IAU Colloquium 164: Radio Emission from Galactic and Extragalactic Compact Sources
ASP Conference Series, Vol. 144, 1998
J. A. Zensus, G. B. Taylor, & J. M. Wrobel (eds.)

Subject Index

absorption lines, 131, 197, 219, 231, 233, 289, 315, 317

active galactic nuclei, 2, 11, 81, 97, 121, 131, 137, 139, 151, 153, 159, 161, 201, 205, 211, 221

ALBA, 197, 315, 377

ALFA, 393

angular broadening, 287, 329, 341

angular-size–redshift test, 22

APT, 14

ARISE, 9, 102, 397

astrometry, 95, 155, 203, 389

- frame ties, 331, 381, 403
- Hipparcos, 325, 361, 381
- parallaxes, 325, 335, 339, 361, 381, 391
- reference frames, 325, 331, 381, 383, 385, 387, 403

ATCA, 131, 147, 179, 193, 197, 267, 271, 315, 343, 349, 359, 375, 377

BIMA, 8, 207, 323, 324, 379

BL Lacertae objects, 20, 26, 45, 97, 107, 127, 143, 161, 163, 165, 171, 173, 258, 261, 271, 273

black holes

- binary, 23, 107
- extragalactic, 51, 209, 213, 217, 219, 221, 225, 231, 237, 305, 397
- galactic, 349, 351
- Galactic center, 229, 323

blazars, 23, 25, 98, 159, 169, 260, 277

brightness temperatures, 25, 27, 28, 35, 135, 151, 153, 193, 197, 199, 211, 231, 233, 249, 258, 260, 267, 269, 271, 277, 285, 379

circular polarization, 13, 25, 102, 123, 243, 245, 289, 371, 373

CLFST, 281

CMVA, 102, 119

compact double sources, 191

compact steep-spectrum sources, 101, 105, 109, 111, 117, 155, 181, 183, 185, 189, 195, 281, 291, 293, 295, 297, 299

compact symmetric objects, 20, 187, 191

cosmology, 33, 381

- deceleration parameter, 22
- Hubble constant, 19, 22, 305, 311, 315, 397

counterjets, 61, 63, 79, 87, 89, 91, 111, 133, 171, 231, 306

disks, 133, 233, 239

- accretion, 51, 63, 121, 217, 225
- circumnuclear, 213, 217, 219, 221, 231, 237
- circumstellar, 249, 365, 377, 379
- Galactic, 329
- Keplerian, 213, 225

EVN, 2, 11, 14, 23, 45, 59, 121, 161, 171, 199, 233, 281, 297, 301, 303, 306, 371, 381, 405, 421

evolution, 20, 189, 291, 295, 297

- components, 339

Fanaroff-Riley class I sources, 51, 59, 63, 85, 89, 99, 163

Fanaroff-Riley class II sources, 20, 51, 81, 83, 129, 181, 231

Faraday conversion, 102, 123

Faraday depolarization, 102, 105, 109, 111, 177, 299, 307

Faraday rotation, 99, 102, 109, 113, 125, 127, 183, 185, 307

free-free absorption, 63, 91, 133, 199, 301

Galactic anticenter, 329

Galactic center, 207, 335

Galactic H II, 329

Galactic H I, 289, 329

galaxies, 143, 235

- elliptical, 193, 209, 223
- lenticular, 209
- nuclei, 201, 203, 205, 207, 209, 211, 213, 219, 227, 233, 237, 239, 323
- Seyfert, 133, 197, 199, 211, 221, 237, 301
- spiral, 193, 201, 203, 209, 233, 239, 323
- starburst, 199, 209, 227

gamma rays, 153, 261, 262, 397

- blazars, 26, 37, 39, 41, 67, 69, 93, 175

https://doi.org/10.1017/S0252921100046261 Published online by Cambridge University Press

CGRO, 45, 261, 347

EGRET, 39, 43, 45, 55, 67, 93, 175, 347

quasars, 26, 43, 157, 175, 261

GBI, 335, 337

gigahertz-peaked-spectrum sources, 177, 179, 187, 193, 291, 297

gravitational lensing, 39, 155, 303, 317

microlensing, 263, 271, 319

models, 303, 305, 311, 315, 319, 397

time delays, 305, 311, 313, 315
