## INTERNATIONAL GLACIOLOGICAL SOCIETY

The Society was founded in 1936 to provide a focus for individuals interested in practical and scientific aspects of snow and ice. Membership is open to all individuals who have a scientific, practical or general interest in aspects of snow and ice study.

Papers on glaciology are printed in the *Journal of Glaciology*, which is published six times a year. The Society also publishes the *Annals of Glaciology*, a peer-reviewed, thematic journal, two to four times a year. The Society's news bulletin, *ICE*, is published three times a year.

The Society sponsors symposia, meetings and workshops in many countries throughout the year.

*Journal of Glaciology* publishes original articles and letters concerning scientific research into any aspect of ice and snow, and interactions between ice, snow, climate and other environmental phenomena including the biosphere and permafrost. Research techniques described in the Journal include, for example, field studies, remote sensing, computer modelling and laboratory studies. Research topics include the nature of and changes in mountain glaciers and ice sheets, including former ice sheets. For example, ice cores extracted from the glaciers and ice sheets reveal detailed information on past atmospheric composition and climate, and changes in the extent and thickness of the ice sheets are also related to climate change. The physical, chemical and crystallographic properties of ice and snow are included, especially but not only as they relate to the flow of ice and to past climate. The Journal also publishes studies of sea ice, and of icebergs, along with their interactions with climate on shorter time scales, and with the ocean. Snow and avalanche research is included in the Journal, with several recent articles investigating avalanche dynamics. Snow and ice on other planets is also within the realm of the Journal of Glaciology, as are studies of atmospheric ice.

CONTENTS Vol 64 No 246 2018

- 523 **Charlie Bunce, J. Rachel Carr, Peter W. Nienow, Neil Ross, Rebecca Killick**  
Ice front change of marine-terminating outlet glaciers in northwest and southeast Greenland during the 21st century
- 536 **L. W. Morland**  
Asymptotic analysis of flow near a glacier terminus
- 543 **Achille Capelli, Ingrid Reiweger, Jürg Schweizer**  
Acoustic emission signatures prior to snow failure
- 555 **Anne M. Solgaard, Alexandra Messerli, Thomas Schellenberger, Christine S. Hvidberg, Aslak Grinsted, Miriam Jackson, Thomas Zwinger, Nanna B. Karlsson, Dorthe Dahl-Jensen**  
Basal conditions at Engabreen, Norway, inferred from surface measurements and inverse modelling
- 568 **Gabriela Collao-Barrios, Fabien Gillet-Chaulet, Vincent Favier, Gino Casassa, Etienne Berthier, Inés Dussaillant, Jérémie Mouginot, Eric Rignot**  
Ice flow modelling to constrain the surface mass balance and ice discharge of San Rafael Glacier, Northern Patagonia Icefield
- 583 **Brent M. Minchew, Colin R. Meyer, Alexander A. Robel, G. Hilmar Gudmundsson, Mark Simons**  
Processes controlling the downstream evolution of ice rheology in glacier shear margins: case study on Rutford Ice Stream, West Antarctica
- 595 **Pablo Sánchez-Gómez, Francisco J. Navarro**  
Ice discharge error estimates using different cross-sectional area approaches: a case study for the Canadian High Arctic, 2016/17
- 609 **Adrienne White, Luke Copland**  
Area change of glaciers across Northern Ellesmere Island, Nunavut, between ~1999 and ~2015
- 624 **Yetang Wang, Shugui Hou, Baojuan Huai, Wenling An, Hongxi Pang, Yaping Liu**  
Glacier anomaly over the western Kunlun Mountains, Northwestern Tibetan Plateau, since the 1970s
- 637 **A. Lambrecht, C. Mayer, A. Wendt, D. Floricioiu, C. Völksen**  
Elevation change of Fedchenko Glacier, Pamir Mountains, from GNSS field measurements and TanDEM-X elevation models, with a focus on the upper glacier
- 649 **Tun Jan Young, Dustin M. Schroeder, Poul Christoffersen, Lai Bun Lok, Keith W. Nicholls, Paul V. Brennan, Samuel H. Doyle, Bryn Hubbard, Alun Hubbard**  
Resolving the internal and basal geometry of ice masses using imaging phase-sensitive radar
- 661 **Victor C. Tsai, Xiaozhou Ruan**  
A simple physics-based improvement to the positive degree day model
- 669 **Colin M. Sayers**  
Increasing contribution of grain boundary compliance to polycrystalline ice elasticity as temperature increases
- 675 **John Erich Christian, Michelle Koutnik, Gerard Roe**  
Committed retreat: controls on glacier disequilibrium in a warming climate
