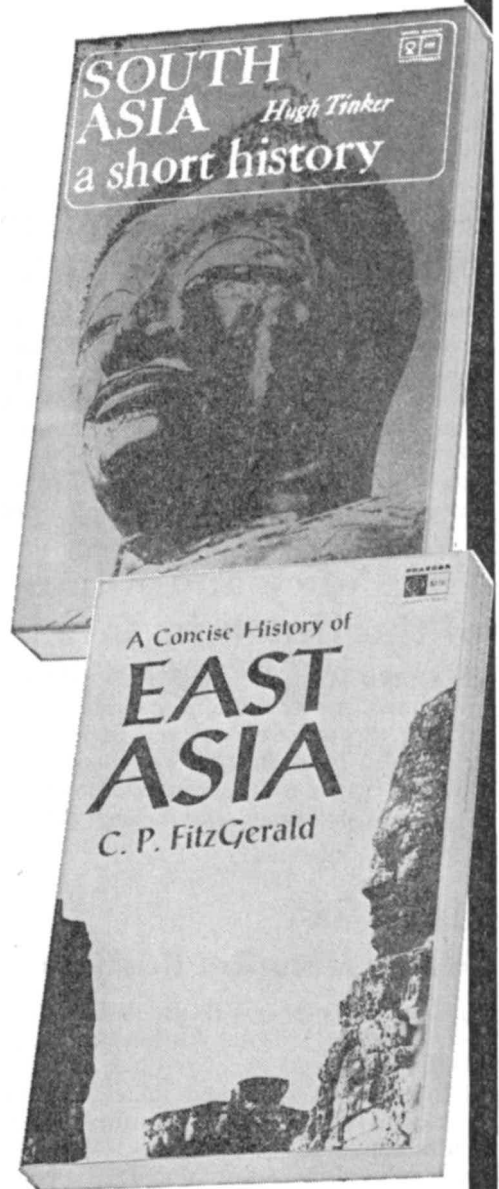

By HUGH TINKER. Professor Tinker, author of *India and Pakistan* and other books on Asia, demonstrates that the key to understanding South Asia lies in its traditions, customs, religions, and ideas, rather than in the outward form of historical change. He traces South Asian history from the time of Buddha to the present, examining the role of social, religious, and cultural movements, as well as political factors, in the development of India, Pakistan, Ceylon, Burma, and the Himalayan states. ca. 300 pp. 11 maps, illus.

He presents a scholarly discussion of the characteristic forms of composition and their complexities, including chapters on the scale (*grāmas* and *śritis*), the Indian conception of mode, the *rāga*, grace, and *tāla* (meter). For each topic a comparison with its European counterpart is provided. *14 plates, 2 tables.*

The Policy and Administration of the Dutch in Java

By CLIVE DAY. Although sixty odd years have elapsed since this book was first published, it still remains a standard work, and is unquestionably the most stimulating account ever written in English on the Dutch colonial system in Indonesia. Dr. John Bastin, who contributes a short introduction to this reprint, believes that it is "the best book to place in the hands of a student newly drawn to a study of Dutch colonial activities." *Oxford in Asia Historical Reprints.*

A meeting of the twain

CHINESE INTELLECTUALS AND THE WEST 1872-1949

by Y. C. Wang

A vital area of Chinese history traced and comprehensively analyzed — the 70-year movement (until the Red take-over) by many Chinese to study in Western nations. These intellectuals, who included such towering reform leaders as Yen Fu, Liang Ch'i-ch'ao, Ch'en Tu-hsiu, and Sun Yat-sen, became the driving force behind nearly every aspect of China's modernization in her military, technological, scientific, diplomatic, financial, political, ideological, and literary endeavors. The irony of how far from original goals this contact with the West has brought China is one of the book's fascinating observations. An absolute must for Sinologists, historians, and educators.

BURMESE MONK'S TALES**MAUNG HTIN AUNG**

These tales, which have the brevity and bite of fables, delight with their incisive wit, humor, and timeliness. Combining exotic background with homely detail they evoke a traditional way of Burmese life on the eve of the British conquest of 1885. Told by a great monk, Thingazar Sayadaw, from the golden city of Mandalay, each tale is preceded by a short and charming description of the circumstances under which it was related. \$5.95

CENTRAL ASIA**Century of Russian Rule****EDITED BY EDWARD ALLWORTH**

With the fall of the city of Tashkent in June, 1865, the formal Russian domination over the vast area loosely termed "Central Asian" began. Located between Russia, China, and India and peopled by millions of Moslems of Turkic origin, the area today remains relatively unknown. This book offers an interdisciplinary view of the hundred years that Western-style civilization has been superimposed upon traditional Central Asian culture. The land, language, literature, music, architecture, and painting are discussed; and the book is *copiously illustrated with drawings and maps.*

Hsin Hsing, Taiwan

A Chinese Village in Change. BERNARD GALLIN. In this study of a Chinese agricultural community on Taiwan, the reader will find both an ethnographic description—the first of its kind to appear in book form—and an account of the changing pattern of peasant life. Because Taiwan has evolved from a traditional society into an emergent urban-industrial one so recently, it provides an excellent opportunity for study of contemporary Chinese cultural change. \$8.50

Japan's Invisible Race

Caste in Culture and Personality. GEORGE DEVOS and HIROSHI WAGATSUMA. Discusses the little-known but important pariah caste of more than two million individuals who live in ghettos throughout Japan. It describes both the history and political significance of this group and the present-day social and psychological tensions resulting from the covert practice of discrimination. The book draws many parallels between the situation of the Japanese pariah and that of the American Negro. A publication of the Center for Japanese and Korean Studies. \$8.75

The Function of "China" in Marx, Lenin, and Mao

DONALD M. LOWE. China fulfills different functions in the writings of Marx, Lenin, and Mao. Mr. Lowe's examination of the historical significance of these differences makes clear their derivation not merely from dissimilarities in the writers' intellectual backgrounds and personal dispositions but also from the changing role of China within the Marxist framework of the unity of theory and practice. \$5.00

Soviet Mongolia

A Study of the Oldest Political Satellite. GEORGE G. S. MURPHY. An economic and political history of the Mongolian People's Republic from 1921 to 1960. Under Stalin, the country was cut off from the rest of the world and from most Russians. Mr. Murphy, using Russian source materials primarily, disputes the views of other historians and shows that the original Mongolian "revolution" of 1921 was guided by the Comintern. He discounts the view that it was a genuine revolution growing out of the aspirations and needs of the Mongols themselves. \$6.95

The Dynastic Arts of the Kushans

JOHN M. ROSENFELD. The Kushan dynasty encompassed a vast empire which, in the first three centuries of the Christian Era, stretched from the Ganges River Valley into the oases of Central Asia.
