PUBLISHED BIMONTHLY

Publishing, Subscription and Advertising Offices:

Headington Hill Hall, Oxford OX3 0BW, U.K. [Tel. Oxford (0865) 64881]

Annual Subscription Rate 1984

For libraries, university departments, government laboratories, industrial and other multiple-reader institutions, US\$105.00; two-year rate (1984-85) US\$199.50 (including postage and insurance). *Specially Reduced Rates for Individuals*; in the interest of maximizing the dissemination of the research results published in this important international journal we have established a two-tier price structure. Any individual whose institution takes out a library subscription may purchase a second or additional subscriptions for personal use at a much reduced rate of US\$30.00. Members of the International Centre of Insect Physiology and Ecology (ICIPE) and the African Association of Insect Scientists (AAIS) may purchase a subscription at the special rate of US\$20.00. Subscription enquiries from customers in North America should be sent to: Pergamon Press Inc., Maxwell House, Fairview Park, Elmsford, NY 10523, U.S.A., and for the remainder of the world to: Pergamon Press Ltd, Headington Hill Hall, Oxford OX3 0BW, U.K.

Application forms for Membership of the AAIS (subscription US\$20.00) may be obtained from: Hon. Secretary, African Association of Insect Scientists, P.O. Box 59900, Nairobi, Kenya.

Microform Subscriptions and Back Issues

Current subscriptions are available on microfiche simultaneously with the paper editions and on microfilm on completion of the annual index at the end of the subscription year.

Insect Science and Its Application

The International Journal of Tropical Insect Science

INSTRUCTIONS TO AUTHORS

1. All papers for publication in *Insect Science and Its Application* should be submitted directly to Professor Thomas R. Odhiambo, Chief Editor, *Insect Science and its Application*, International Centre of Insect Physiology and Ecology (ICIPE), P.O. Box 30772, Nairobi, Kenya. Papers should be mailed in a strong envelope, preferably linen, as they will otherwise arrive in a damaged condition.

2. Papers should be typed in English or French, and be original contributions in the field of tropical insect science. Each paper should have a summary in the form of an Abstract in English and French.

3. Submission of a paper implies that it has not been published previously, that it is not under consideration for publication elsewhere, and that if accepted for *Insect Science and Its Application* the authors will transfer copyright to Pergamon Press as is customary. Articles and illustrations become the property of the Journal. There is no page charge for papers accepted for publication.

4. Manuscripts and illustrations must be submitted in triplicate to ensure efficient refereeing, and the author should retain a copy. In the case of multiple authorships, the authors should indicate who is to receive correspondence and the correct address for mailing of proofs.

5. Manuscripts must be typewritten with double spacing (including the reference list), and with wide margins on one side of the paper only. Authors are requested to keep their communications as concise as possible. Footnotes should be avoided, and italics should not be used for emphasis. A running head of not more than 30 letters should be supplied.

6. The manuscript should contain the following features:

Title: This should be followed by the author's name and full address.

Abstract: This should be a brief summary of the contents, and conclusions of the paper, and should not be longer than 200 words. Abstract should be written in both English and French.

Key Words: A short list of key words, ar-

ranged in alphabetical order, should be provided for rapid scanning of the contents of the paper and use in compiling the index.

Introduction: This should contain a brief survey of the relevant literature and the reasons for doing the work.

Materials and Methods: Sufficient information should be given to permit repetition of the experimental work. The technical description of methods should be given only when such methods are new.

Results: These should be presented concisely. Only in exceptional cases will it be permissible to present the same set of results in both a Table and a Figure. The results section should not be used for discussion.

Discussion: This should be separate from the results section and should deal with the significance of the results and their relationship to the object of the work. Comparison with relevant published work should be made and conclusions drawn.

Acknowledgements.

References: The Harvard system will be followed. References should be detailed in the following order.

Authors' names and initials, date of publication (in brackets), the title of the article, the name of the journal as abbreviated in the *World List of Scientific Periodicals* (4th edition, 1964), the volume, and the first and last pages of the article, e.g.

Denlinger D. L. and Ma W. C. (1974) Dynamics of the pregnancy cycle in the tsetse fly *Glossina morsitans*. *Insect Physiol.* **20**, 1015–1026.

For books, the authors' names, date of publication, title, edition, page reference, publisher's name and the place of publication should be given, e.g.

Le Pelley R. H. (1959) *Agricultural Insects of East Africa*, 1st edn. East Africa High Commission, Nairobi.

In the text reference should be given as Owili (1977) or (Owili, 1977). When a citation includes more than two authors, e.g. Owili, Diallo and

Jones, the paper should be referred to in the text as Owili *et al.*, provided that this is not ambiguous. If there are only two authors, they should be referred to as Owili and Diallo. If papers by the same authors in the same year are cited, they should be distinguished by letters, a, b, c, etc.

Reference to papers "In press" must mean that the article has been accepted for publication and given as follows:

Ali M. (1985) The migratory behaviour of the cotton seed-bug, *Oxycarenus*. *Insect Sci. Applic.* In press.

References to "personal communications" and unpublished work are permitted in the text only.

7. *Illustrations.* All necessary original illustrations should accompany the manuscript but **should not be inserted in the text**. All photographs, graphs and diagrams should be numbered consecutively in arabic numerals in the order in which they are referred to in the text.

Glossy black and white photographs or positive prints (not slides of X-ray negatives) should be sent, unmounted wherever possible, and should be restricted to the minimum necessary.

Charts, graphs, or diagrams should be drawn boldly in black ink on good-quality white paper or card. Lettering to appear on the illustration should be given in full and should be of sufficient size to withstand considerable reduction, where necessary. Alternatively lettering may be shown on a rough overlay and will be inserted by the publisher.

Illustrations should not be larger than 18 × 26 cm or they may be damaged in the post. On the back of each illustration should be indicated the author's name, the figure number (in arabic numerals), and the top of the illustration, where this is not clear.

The following symbols should be used on line

drawings as they are readily available to the printer:

Legends to figures should be typed on a separate sheet, not on back of the original, and should give sufficient data to make the illustration comprehensible without reference to the text.

Magnification of photographs and illustrations should be **indicated by an appropriate scale bar and not in the legend**. This practice obviates the complications which arise through change of size in reproduction.

8. Tables should be constructed so as to be intelligible without reference to the text, numbered in arabic numerals and typed on separate sheets. Every table should be provided with an explanatory caption and each column should carry an appropriate heading. Units of measure should always be indicated clearly. All tables and figures must be referred to in the text.

9. Only standard abbreviations should be used. Where specialized abbreviations are used the name should be given initially in full with the abbreviation indicated in brackets.

10. The latin names should be given for all species used in the investigation, although taxonomic affiliation and authority should not be provided in the title.

11. Page proofs will be sent to the author by the press. They will already have been proof read by the press for printer's errors, but it is the author's responsibility to ensure that the proof contains no errors. **Corrections to proofs should be restricted to printer's errors only**. Other than these, substantial alterations will be charged to the author.

12. For indications of design of papers, the author should consult a recent issue of the Journal.

INTERNATIONAL JOURNAL OF INSECT MORPHOLOGY & EMBRYOLOGY

Editor-in-Chief: A P GUPTA,
*Department of Entomology and
Economic Zoology, Rutgers
University, New Brunswick, New
Jersey 08903, USA*

The journal publishes original contributions on all aspects of the gross morphology, paleomorphology, macro- and microanatomy and ultrastructures of insects, and similar studies of other related arthropods, which have direct bearing on our understanding of insect morphology. In addition to descriptive embryologic and post-embryologic papers, the journal will accept reviews developing new concepts, hypotheses and theories, and a limited number of notes and book reviews. Relevant papers are welcomed for editorial consideration. Papers in German and French will be published on a restrictive basis.
