I N D E X.

	PAGE
ARNEIL, L.	
On a simple theodolite suitable for use in schools [Title],	58
BURGESS, A. G.	
Theorems connected with Simson's Line, - . -	125
COLLIGNON, EDOUARD.	
Solution of the Cubic Equation, - . - . -	20
CRAWFORD, G. E.	
The determination of the centre of gravity of a circular arc by reference to a principle of Dynamics, - . -	35
DOUGALL, J.	
Quantitative proofs of certain Algebraic Inequalities,	61
Notes on the Apollonian Problem and the allied theory,	78
FRASER, W. G.	
On the relations of certain conics to a triangle, - . -	38
JACK, Professor J.	
On the Pascal Hexagram, - . - . .	42
A proof that the middle points of parallel chords of a conic lie on a fixed straight line, - . - . -	59
JACKSON, F. H.	
Certain Series of Basic Bessel Co-efficients [Title], -	6
M'BRIDE, J. A.	
A Trigonometric Dial: a Teaching Appliance [Title], -	6

MACLAGAN-WEDDERBURN, J. H.	
On Newton's Theorem in the Calculus of Variations [Title], - - - - -	44
MILLER, J.	
Note on Tortuous Curves, - - - . - - -	51
MUIRHEAD, R. F.	
Proofs of an Inequality, - - - - -	45
OFFICE-BEARERS, - - - - -	1
PEDDIE, W.	
The Conditions for the Reality of the Roots of an n -ic,	56
PICKEN, D. K.	
On the Reduction of $\int \frac{(Lx + M)dx}{(Ax^2 + 2Bx + C)^m \sqrt{ax^2 + 2bx + c}}$,	36
PINKERTON, P.	
On a Nine-Point Conic, &c., - - - - -	31
The Parabolic Path of a Projectile, - - - - -	34
ROSS, E. B.	
A Symbolic Method in Geometrical Optics, - - -	120
SOMMERVILLE, D. M. Y.	
On the number of Independent Conditions involved in the vanishing of a Rectangular Array, - - -	2
TURNER, J.	
On the Teaching of Geometry [Title], - - - - -	30
TWEEDIE, C.	
A Problem of Lewis Carroll's, and the rational solutions of a Diophantine Cubic, - - - - -	7
