Cover. Plan of Waskiri, a newly discovered circular structure in a sparsely populated desert region of highland Bolivia. Enclosing a large plaza scattered with Late Intermediate and Late Period (AD 1250 -1600) ceramics, this 140m-diameter structure is unprecedented in its design, providing rich material for further study of this part of the pre-Hispanic Andes. For more information, see 'A pre-Hispanic religious landscape on the arid Andean altiplano of Bolivia', by Pablo Cruz, Richard Joffre and Jean J. Vacher, online, in this issue (photograph by P. Cruz).
