

Subscription Requests

Free Subscriptions

Individuals requesting subscriptions, or wishing to change/correct their address, are requested to do so at our website:

www.microscopy-today.com

Subscription Policies

- Microscopists in Canada, Mexico, and the United States are eligible for free subscriptions.
- Microscopy Society of America members receive *Microscopy Today* as a member benefit.
- Microscopists outside North America who are not MSA members may subscribe to the print edition for \$60US.
- Microscopists anywhere in the world may view the digital edition for free at the *Microscopy Today* website.

Digital Edition

- *Microscopy Today* is available in a digital edition that is free to qualified readers. To subscribe, go to the *Microscopy Today* website (www.microscopy-today.com), click “new subscription” or “renew subscription,” and follow the instructions provided.
- The digital edition is an exact replica of the print edition, advertisements and all. Special features include active website and email links (even within ads), word-level search function, and variable page magnification to enlarge figures and text.

Back Issues

- Scanned back issues of *Microscopy Today* are available for free low-resolution download at the website.
- High-resolution digital format on CD of complete back volumes are available for \$30/volume (MSA member) and \$50/volume (non-MSA member). The preferred method of payment is via credit card at the website. Bank transfer information is available from the Editor. Checks in US\$ should be made payable to “*Microscopy Today*” and sent to the Editor.

In-situ microscopy – uncompromised

There is always more to see when studying high speed reactions. That's why at Gatan we build large format cameras with unparalleled temporal resolution to push the boundaries of *in-situ* electron microscopy.

OneView™

Use only ONE camera to capture high quality 16 megapixel still images AND video in all of your TEM applications.

- Always have a "live" experience with 25 fps at full 4k x 4k resolution
- > 300 fps at 512 x 512 resolution

www.gatan.com/oneview

www.gatan.com/K2IS

K2® IS

Resolve dynamic details *in-situ* with the fastest 4k x 4k direct detection camera available.

- Frame rates up to 1600 fps sub-ms time resolution
- Highest available DQE results in images with lowest noise every image is useful

HOW DO YOU LOOK AT LIFE?

Life Science TEMs from JEOL

JEOL's 120kV-300kV Transmission Electron Microscopes are used by top researchers in structural biology, cellular biology, pathology, and neuroscience. We offer the highest resolution phase contrast capabilities, automated 3D tomography, cryomicroscopy, S/TEM analytical capabilities, elemental mapping, and automated montaging available. See what JEOL has to offer, from the research grade, compact JEM-1400Plus optimized for automated high contrast imaging to our powerful leading edge 300kV TEM with helium stage.
