C O N T E N T S

Nos. 1 & 2 (JUNE 1947)

Original Articles:	PAGE
345. Experiments on milking technique. F. H. DODD and A. S. FOOT	1
346. Measurements of the rate of change of temperature in high temperature-short time pasteurization plant. F. STEGHART	18
347. The disinfection of contaminated metal surfaces with hypochlorite solutions. F. K. NEAVE and W. A. HOY	24
348. Some modifications of the Schibsted fat aldehyde test. W. R. MUMMERY	55
349. A simple method of conducting the phosphatase test. D. STIVEN	57
350. The effect of sodium chloride on the pH values of milk and of butter serum. G. LOFTUS HILLS	62
351. The estimation of copper and iron in cream, butter and dry butterfat. A. K. R. MCDOWELL	70
352. Variations in the carotene and vitamin A contents of certain New Zealand butterfats. C. R. BARNICOAT	80
353. 'Malty' flavour in starter and butter. A. I. VIRTANEN and O. E. NIKKILÄ	89
354. The application of fat-acidity determination to a study of lipolytic flavour defects in Cheddar cheese. I. HLYNKA and E. G. HOOD	94
355. Cheese starter 'recovery' after attack by bacteriophage. (Strain dominance in multiple-strain starters.) AGNES A. NICHOLS and P. JUNE INESON.	99
356. Bacteriophage in cheese manufacture. Contamination from farm equipment. H. R. WHITEHEAD and G. J. E. HUNTER	112
357. Apparatus for routine estimation of oxygen in tins of milk powder. C. C. THIEL, G. LOFTUS HILLS and L. R. SCHARP	121
358. The effect of a high pre-heating temperature with and without ethyl gallate on the storage life of whole-milk powder spray-dried on a Gray-Jensen drier. J. C. D. WHITE, J. A. B. SMITH and C. H. LEA	127
359. A note on the effect of the temperature of pre-heating of spray-dried whole milk on the biological value of its proteins. K. M. HENRY and S. K. KON	140
Reviews of the Progress of Dairy Science:	
Section A. Physiology of dairy cattle. II. Nutrition. E. C. OWEN	142
Section B. Bacteriology and mycology applied to dairying. E. R. HISCOX and A. ROWLANDS	170
