

New

Journal of the International Neuropsychological Society

Editor-in-Chief

Igor Grant, *University of California, San Diego*

Published for the International Neuropsychological Society

Journal of the International Neuropsychological Society (JINS), a bimonthly journal new in 1995, is the official publication of The International Neuropsychological Society, an established scientific and educational organization with over 3,000 members.

Neuropsychology is a vigorous and rapidly expanding field, and **Journal of the International Neuropsychological Society** has already become a leading voice. It furthers scientific and research activities in neuropsychology and enhances communication among its cognate member disciplines.

Coverage

The focus of articles may be primarily experimental, applied or clinical. **JINS** covers all areas of neuropsychology – ranging from child and development issues, and cognitive-neuroscientific studies, to clinical research and case observations. It includes:

- development of cognitive processes
- brain-behaviour relationships
- adult neuropsychology
- child neuropsychology
- developmental neuropsychology
- disorders of speech and languages

And related topics such as:

- behavioural neurology
- neuroimaging
- neuropsychiatry
- electrophysiology

Articles

All articles are peer-reviewed and range from those written by well established investigators and their teams, to works written by recently graduated and younger members of the neuropsychological community. **JINS** includes:

- original research articles and shorter rapid communications
- case reports - where practical aspects of research can be examined
- critical reviews - to highlight emerging fields of interest, and to stimulate points of controversy
- symposia section - consisting of thematically linked research papers
- dialogues section - allows experts maximum freedom to debate viewpoints
- book reviews and announcements

Subscription

Volume 2 in 1996: January, March, May, July, September and November: £112/ \$160 for institutions, £61/ \$80 for individuals, delivery by airmail £40 per year extra. Special arrangements exist for members of the International Neuropsychological Society. ISSN 1355-6177.

Psychophysiology

Published for The Society for Psychophysiological Research, **Psychophysiology** is a core publication in its field. This prestigious international bimonthly journal plays a key role in advancing psychophysiological science. Its success is clearly shown by its high ranking in both the science and social science citation reports.

Psychophysiology publishes new theoretical, empirical and methodological papers of the highest standards, covering research on the inter-relationships between the physiological and psychological aspects of behaviour, and bringing together researchers in ...

- ◆ behavioural medicine and health psychology
- ◆ cognitive science and cognitive neuroscience
- ◆ physiology
- ◆ applied psychology, psychopathology and clinical psychology
- ◆ medicine

Keep up to date

Keep up to date with the latest research and advances. Each issue includes ...

- empirical and theoretical papers
- evaluative reviews of literature
- methodological articles
- special reports – featuring brief, current papers of special interest
- book reviews
- letters to the editor
- meeting announcements
- employment and fellowship opportunities

INSTRUCTIONS FOR CONTRIBUTORS

PAPERS Papers for publication should be addressed to the Editor, Professor Eugene Paykel, Department of Psychiatry, University of Cambridge, Addenbrooke's Hospital, Cambridge CB2 2QQ, UK. Contributors should send four copies of the text, tables and figures. Copies other than the first may be xeroxed. In addition to longer articles, the Editor is prepared to accept preliminary and brief communications of between 1500 and 2500 words. A limited number of letters to the Editor discussing published papers will also be accepted.

Submission of a paper will be held to imply that it contains original work that has not been previously published and that it is not being submitted for publication elsewhere. When an article has been accepted for publication, the author is strongly encouraged to send a copy of the final version on computer disk (Apple Macintosh or IBM compatible PC) *together with* the hard copy typescript, giving details of the wordprocessing software used (Microsoft Word, Word or Word Perfect). However, the publisher reserves the right to typeset material by conventional means if an author's disk proves unsatisfactory.

Manuscripts must be typewritten on one side of the paper in double-spacing with wide margins throughout, including references and notes, and consecutively numbered. The following information must be given on the first page (title sheet): (1) title and short title for running head (not more than 60 characters); (2) authors' names, and (3) department in which work was done. A short synopsis of about half an A4 page double-spaced must be provided at the beginning of each article. The name of an author to whom correspondence should be sent must be indicated and a full postal address given in the footnote. Any acknowledgements should be placed at the end of the text (before the Reference section). Contributors should also note the following:

1. Italic type should be indicated by underlining and bold type by wavy underlining (italic and bold typefaces may be used only if they are very distinct).

2. S.I. units should be used throughout in text, figures and tables.

3. Authors should spell out in full any abbreviations used in their manuscripts.

4. Foreign quotations and phrases should be followed by a translation.

5. If necessary, guidelines for statistical presentation may be found in: Altman, D. G., Gore, S. M., Gardner, M. J. & Pocock, S. J. (1983). Statistical guidelines for contributors to medical journals. *British Medical Journal* **286**, 1489–1493.

REFERENCES (1) The Harvard (author-date) system should be used in the text and a complete list of References cited given at the end of the article. In a text citation of a work by more than two authors cite the first author's name followed by *et al.* (but the names of all of the authors should be given in the References section). Where several references are cited together they should be listed in rising date order. (2) The References section should be typed in alphabetical order on a separate sheet. Examples follow:

Brown, G. W. (1974). Meaning, measurement and stress of life events. In *Stressful Life Events: Their Nature and Effects* (ed. B. S. Dohrenwend and B. P. Dohrenwend), pp. 217–244. John Wiley: New York.

Brown, J. (1970). *Psychiatric Research*. Smith: Glasgow.

Brown, J., Williams, E. & Wright, H. (1970). Treatment of heroin addiction. *Psychological Medicine* **1**, 134–136.

Journal titles should always be given in full.

FIGURES AND TABLES Only essential figures and tables should be included. *Photographs* Unmounted photographs on glossy paper should be provided. Magnification scales, if necessary, should be lettered on these. Where possible, prints should be trimmed to column width (i.e. 70 mm). *Diagrams* These should not be included in the text and should be submitted in a form suitable for direct reproduction. The printed version will normally be reduced to 70 mm wide, so care should be taken to ensure that lettering and symbols will remain clearly legible. All photographs, graphs, and diagrams should be referred to as figures and should be numbered consecutively in arabic numerals. Ensure that the figure number is marked on the back of the photograph or artwork together with the name of the author and paper title. Captions for figures should be typed double-spaced on separate sheets. *Tables* Tables should be numbered consecutively in the text in arabic numerals and each typed on a separate sheet after the References section. Titles should be typed above the table.

PROOFS AND OFFPRINTS Page proofs will be sent to the author designated to receive correspondence. Corrections other than to printer's errors may be charged to the author. Fifty offprints of each paper are supplied free; additional offprints are available according to a scale of charges if they are ordered when the proof is returned.
